# Get Started with Entune™[1]

## 1. Check your phone's compatibility with Entune™

Most iPhone®[2], Android™[3], and some Blackberry® smartphones will work with Entune™. To verify compatibility, visit *www.toyota.com/connect* and provide your phone information.

Phone not included

## 2. Create your Entune™ account

Your Entune™ account creates access to your personalized Entune™ apps when you launch the system. To create an account, log on to *www.toyota.com/entune* and click **Account Registration/Login** located in the upper right of the screen.
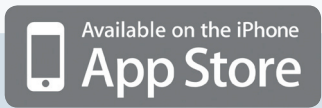

## 3. Link app provider accounts

You'll need to provide account information for MovieTickets.com, OpenTable® and Pandora® in order to fully use these services. You can use your existing account(s) or register for complimentary accounts at *www.movietickets.com*, *www.opentable.com*, or *www.pandora.com*. Return to your Entune™ account through *www.toyota.com/entune* and click **Link Now** next to each applicable app provider.

MovieTickets.com and OpenTable® available on Premium HDD Navigation with Entune™ and Display Navigation with Entune™; available Spring 2012 for Display Audio with Navigation and Entune™.

## 4. Download the Entune™ mobile app

Visit your smartphone app store and search "Entune" to find and download the Entune™ mobile app, also complimentary. The app must be installed on your phone and updated with your Entune™ Account email address and password from **STEP 2** in order to use Entune™.

Available on the iPhone **App Store**

ANDROID APP ON **Google play**

**BlackBerry App World**™

## 5. Pair your phone[4] and connect Entune™

Using *Bluetooth*®[5] wireless technology, your phone must be paired to your Toyota's multimedia system so Entune™ data can be "pulled" from the Internet through your phone to your Toyota. Return to *www.toyota.com/connect* and after completing the compatibility guide, continue to the pairing process for complete pairing instructions.

## 6. Launch the Entune™ mobile app[4] and go!

Start your Toyota and launch the Entune™ mobile app on your phone. Then, select **Apps** on the multimedia system and enjoy all Entune™ has to offer! *Note: iPhone®[2] users may need to cable their phones to the USB port depending on the multimedia system.*

## QUICK REFERENCE GUIDE

A detailed Quick Reference Guide is located in your glove box for more information on:

- Entune™ Registration
- Pairing a Phone Using *Bluetooth*®[5]
- How to Use Navigation
- How to Use Voice Recognition

You'll also find a Delivery Checklist, which will outline the basic functions of your new Toyota.

## WEBSITE RESOURCES FOR ENTUNE™

Your one-stop resource for Entune™ and multimedia systems information is ***www.toyota.com/entune***:

- Experience Entune™ product demonstration videos
- Comprehensive Quick Start Guide for Entune™ and basic multimedia functions
- Learning and Support section includes detailed help and many "how-to" videos
- Comprehensive FAQ and Troubleshooting sections

### On Your Smartphone

A mobile version of the website is available for your smartphone: learn about Entune™ and watch "how-to" videos right inside your Toyota!

Visit ***www.toyota.com/entune*** on your smartphone and scroll to the bottom to access Entune™ information.

## HELPFUL ENTUNE™ HINTS

Setting up and using Entune™ is easy. Here's some additional information you may find useful when you first start using the system:

### 1. iPhone®[2] Cabling for Display Audio Multimedia Systems

Your iPhone®[2] has the ability to pair to all multimedia systems for *Bluetooth*®[5] hands-free communication and streaming audio. However, Display Audio systems require your Entune™ compatible iPhone®[2] to cable to the multimedia system (via the USB port) to use Entune™. Premium HDD and Display Navigation systems do not need the cable.

### 2. Data Plan Impact

Most Entune™ apps and data services[6] use small amounts of data in short bursts, while other apps (iHeartRadio and Pandora®) stream content when "on," and can consume more data. If you don't have an unlimited data plan, please monitor your Entune™ usage to avoid incurring data charges.

iHeartRadio is available now on Premium HDD Navigation with Entune™ and Display Navigation with Entune™. iHeartRadio will be available Spring 2012 at no charge on Display Audio with Navigation and Entune™.

### 3. *Bluetooth*®[5] Phone Pairing

Pairing your phone using *Bluetooth*®[5] allows you to speak hands free, and to search your phonebook using the multimedia system in addition to connecting to Entune™. You also can stream audio!

Visit ***www.toyota.com/connect*** and complete the easy-to-follow steps.

### 4. Pandora® Registration

To use all Pandora® functionality on the multimedia system (including adding stations, cover art, etc.), link your Pandora® account via the Entune™ account rather than streaming the audio signal via *Bluetooth*®[5]. See the other side of this guide for instructions.

### 5. Initial Entune™ Update

The first time you launch Entune™ the system may update with the latest Entune™ software. The system will prompt you when the updates are complete and will launch the app suite automatically.
