WHEN WE INNOVATE, THE CAR IS NOT TOP OF MIND.

We admit it. You fascinate us. We think and talk about you all day. Everything about your life – its ups and downs, joys and disappointments, needs, demands, frustrations and hopes – captivates us.

So when we innovate, every detail – from service design right down to the smallest screw – has to justify itself to you. Does it add anything? Is it useful?

We know you always want to feel in control. Our IntelliSafe technologies not only help to save lives, but also give you more enjoyment behind the wheel.

We know you want to stay connected to the world around you. Our Sensus solutions ensure you are.

We also know you care about the future of the planet. That's why our Drive-E technologies allow you to drive sustainably – without compromising on performance.

And we know you're interested in self-driving cars. Each day we take pioneering steps in our quest to deliver a safe and relaxing autonomous driving experience. The same goes for fully electrified powertrains. And even smarter services.

We happily walk the extra mile to give you what you want.

At Volvo, everything we do is designed around you.

You are why we innovate.

INFORMED, IN CONTROL AND ALWAYS UP TO DATE

Volvo Sensus has a guiding principle – to make your life easier and more enjoyable, whether it's your comfort, entertainment or navigation requirements. Sensus connects you with your Volvo and the rest of the world. It keeps you informed, entertained and in control of every journey.

Intuitive, easy-to-use controls and displays are prime features of Sensus. Our digital driver displays provide instant, intuitive information, and can be adapted to the mood you're in. And in all of our models you will find most controls on the 9" Sensus Touchscreen. Replacing physical buttons with virtual equivalents on the screen allows them to be large and easy to use. Bold, clear graphics make it easy to absorb information at a glance. Our philosophy has always been that you should be able to operate your Volvo and keep your eyes on the road. The optional Graphical Head-Up Display in some of our models means you can do just that while staying connected and informed. Natural speech voice control is another feature that allows you to conveniently control the functions of your Volvo while keeping your attention on the traffic.

And our Sensus Connect goes further, with Wi-Fi keeping your devices connected to the internet, while a host of built-in navigation and entertainment apps give you access to a world of online music, entertainment and services.

A superb audio experience is also part of Sensus. That's why we've designed our state-of-the-art audio systems, developed together with the renowned sound specialists at Harman/Kardon® and Bowers & Wilkins®. These high-end audio systems are designed to put you at the heart of the music, allowing you to hear it as the musicians intended – wherever you're seated.

The Volvo On Call smartphone app gives you access to a range of smart services that make life easier. It also allows you to remotely access and control your Volvo from your smartphone, tablet or a wearable device. For example, you start your car remotely, lock or unlock your car, check car status and send destinations directly to the Sensus navigation system. Inside and out, we designed the Sensus experience to make your everyday life a little less complicated, and enrich every moment that you spend in your Volvo.

Some of the Sensus technologies described above may not be available for all Volvo car models. For more information about the specifications for each model, variant and trim level, please talk to your Volvo dealer or visit VOLVOCARS.COM/US

DESIGNED TO MAKE DRIVING SAFER AND EASIER

IntelliSafe is our name for the intuitive, intelligent technologies that support your driving, help prevent accidents and help protect you in a collision. City Safety is at the heart of IntelliSafe. It's like a copilot that looks out for you and can brake automatically if needed to help avoid a collision with, for example, a slower moving vehicle in city traffic. To support your drive at higher speeds, our collision avoidance innovations also include technology that can detect danger ahead, then warning you and intervening if necessary. This technology can identify other vehicles, pedestrians, cyclists, and large animals ahead of you, even at night. It can warn you of hazards and, if you don't react, it can brake automatically to help you avoid or mitigate a collision. And our advanced Oncoming Mitigation by Braking technology – a Volvo safety world first – can detect if there's another vehicle driving towards you, and brakes automatically to help mitigate the impact.

Journeys are more enjoyable with IntelliSafe to support you. To help you stay in the lane, our Lane Departure Warning or Lane Keeping Aid technology will alert or intervene if you unintentionally cross a lane marking. And our Pilot Assist drive technology allows you to enjoy a smooth drive on highways. It assists you to comfortably follow the traffic flow, and provides gentle steering support to help you keep within the current lane.

Oncoming Lane Mitigation can help avoid collisions with oncoming vehicles. If you drift across the lane markings in the way of an oncoming vehicle, your car steers back. Run-Off Road Mitigation steers and, if necessary, brakes for you to help prevent you leaving the road accidentally. Driver Alert Control can recognize if you're tired or distracted, and suggests that it's time to take a break, while Road Sign Information helps remind you of the speed limit, for example.

Add IntelliSafe Surround and get BLIS™ – blind spot information for increased awareness and confidence on the highway, alerting you to vehicles alongside you. And when you're reversing out of a parking space, Cross Traffic Alert keeps an eye out behind your Volvo for other road users.

With IntelliSafe, your Volvo supports your drive all the way. All you need to do is keep your hands on the wheel and enjoy the experience.

Some of the IntelliSafe technologies described above may not be available for all Volvo car models. For more information about the specifications for each model, variant and trim level, please talk to your Volvo dealer or visit VOLVOCARS.COM/US

ENJOYING MORE, USING LESS

With the perfect balance between performance and efficiency, every Volvo engine gives you on-demand power with low fuel consumption and emissions. We achieve this with Drive-E, the cutting-edge technology behind every one of our advanced gasoline and plug-in hybrid powertrains, where performance and efficiency are built in.

We've mated our turbocharged, low-friction, light-weight powertrains with Geartronic™, our 8-speed automatic gearbox, which is designed to minimize power loss and maximize performance.

To help you drive more efficiently, select Eco mode and your Volvo recalibrates the powertrain for the lowest possible fuel consumption and emissions. For a sporting drive, with faster throttle response and gearing, select dynamic mode or create your own ideal driving experience with individual mode.

And if you want the best of both worlds, our high-performance Twin Engine powertrains with plug-in

hybrid technology give you an involving drive, as well as cutting CO² emissions.

The combination of a high-performance gasoline engine and a powerful electric motor offers impressive power and performance, but uses much less fuel. The gasoline engine drives the front wheels and the electric motor powers the rear, giving instantaneous acceleration and on-demand All-Wheel Drive. And with just the electric motor powering the car, you benefit from silent, zero-emission driving and an electric-only range which is ideally suited to daily commuting.

At Volvo Cars, by looking to the future we enhance your life today. Drive-E brings together advanced technologies to create a better world and a better drive for you.

Some of the Drive-E technologies described above may not be available for all Volvo car models. For more information about the specifications for each model, variant and trim level, please talk to your Volvo dealer or visit VOLVOCARS.COM/US

THE VOLVO S90

Where elegance complements technology

When we designed our flagship sedan, we had a single aim: to create a car that would redefine the idea of luxury. The result is the Volvo S90, a car that blends the best of Scandinavian design with advanced technology to give you an intuitive experience, with the accuracy afforded by fine engineering. A new kind of luxury. Swedish luxury.

From any angle the S90 looks elegant and powerful. The short overhangs, long wheelbase and low roofline combine

to create a solid, sculpted whole that is always sophisticated and elegant. It's the embodiment of a design philosophy that extends inside the car, where you'll discover a cabin crafted from exceptional materials such as Perforated Fine Nappa Leather, Swedish Crystal and Linear Walnut.

Elegance, craftsmanship and technology. This is what the S90 is made of.

THE VOLVO S60

Dare to stand apart

Rediscover the thrill of driving with the Volvo S60, the powerful, athletic and dramatic sedan designed to make every journey enjoyable – from the briefest of commutes to the most epic of road trips.

To Volvo Cars, building a car that's great to drive means balancing dynamism with comfort. It has to feel responsive, and yet it must maintain its poise at all times.

And that's exactly what we have achieved with the S60. What's more, it does so with a focus on refinement

throughout. The cabin is fashioned to smooth away the miles. Scandinavian design and Swedish craftsmanship combine to create a cabin focused on putting you in control, made from beautiful materials. Technology that's so intuitive it makes every journey easier. And an exterior that will turn heads.

Confident and elegant, the S60 is built to inspire every journey. Feel the connection.

VOLVO ON CALL

Your personal assistant

The Volvo On Call app connects your car with the rest of your world, helping make life less complicated. It's there when you need it, so your car becomes more than just a means of travel – it's your personal assistant.

You can use it to make your car ready for the drive to the office, or the drive home, by remotely cooling or heating the cabin. It can help you find a parking space, then take you straight to it. You can sync your Volvo On Call app with your calendar, so if you've got appointments it will tell your car where they are and how to get there. And it keeps you safe, automatically contacting emergency services if you're involved in an accident and telling them where you are.

YOUR DAY MADE EASIER WITH VOLVO ON CALL

From saving you time in the morning to helping you relax on the way home, Volvo On Call becomes an indispensable part of your daily routine.

THE PERFECT START

When you get into the car in the morning it's warm and defrosted, thanks to the Volvo On Call app's remote start function.

7:30 am

WHERE TO NEXT?

A calendar card shows your next meeting. You push a button in the app, sending the address to the car's navigation system.

12:00

FIND YOUR CAR

You've forgotten where you parked, so you use the car locator map to find the street and then use the flash lights function to pinpoint the car.

DELIVERIES TO YOUR CAR

The shoes you ordered yesterday using In-Car Delivery are delivered to the trunk of your Volvo.

You get a notification that your order has been delivered to your car.

1:00 pm

REMOTE CONTROL COMFORT

You set the remote start function to automatically warm the car interior so it's ready for when you leave the office.

5:15 pm

WI-FI ON THE GO

You head for home. Using the Wi-Fi hotspot, you can stream music via your phone to the car's audio system.

10:20 pm

READY FOR A NEW DAY

A notification reminds you that you've got a meeting in the morning. You send the location to the Sensus Navigation system so you are ready to go in the morning.
