- ***NO OUT-OF-POCKET EXPENSES OR DEDUCTIBLE ON ANY COVERED DAMAGE OR WINDSHIELD REPLACEMENT***
- ***REPAIRS OR REPLACEMENTS MAY BE DONE AT THE SELLING DEALERSHIP, CUSTOMER'S HOME OR OFFICE BY EXPERIENCED PROFESSIONALS***

PermaPlate Windshield Treatment contains a unique molecular coupling agent that chemically bonds to the glass surface, fusing at the molecular level. This creates a hydrophobic and protective coating by capping the natural glass pores and its surface ridges. This bond strengthens and improves the quality of automotive glass by creating a strong covalent bond that acts as a protective shield.

PermaPlate Windshield Treatment was created to provide unprecedented protection to vehicle glass. PermaPlate Windshield Treatment uses the latest in molecular nano-chemistry to make your windshield stronger with enhanced clarity for a safer, clearer glass.
