

VOLVO IPOD® MUSIC INTERFACE

Available for all Volvo models 2008 and newer
(except S60)

Volvo. for life

Plug and Play

The Volvo iPod Music Interface is the perfect way to connect your iPod directly to the Volvo's audio system. Simply plug it into the interface cable located in the center armrest compartment and let the Volvo's audio system take over.

Use the radio controls or steering wheel buttons to:

- Adjust the volume
- View songs and playlists on the radio display
- Search for tracks
- Change tracks
- Play songs randomly

USB Connector

The Volvo iPod Music Interface cable features two connectors – one for your iPod and a standard USB plug. Toggle the source button on the radio to select iPod or USB. The interface supports most USB memory drives.

Charging Made Easy

Whenever the car is running, the interface cable charges all devices that are plugged in – iPods or other USB devices. With the appropriate adapter, it even charges many cell phones!

Quick Installation by Your Volvo Retailer

The Volvo iPod Music Interface integrates into the car's audio system and can be easily installed by your Retailer. It mounts conveniently in the center armrest compartment. Simply open the armrest lid to access both the iPod and USB connectors, plug in your device(s), turn it on, and close the armrest for safe storage.
