

# SENSE OF STYLE

## NEW ACCESSORIES BY VOLVO

### MOONROOF WIND DEFLECTOR

Let the fresh air and moonlight in. This Moonroof Wind Deflector is made from a new, high-impact material that's virtually unbreakable. It features a full wrap, but in a low-profile style that minimizes wind noise and air turbulence. It's also easy to install, with a superior mounting system that requires no drilling. Available for the following 2006 (and newer) models: S40, V50, S60, V70, XC70, S80 and XC90.

### VALVE STEM CAPS

These stylish Valve Stem Caps feature the Volvo Iron Mark logo in full-color and will put the finishing touch on your wheels. They fit all Volvo air valves and feature an "o-ring seal" insuring a clean valve opening when removed. Make sure to periodically clean them with mild soap and water to maintain the polished finish. Fits all models.

### LICENSE PLATE FRAMES

Volvo License Plate Frames provide the perfect finishing touch for dressing up the exterior of your vehicle. The frames are made from high-grade stainless steel and are hand polished to a sparkling shine. There are two styles to choose from – either the Volvo License Plate Frame, which features the Volvo logo, or the plain Volvo Slim Line License Plate Frame. Fits all models.

*IMPORTANT: Most state motor vehicle regulations do not permit the covering of license plate characters. Do not use a Volvo logo style frame if it covers such wording as the registration category (e.g., commercial, manufacturer, new car dealer), the name of the state, or a registration sticker. Check with local law enforcement if uncertain. When in doubt, please use a Volvo slim line style frame.*

Volvo. for life
