

FleetValue™ Brake Pads

FleetValue brake pads are OE Quality Parts at Competitive Prices that provide the durability and braking performance required to keep your truck in top operating condition.

FleetValue brake pads are made in the USA from the high quality materials you expect for your truck parts. They come packaged four pads per box, enough to do one axle per truck.

FleetValue brake pads meet or exceed Federal Motor Vehicle Safety Standards (FMVSS) 105 with FULL GVWR (gross vehicle weight rating) for On-Vehicle testing with various versions. Few go to such lengths for a second line truck part. FleetValue brake pads have been fully tested for wear, heat, judder, and fade. The pads exceed most of the original equipment results.

Two key factors of your transportation needs are low cost of ownership and safe operation of your trucks. FleetValue brake pads can help you meet both of these important needs.

FleetValue Parts are covered by a 1-year/unlimited mileage warranty. See your authorized Isuzu truck dealer for details.
