

Audi

allroad REVIVAL

The Audi allroad has returned.

Take the new Audi allroad for a drive and you'll immediately sense the rally car spirit beneath the surface. Neutral, agile handling that is nearly unfazed by bumps in the road. Increased ride height, underbody shields, and Electronic Stability Control (ESC) lets you push on where most cars and crossovers beg you to back down. Enthusiast drivers who take full advantage of the turbocharged engine's 258 lb-ft of torque will also appreciate the available front sport seats and three-spoke multifunction steering wheel with shift paddles that put them at the helm of sporty sophistication... Again.

2013 Audi allroad

NOTE: The navigation systems within the Euro-spec vehicles deployed for the Audi allroad do not contain U.S. maps.

**MPG is estimated.*

Your Audi allroad is equipped with Start-Stop.

- The Euro-spec vehicles deployed for the Audi allroad Revival are equipped with an engine efficiency system that:
- + automatically shuts off while you are stopped with the brake pedal depressed or during stop-and-go traffic;
 - + automatically restarts once you begin to release the brake pedal;
 - + can be deactivated by a control in the center stack just below the Audi multimedia panel ((A) OFF).

NOTE: The US-spec vehicles will NOT feature the Start-Stop engine efficiency system.
