Tips and Tricks

- **PIN protect your Email and Calendar apps if you don't want any other drivers to be able to view this information** – emails and appointments are accessible in the vehicle regardless of connection. To completely delete emails and appointments from your vehicle, you must delete the account they are associated with.
- When you get started, you'll need to **move apps to your main screen in your vehicle**. You can do that through "App Garage" and then choosing "App Garage Settings".
- You can **drag and drop icons and arrange your screens so that the apps and features you use most frequently are convenient to you**. Do this by holding down an icon until an X appears and then move it to your desired location.
