17" 5-arm semi-Y winter wheel and tire package²

Adding style and performance, this winter wheel and tire package features winter tires specifically engineered to help improve traction and handling in snow and ice—and even on dry roads—in temperatures below 45°F.² See your authorized Audi dealer for details.

¹ High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility, and road conditions. See your dealer for more information. ² Remember that even with high-quality winter tires, you must always drive according to the conditions of the road and maintain more distance from other vehicles since braking distances will be longer on ice- and snow-covered roads.

¹ Audi navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible; therefore, you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested Audi navigation plus route. Periodically, mapping updates will be available for purchase at an additional cost. Consult your dealer or call 1.800.FOR.AUDI (367.2834) for details. ² Batteries included.
