The Land Rover was designed by the Wilks brothers who saw a need for an all-purpose 4x4 when they drove around their farm in Anglesey. The center steering was still a testimony to the agricultural tractors and was intended to eliminate the need to produce left- and right-hand steering vehicles for different markets.

LAND ROVER SONIM PHONE

LAND ROVER SONIM PHONE LR9075

Land Rover has worked with rugged handset manufacturer Sonim Technologies to create the Land rover S1 by Sonim, the first IP 67 rated handset. Its sturdy design and rugged features such as water, dust, impact and pressure resistance beyond normal operation conditions make it the toughest phone in the rugged phone market.

It is waterproof and can take up to thirty minutes submersion in 3.5 feet of water without skipping a beat. It can stand pressure of almost 100lbs. and can survive temperatures from freezing -5° F up to 130° F in the heat. The Land rover S1 by Sonim has a sturdy exterior with widely spaced keyboard buttons that can be operated even with work gloves and are tested for over 850,000 pushes.

The 1.8" shock resistant screen is so tough it can even survive a fall out of a second story window. (not recommended)

The phone also comes with an unconditional, three year warranty to match its overall ruggedness. However, don't judge the phone only by its rugged, sturdy exterior. Inside, the Land rover S1 by Sonim is packed with features such as a rugged 2 MP camera with flash, Amaze turn-by-turn GPS tracking, Bluetooth, WAP, a LED torch, FM radio and Opera Mini internet browser. The phone supports SD cards of up to 2GB and comes pre-bundled with various applications like games, wallpaper, themes, ring tones and email. Its extended battery life supports you with up to 1500 hours of standby time and 18 hours of talk time. Extra loud speakers with an output of 1W enable you to communicate even in the noisiest environments.

The Land rover S1 by Sonim comes unlocked and is compatible with any GSM carrier. Allow 2-4 weeks delivery.

We do not recommend driving over your phone.
