Introducing the all-new X5 M and X6 M, the first M vehicles created for those seeking legendary high-performance thrills, with the stability of BMW's intelligent all-wheel-drive. A highly efficient M designed turbo V-8 engine delivers pure high-performance muscle and a growl to match. A custom-tuned suspension and Dynamic Performance Control work in tandem with BMW's xDrive, for all-wheel-drive traction with a sporty, responsive feel. And inside, distinctive leathers and trims, matched with compelling contours and design cues, welcome you to the M side of luxury.

The all-new BMW X6 M.
The definition of savage beauty.

We took a groundbreaking formula – the Sports Activity Coupe™ – and added equal parts M engineering and M design to create a completely new and captivating vehicle: the X6 M, a high-performance all-wheel-drive dream machine. Its dynamic contours fall somewhere between artwork and aircraft; a muscular stance and aggressive front end are paired with a sleek coupe roofline and the convenience of four doors. The formidable exterior is accented by a host of M-specific details, from the signature M gills and aggressive quad chrome tailpipes, down to the handsome, standard 20-inch light-alloy wheels. Exclusive M paint colors include a head-turning Melbourne Red Metallic. Forget “attention-getting” – the X6 M demands to be seen.

Finally, a pulse-tuned, turbocharged reason to take the road less traveled.

There's much more to the X5 M and X6 M than mere visual stimulation. An M designed 4.4-liter turbo V-8 engine with High Precision Direct Injection offers total command of 555 hp and 500 lb-ft of torque – more than enough to remind the driver that all M vehicles are born on the track. This dynamic V-8 features BMW M's innovative twin pulse-tuned turbochargers. Compared to conventional, previous-generation turbocharged engines, these twin turbos deliver greater acceleration response, faster and more evenly across nearly the entire power band, from 1500 to 5650 rpm. Enhancing the high-performance driving experience: a 6-speed M Sport Automatic Transmission featuring paddle shifters on the steering wheel. And special M-tuned driving systems – such as M Dynamic Mode and Dynamic Performance Control – operate together seamlessly, while allowing you customized control over road feel and responsiveness.

The all-new BMW X5 M.
All-wheel-drive stability, now available in “wow.”

The intelligent traction and spacious luxury of BMW's Sports Activity Vehicle® platform meets pure M Power in the X5 M. It's endowed with the same stunning V-8 engine, customized suspension and advanced all-wheel-drive capabilities as the X6 M, but designed with a slightly higher driving position, plenty of room to seat five comfortably, and a larger cargo area. But make no mistake: the X5 M's high-performance credentials are easy to spot. Three large air intakes, a low, sporty stance, and quad chrome tailpipes place it firmly in the realm of the track-inspired. And once you drive it, you'll need no convincing of its M heritage.

High-performance twins.
Separated by design.
Joined at the finish line.

Plenty of space for five people – and all their M fantasies.

What's the best way to tackle tight curves and cruise through straight-aways? In comfort and style, of course – and that's where the X5 M excels. An inspiring M sportiness pervades the entire cabin, from the exquisite double stitching to sleek Carbon Leather trim. Upgrade to the Enhanced Premium Sound Package, and lose yourself in your favorite roadtrip soundtrack, delivered through 16 speakers. The

Panoramic moonroof and four-zone climate control transport passengers in first-class style. And even with its emphasis on luxury and high-performance, the X5 M also delivers practicality: with the split-folding rear seats down, there's more than 60 cubic feet of storage space, easily accessed via the large rear tailgate.

From here, everything feels like an adventure under your command.

Those behind the wheel of the X5 M and X6 M are presented with nothing less than the latest and most luxurious M appointments. Grab hold of the latest-generation iDrive controller, check your maps and set your coordinates. The optional M-specific Head-up Display flashes important driving data, like RPMs and gear selection, all at a quick, eye-level glance. An array of controls within the driver's

easy reach operate innovative driving technologies like M Drive and Electronic Damping Control (EDC). For the ultimate in comfort, the fully adjustable M Sport front seats are clad in supple Merino Leather upholstery. The standard Brushed Aluminum Shadow trim and leather-covered dash¹ add an inspiring elegance to the cockpit.

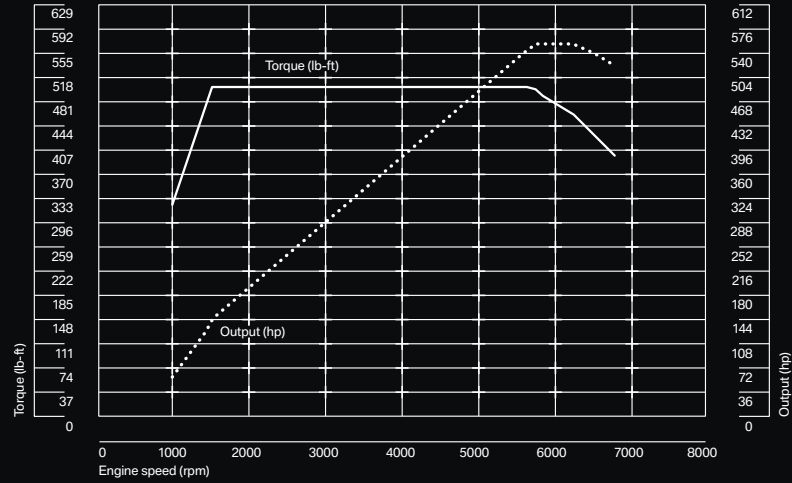

¹ Included in Full Leather Interior option.

Interior motives: the sensuous cabin of the X6 M.

Once you sit inside the X6 M, you'll know the meaning of "luxury performance." Every surface and corner shows signs of M-enhanced comfort – from the rich Merino Leather upholstery and striking trims, to the Cold Weather Package, which adds a heated steering wheel, heated rear seats, and a ski bag for the pass-through, accessed by the fold-down rear-seat backrests. Individual rear seats with integrated

head rests and side supports soothe and accommodate passengers on even the longest trips, while a rear seat entertainment package delivers the long-distance delights of DVDs and MP3s. And the Comfort Access system provides single-touch opening of the rear tailgate, for quick and convenient loading of the amply sized cargo area.

Maximum torque is available across an extremely broad rev band, from 1500 to 5650 rpm, creating rapid responsiveness not normally associated with a turbo engine. Traction is also consistently high, even in the upper rev ranges.

The new M-designed turbo V-8 engine. Before it earns its letter, we make sure it can fly.

The M designation is one we take seriously: it represents our fastest, strongest, most aggressive vehicles, especially when it comes to what's under the hood. Case in point: BMW M's latest 4.4-liter V-8 engine features one – make that two – impressive world's firsts. The twin turbos of this 555-hp engine don't merely add pavement-punishing torque; they do so in a completely revolutionary way. Each turbo is pulse-tuned to the engine,

delivering boosts of power at precisely the optimal time, for consistent and reliable bursts of M acceleration throughout the power band. For the driver, that means there's a track-inspired 500 lb-ft of torque on hand from 1500 to 5650 rpm – more than enough for any tarmac takeoff. An ideal high-performance companion, the M Sports Automatic Transmission harnesses this power with uncommonly smooth 6-gear

shifting, easily accessed via the paddle shifters on the steering wheel. M Drive adds another element of customizability: selecting either the Normal or Sport modes alters the responsiveness of various parameters – including throttle sensitivity, steering, suspension and more – to accommodate any driver's mood. Either mode can be chosen via iDrive, and then called up using the M Drive button located on the steering wheel.

Like every BMW, the new BMW X5 M and X6 M come with the BMW EfficientDynamics technology package as standard. With features such as high-pressure direct injection using Piezo injectors, the new M Power V-8 Turbo engine sets benchmarks in terms of its performance/fuel consumption ratio.

The M Drive function acts as a “memory button” for key driving dynamics, including suspension, stability, steering and throttle sensitivity. Customize these driving dynamics using the iDrive controller by selecting either Normal (default mode) or Sport modes. In addition, Dynamic Stability Control has three modes: Off, Normal and M Dynamic Mode. Once these settings are saved, just press the M Drive button, and they're recalled for driver convenience.

Two highly efficient Twin Scroll turbochargers form the basis of an astonishingly rapid response. A BMW-patented cross-bank exhaust manifold combines the exhaust flows from each of the cylinder pairs (illustration, far left). These are then routed into a channel in the snail-shell-like turbine housings (hence “scroll”), separate from the exhaust flows of the other cylinders, thus enabling them to reach the turbine wheel unimpeded and at high speed (illustration, right).

M-specific spring-damper tuning underpins driving stability and contributes to outstandingly neutral self-steering properties. Depending on the desired tuning mode – for enhanced long-distance comfort or dynamic driving, for instance – you can choose between the two damper settings Normal and Sport by pressing a button on the gear selector lever.

The lightweight high-performance brake system is remarkable for its extremely short braking distances and high stability. Braking power can be finely applied and the system responds to brake commands with total precision. Even at high speeds the deceleration values are impressive.

The groundwork for every M thrill to come: a precision suspension.

From exhilarating cornering to rock-solid stability, when it comes to M high performance, it all starts at ground level. The customized suspensions of the X5 M and X6 M are specially designed to withstand the rigors of track-inspired handling, while serving as a platform for xDrive, BMW's grip-enhancing all-wheel drive. The BMW X5 M and X6 M models are the first M vehicles to feature BMW's intelligent all-wheel-drive system, yet are set up specifically for a rear-wheel bias in dynamic driving situations. The advanced traction system behind this seemingly impossible feat of engineering: Dynamic Performance Control. Designed to retain the

sporty, rear-wheel-drive feel of M vehicles, Dynamic Performance Control knows precisely when and where to deliver lateral power to all wheels, for the most athletic driving response in any situation. Particularly during cornering, more power is transferred to the wheels with the most traction, so that the X5 M and X6 M handle more like sports cars half their size. Another innovative addition is Adaptive Drive, which governs and adjusts, among other parameters, roll stabilization and Electronic Damping Control (EDC). Push the X5 M or X6 M to the limit, and the negative effects of g-forces associated with sharp turns, fast braking and other M-type driving

actions are minimized. Each of these systems is designed to work together seamlessly, and many settings can also be adjusted individually – for example, you can control the degree of damping via the EDC button next to the gear lever. And when it's time to really put these models through their paces, simply press the M Drive button on the steering wheel, and your preferred presets for suspension, steering, throttle sensitivity and more are instantly recalled. Discover a fully customizable driving experience that responds to your style – in fact, the control functions of Dynamic Stability Control (DSC) will only intervene in hazardous situations.

Born in the minds of racing enthusiasts. Perfected on the track.

In 1978, the first BMW M model – the legendary M1 – became the fastest German road sports car. Since that time, BMW’s philosophy of combining racetrack thrills and everyday driving has been built into every M vehicle created. From advanced

high-performance engines and sport-tuned suspensions, to luxurious handcrafted interiors and exclusive design details, each M model is a cutting-edge execution of what we’ve learned on the track – and what we’re most passionate about. No wonder, then,

that all M vehicles – including, of course, the X5 M and X6 M – are rigorously tested on tracks like the notorious Nürburgring Nordschleife. It’s how we’ve turned high-performance dreams into reality, for more than three decades.

The following pages show available colors and materials for the BMW X5 M and BMW X6 M. Use these samples to compare paint, upholstery, trim colors and combinations. Please note that these samples are printed representations; they are not exact reproductions. To see the actual colors, visit your local BMW SAV® center. They will be happy to show you original samples and assist you with special requests. All paint colors are standard on the X5 M and X6 M.

Taking it to the next level: BMW M School.

M School, located at the BMW Performance Center in Spartanburg, SC, teaches you what high-performance driving is all about. How to slalom. How to drift. How to push an Ultimate Driving Machine® to the limits. With confidence. You'll learn under the expert guidance of professional driving instructors, while having the time of your life. Get your fill of aggressive handling techniques and advanced braking skills in your choice of One-Day or Two-Day M Schools.

Once you graduate, treat yourself to two full days of Advanced M School. Our professional instructors will teach you things in BMWs that seem to defy physics. We'll take you to Virginia International Raceway, where you'll corner, brake, accelerate and then do it all again. In BMW M Cars. Learn highly technical driving techniques and how to control power. Expect lots of speed. It's intense. It's Advanced M and it's not for everyone.

BMW Ultimate Service™

At BMW, we believe that a premium ownership experience should feature performance and luxury, as well as safety and convenience. We believe you should be able to drive a BMW to its potential, while enjoying peace of mind and reduced cost of ownership. That's the idea behind BMW Ultimate Service: a suite of comprehensive programs and services that are included in every 2009 and later model year vehicle. The New Vehicle Limited Warranty, the BMW Maintenance Program, Roadside Assistance and BMW Assist™ with TeleService come standard. BMW Ultimate Service starts with the **New Vehicle Limited Warranty**, providing you with coverage for the first four years or 50,000 miles, whichever comes first. Additionally, you have 12-year, unlimited-mileage warranty protection against corrosion and rust perforation.² **BMW Maintenance Program** is one of the most comprehensive maintenance programs in its class. We cover all factory-recommended maintenance during the New Vehicle Limited Warranty coverage period. This includes scheduled oil services and inspections. Also covered is the replacement of items that are subject to normal wear and tear, such as brake pads, wiper blade inserts and engine drive belts.³ And, thanks to BMW's advanced engineering, most owners enjoy a well-balanced maintenance schedule, with flexible routine service intervals that can save you time. When your vehicle requires attention, your authorized BMW or BMW SAV® center ensures that it receives only genuine BMW parts ☑ your assurance of exacting quality standards.

BMW Roadside Assistance is provided free of charge for the first four years ☑ with no mileage limit. Call **1-800-332-4BMW (4269)** for friendly on-the-road help, 24/7, anywhere in the United States, Canada and Puerto Rico. This includes everything from flat-tire changes, emergency gasoline and lock-out service, to towing, alternative transportation and even trip-interruption benefits. This service also provides valuable trip-routing advice.

The **BMW Assist™** Safety Plan⁴ is included with BMW Ultimate Service for the first four years ☑ with no mileage limit, at no cost. You'll enjoy peace of mind knowing that a friendly response specialist is there to help you, 24/7, at just the push of a button. The Safety Plan includes Automatic Collision Notification, Emergency Request, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery and Customer Relations. MyInfo allows you to send business locations and street addresses with their associated phone numbers from the Google Maps™ website directly to your BMW. The destination can be sent to your Navigation system for turn-by-turn directions, and you can call the destination via your Bluetooth® linked cell phone. And for the ultimate in coverage, add the optional **Convenience Plan**.⁵ You'll enjoy unlimited access to personalized Directions, Traffic and Weather reports, as well as our Concierge feature, which can send a destination address and phone number, such as a restaurant or hotel, right to your BMW. You can make up to four operator-assisted calls per year with Critical Calling if your cell phone is not available, or if its battery is discharged. BMW Search allows online access to up-to-date fuel prices and the latest weather forecasts, as well as Bloomberg's stock indices and the powerful reach of the Google Maps™ database ☑ delivered to the iDrive display right inside your vehicle.

BMW's unique **TeleService**, included in the BMW Assist Safety Plan, continually monitors specific parts that are subject to wear and tear ☑ including the engine oil, micro-filter, spark plugs, brake linings and various fluids ☑ as well as services that require attention at regular intervals, such as vehicle service inspections. This data is automatically transmitted to your BMW center, which will then call you to schedule a service appointment. You don't have to keep track of when your vehicle requires routine maintenance. An added benefit: any needed maintenance service parts will already be on hand, so your BMW is serviced and returned to you as quickly as possible.

BMW and the environment.

BMW is a strong proponent of the environment and social responsibility. It is important to manage the earth's resources responsibly, and not jeopardize the needs of future generations. That is why BMW makes vehicles that minimize adverse environmental impact, from production (pollution prevention and waste minimization at the plant) through owner use (low emissions) to eventual disposal (easy drainability of all fluid-related components and easy neutralization of all pyrotechnic devices).

This effort has been recognized worldwide and, as a result, we are pleased to have received numerous environmental honors. In the U.S., for example, the Environmental Protection Agency accepted BMW's Spartanburg, SC production and manufacturing facility as a charter member of the agency's National Environmental Performance Track. Internationally, BMW AG – the parent company of both BMW of North America and BMW Manufacturing Co., Spartanburg, SC – was the first automotive company to be represented on the Dow Jones Sustainability Group Index, and has remained on the Index ever since. At BMW, we strive for high performance in everything we do.
