# AIR FILTERS

## JOIN THE FIGHT AGAINST AIR POLLUTION!

### All Genuine Toyota air filters:

- Feature **triple layer construction** that traps and retains as much as 30% more contaminants than some aftermarket air filters which only contain a single layer.
- Utilize a rigid, molded **polyurethane resin frame** that helps maintain a tight seal, while also reducing noise transmitted to the interior of the vehicle.
- Are **original equipment**, engineered specifically for Toyota vehicles—they're the same filters that came with your Toyota from the factory!

**Tip:** Changing your air filter **routinely** ensures that your engine maintains the **proper air flow** for maximum performance.

To ensure the most trouble-free operation of your Toyota, please check your vehicle's Scheduled Maintenance Guide or consult your Toyota dealer for proper air filter change intervals.

# CABIN AIR FILTERS

## THE SECRET TO CLEAN AIR

- Filter both **recirculated** and **fresh air**.
- Work to **minimize circulation** of unwanted particles in the passenger compartment.
- **Capture dust, pollen** and other **unwanted airborne particles**.
- Beginning November 2009 - **Premium Charcoal Filters** available.

The Scion tC cannot be retrofitted with a Cabin Air Filter or Case Part Number due to cooling system operations.

P – Pollen Filter: The standard filter designed to capture larger particles including pollen, dust, and other allergens.  
 EE – Electrostatic Filter: While it functions like a Pollen Filter, it also holds a static charge that captures smaller particles such as asbestos and tire dust.  
 CH – Premium Charcoal Filter: Features a 2 layer filtering structure that helps it to capture particles and removes odor.
