

Introduced in 1997, the Lexus RX has the distinction of starting the luxury crossover market. Currently in its fourth generation, the RX was all-new for 2016. It is offered in base and F SPORT trim levels with a number of available option packages. The RX 350 comes standard with a 3.5-liter V-6 engine and an 8-speed automatic transmission. A hybrid version is also available (RX 450h) with a Continuously Variable Transmission. Both models are available with front-wheel or all-wheel drive.

Although the RX 350 offers a great deal of luxury and technology, its options are offered in pricey groups, while the RDX has an array of standard features and a simpler model structure.
