The 4-HI setting locks both drive shafts for extra grip and pulling power to deliver confident handling on slippery, wet and graveled terrain.

The 4-LO position is for the toughest conditions delivering a 2.72:1 gear reduction ratio for mountain climbing grip and power.

4x4 Auto – Full Time Shift on Demand transfer case provides a “4WD AUTO” mode which allows the transfer case to adapt to the varying road conditions.

The multi-link coil suspension provides outstanding rear suspension articulation so you can go where you want, when you want, without worrying about getting hung up or bottoming out.
