

**ACCESSORI ORIGINALI
AUTOMOBILI LAMBORGHINI**
EXTERIOR

**WE'RE ITALIAN.
OUR PASSION IS BOUNDLESS
AND KNOWS NO COMPROMISE.**

This is true for every Lamborghini, and for each and every detail. If you love your Lamborghini as much as we do, show it. There are lots of ways you can.

A close-up photograph of a bright green car body part, likely a door or fender, featuring a carbon fiber section. A side mirror is attached to the top. The image is set against a dark background, highlighting the car's sleek design and the texture of the carbon fiber.

EXTERIOR

A masterpiece made of carbon fiber.
The product of 120 hours of precision labor.

EACH GRAM IS IMPORTANT.

Highly resilient and remarkably light, carbon fiber is considered to be the material of the future by the auto industry. But in Sant'Agata Bolognese, this advanced technology has been a household word for more than 30 years. In our two research centers, designers develop innovative construction and production methods on a daily basis, with the constant goal of reducing the weight of the vehicle and, as a result, of improving its performance, even if this means performing an endless number of complex experiments.

Because each single gram is important for reaching our goal.

A PASSION FOR DETAIL

Lamborghini boasts a long tradition of hand-made craftsmanship, but also a long tradition of working with hi-tech materials such as carbon fiber. Every accessory offers outstanding quality, cutting edge technology and Lamborghini's signature design, and stands out for the attention paid to the smallest details.

The goal remains the same: our customers' expectations of quality and service must not merely be met, but consistently exceeded.

Quality is the product of passion

Lamborghini rims are designed in Sant'Agata and manufactured with the greatest of care. Our wheels are forged into a perfect shape from a single piece of aluminum, which provides them with greater strength and allows them to be made thinner thus saving weight. The final result is higher performance from your Lamborghini.

◀ "RA" RIM KIT

These rims in brushed alloy have five thin, double spokes and are produced using an intricate forging method. Please note that the polished finish is available as an after-sales accessory, only.

Passion, precision and attention to detail

are fundamental facets of each step in every process: it's the only way to ensure that each component meets Lamborghini's highly stringent quality standards.

COLORED CALIPER KIT

For a vehicle produced in Sant'Agata Bolognese, every gram of reduced weight is an advantage. That's why we work passionately to trim down the weight of our cars. And that's why we use carbon ceramic brakes, which not only offer a very long service life, but are significantly lighter than traditional brakes.

Available for Standard and Carbon-ceramic brakes.
