THE 2022 RAV4 & RAV4 HYBRID

Every day deserves more adventure.

Squeeze more out of modern life.

The 2022 RAV4 and RAV4 Hybrid. Their stylish design paired with responsive driving dynamics and rugged capabilities open you up to a world of excitement, while keeping you prepared for the demands of modern life. With the reliable LE and XLE, refined Limited, capable Trail and TRD Off-Road Package, and sporty Hybrid options, there's a RAV4 for every appetite to help push you to your limits.

[Learn More](#)

EXTERIOR STYLING

Inspiring design.

Looking good is also about feeling good.

RAV4 features a striking and rugged style that exudes strength and inspires you to challenge every part of your day. Its bold front end, imposing stance, and large fender flares show off its aggressive off-road side, while its aerodynamic lines and sleek silhouette accentuate its sophisticated street feel. For adventure seekers, the Trail AWD with TRD Off-Road Package include sporty features such as 18" TRD Alloy Wheels with Falken™ All-Terrain Tires, Grille Shutters, Bridge Type Black Roof Rails, Trail Body Mouldings, and Projector LED Headlamps.

[Learn More](#)

INTERIOR DESIGN

It's all in the details.

An elevated interior to match an elevated adventure.

The RAV4's refined interior includes premium materials, soothing textures, and high-tech features designed to elevate any driving experience. The spacious cabin offers a host of available amenities including Power Heated Front and Rear Seats, Heated Leather-Wrapped Steering Wheel, Dual Zone Automatic Climate Control, and a Power Moonroof. The optional Kick Sensor Power Back Door makes it incredibly easy to access the cavernous cargo area, which has plenty of useful storage to bring along whatever your adventure requires.

The future of user-friendly.

INTUITIVE TECH

RAV4 offers a host of available tech-focused features that include a 9-inch touch-screen display with 11 JBL® speakers, 7-inch TFT Multi-Information Display, Apple CarPlay™¹ and Android Auto™¹ compatibility, and Bird's-Eye-View Monitor.²

CONNECTED SERVICES BY TOYOTA¹

Staying connected has never been easier with a suite of available connectivity features including Remote Connect, Safety Connect®, Service Connect,³ and Destination Assist to help enhance your driving experience.

ENERGY MONITOR

Tracking your efficiency is easy with RAV4 Hybrid's energy monitor. As driving conditions change, the monitor uses both the multimedia display and available Head-Up Display to show you how power is being routed to the drive wheels or how otherwise wasted energy is captured to charge the battery.

Qi WIRELESS CHARGING⁴

Simply place your Qi compatible device on the available Qi wireless charger for a quick and easy charge.

[Learn More](#)

PERFORMANCE

Powered by efficiency.

Discover the potential in every day.

RAV4 delivers power and intelligent efficiency so that you can feel the freedom of the open road or secluded trail. The Dynamic Force 2.5 litre in-line four-cylinder engine delivers responsiveness and fuel efficiency for a smooth and sporty drive. The multilink rear suspension offers exceptional handling and control by working with its natural body rigidity to keep traction steady. RAV4 also has the capabilities you need, like available AWD to give you greater control and confidence when facing demanding road conditions. When off-roading, the available Multi-Terrain Select tailors the RAV4's driving characteristics to specific driving conditions by adjusting the transmission's shift points, throttle pedal sensitivity, and brake force to give you maximum traction and control on a variety of surfaces.

[Learn More](#)

PERFORMANCE

More capable. More fun. More memories.

TOWING POWER

The RAV4 offers the necessary towing strength and power to take on whatever your day has in store. For bigger hauls, the RAV4 Trail and TRD Off-Road have the power and torque to tow up to 1,588 kg (3,500 lb).⁵

DYNAMIC TORQUE VECTORING AWD WITH REAR DRIVELINE DISCONNECT

Enjoy an upgrade in performance that is paired with impressive fuel efficiency. The intelligence of available Dynamic Torque-Vectoring All-Wheel Drive improves handling by sending up to 50% of the power to the rear and then distributing more power to the wheel that needs it. To boost fuel efficiency, Rear Driveline Disconnect will stop sending power to the rear when it isn't necessary.

MULTI-TERRAIN SELECT

Multi-Terrain Select takes RAV4's highly evolved four-wheel drive performance to a new level. The system allows you to select from four modes, then it regulates wheelspin accordingly to give you maximum traction on the most challenging terrain – including mud, sand, rocks, and dirt.

HYBRID CAPABILITIES

The RAV4 Hybrid will never compromise on power and capability. Its Toyota Hybrid System engine produces an ample 219 combined net horsepower for impressive acceleration all the way to highway speeds.

SAFETY

Toyota Safety Sense™

Toyota
Safety
Sense

No matter what roads you travel, Toyota Safety Sense™⁶ (TSS) 2.0 is always there to help keep you – and those around you – as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2022 RAV4, and it's designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

[Learn More](#)

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION⁷

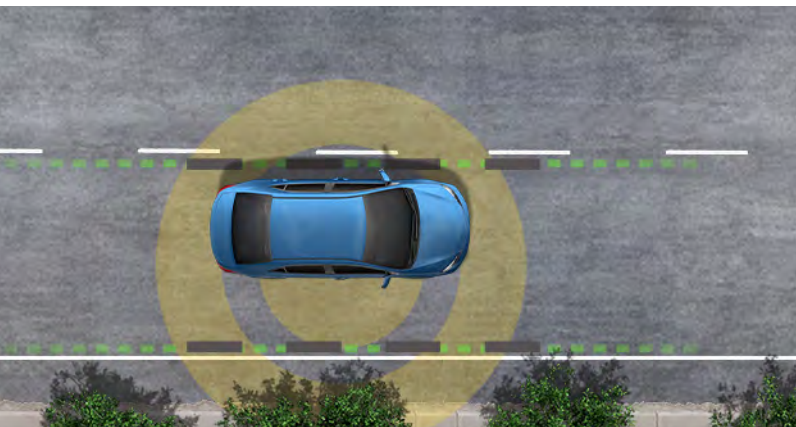

It provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

AUTOMATIC HIGH BEAMS⁸

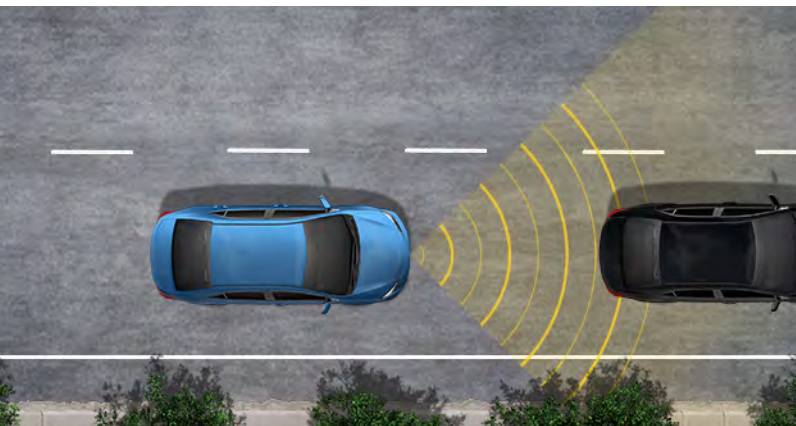

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

[Learn More](#)

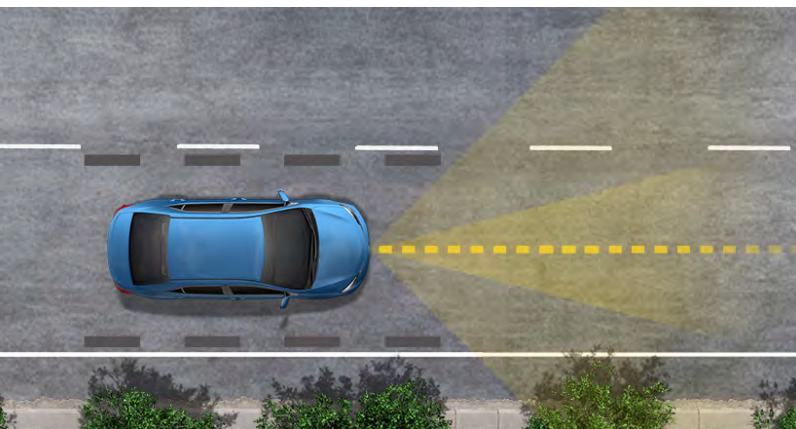

LANE DEPARTURE ALERT WITH STEERING ASSIST⁹ & ROAD EDGE DETECTION

It alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL¹⁰

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

LANE TRACING ASSIST¹¹

It provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation.

[Financial Services](#)

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Cold weather and other environmental factors may limit system. Operates at low speed or when parked. Do not rely exclusively on the system as it is not intended to replace safe attentive operation of the vehicle. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm clearance. (3) Services are dependent upon connection to a compatible 4G wireless network, provided by a third-party wireless service provider. Toyota is not responsible for 4G cellular network discontinuance and will not provide compensation for reduced service availability. Based on current information, 4G network availability may end as early as 2029. (4) Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns. (5) Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weigh your vehicle without passengers or cargo. Installation of a tow hitch receiver or other accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations. (6) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (7) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian and Bicycle Detection system is designed to detect a pedestrian and bicyclist ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians and bicyclists, driver input and weather, light and road conditions. Do not overly rely on the Intuitive Intersection Support system. Always visually confirm that it is safe to proceed. System may not operate depending on the traffic conditions and intersection configuration. Intersection Support will NOT detect pedestrians crossing the road in the same direction as the vehicle. Emergency Steering Assist may not operate if an oncoming vehicle or an obstacle that would prevent a safe evasive manoeuvre are detected. (8) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (9) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (10) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (11) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (12) Not all exterior and interior colour options are available for every model. (13) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (14) Do not rely exclusively on the Blind Spot Monitor System and Rear Cross-Traffic Alert System. They are not collision-avoidance systems or substitutes for safe and attentive driving.

Details on the above features can be found in the Owner's Manual or through your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca or your Toyota Dealer is your best source for up-to-date information.
