

STEP 1: **Hand selected vehicle**
Our vehicles are hand selected by highly trained professionals.

STEP 2: **Rebuild and Restore**
The vehicles then go to certified rebuilders for repairs and restoration.

STEP 3: **First Inspection Process**
Once restored to their original state, consistent with the mileage and age prior to any damage, the vehicles are fully inspected by certified technicians.

STEP 4: **Drive-cycle performance test**
Each vehicle is then put through a drive-cycle performance test before coming home to Autolocity Motors.

STEP 5: **Second Inspection Process**
The ASE certified technicians at Autolocity then supervise a stringent 150+ point internal inspection to ensure that our highest levels of standards are met.

STEP 6: **Safety and emissions**
Each vehicle is then given a Utah Safety and Emissions test.

STEP 7: **Third Inspection Process**
The final comprehensive inspection is completed by an independent and impartial BlueStar, ASE-certified mechanic. This 50-category, 200-point assessment covers everything from fluids, hoses and belts to tires, brakes and the HVAC system.

STEP 8: **Drive-cycle performance test**
Every vehicle is then put through a final drive cycle performance test.

FINISHED **and ready to purchase**
As a valued customer, you can rest assured that your vehicle has been Triple Select Inspected and has met our rigorous performance standards.
