

Added Comfort and Style

Stay Cool

3M™ Automotive Window Film incorporates a unique process that allows for high heat rejection, low reflectivity, and protection from the sun's heat and ultraviolet rays.

Stay Connected

3M™ Automotive Window Film is non-metallized. The result is an easy-to-maintain, long-life film that won't interfere with mobile phone, GPS and satellite radio reception.

Reduces Glare

3M™ Automotive Window Film significantly reduces glare from blinding sunlight, allowing you to see better and concentrate more on driving.

Increase Privacy

3M™ Automotive Window Film helps provide increased privacy for you and your valuables by shading your windows from the sun and prying eyes.
