Its most impressive feature? Fun.

In the 2015 Yaris, the urban landscape is officially your playground. Whether it's transporting that new bookcase to your apartment, or your friends to the beach, every detail has been carefully considered to make driving easier and more enjoyable than ever. Yaris is optimized for city driving, and both the 3- and 5-door models offer impressive fuel efficiency, a small turning circle (9.6 m on LE and CE models), incredible handling, and a low centre of gravity for added agility.

Bold improvements have been made to the compact exterior with an eye-catching front and back end design, leaving Yaris with a powerful stance. And just as much thought has been put into the actual driving experience. Redesigned front seats with a wider cushion and higher seat side cushions provide extra comfort for those extra-long trips. For added handling and smoothness, we've also redesigned the rear suspension with a new stiffer torsion beam, and softer coil springs in the front and rear.

Though there are many new improvements to this year's model, we haven't sacrificed the outstanding reliability that Yaris is known for, proven by the fact that over 85% of Toyotas sold in Canada in the last 20 years are still on the road today*.

*Based on IHS Automotive: Polk Canadian vehicles in operation and new registrations MY 1995-2014 as of June 30, 2014.

The closer you look, the bigger it gets.

Just like you, Yaris is up for anything. It's designed to adapt to your ever-changing adventures, thanks to a wider rear hatchback door that makes loading and unloading your stuff that much easier. Drop the available 60/40 split fold-down rear bench seat to create a surprisingly spacious cargo area. Everywhere you look, you'll find plenty of storage including door pockets, front and rear cupholders, and even a large compartment in the centre console.

Be a driver, a DJ, and a genius.

Yaris allows you to stay connected in more ways than one. The easy-to-read multi-information LCD display provides important data including outside temperature, fuel efficiency, and trip information. There's also the ECO-drive indicator (Automatic only) that helps monitor your fuel consumption so you can adjust your driving habits. Yaris SE is also equipped with cool features like easily accessible steering wheel audio controls that give you total command of your driving soundtrack. The Display Audio System⁴ with touch-screen and Bluetooth^{®3} wireless music streaming allows you to stay connected so you can control every last detail of your trip – because isn't that the way it should be?

It's fun, yes. But it's serious about safety.

Peace of mind comes naturally with the 2015 Yaris, thanks to a host of the most advanced active and passive safety features in the industry. To help protect occupants during front, rear, or side collisions, Yaris is designed with an impact-absorbing body structure that efficiently distributes impact energy, along with a high-strength body framework that reduces cabin deformation. So whether you're cruising the streets with friends or heading out of town with family, you can always feel confident about the drive.

AVAILABLE PROJECTOR-STYLE HALOGEN HEADLAMPS On the SE model, projector type halogen headlamps have been adopted for the low/high beams to enhance luminous intensity distribution performance.

NINE AIRBAGS¹ Yaris is compact, but you'll still find 9 standard airbags throughout the vehicle: driver and front passenger airbags, a driver's knee airbag, front and rear side curtain airbags, driver and front passenger seat-mounted side airbags, and driver and front passenger seat cushion airbags.

ANCHOR POINTS FOR CHILD RESTRAINT SEATS With lower anchors on the outboard rear seats and tether anchors on all second-row seats, you can now securely install a child seat with ease.

STAR
SAFETY SYSTEM™

VSC VEHICLE STABILITY CONTROL

Helps prevent slips and loss of traction by reducing engine power and applying the brake force to the wheels that need it.⁶

TRAC TRACTION CONTROL

Helps maintain traction on wet, icy, loose or uneven surfaces by applying brake force to the spinning wheel(s).

ABS ANTI-LOCK BRAKE SYSTEM

Prevents brakes from locking up by "pulsing" brake pressure to each wheel to help you stay in control in emergency braking situations.

EBD ELECTRONIC BRAKE-FORCE DISTRIBUTION

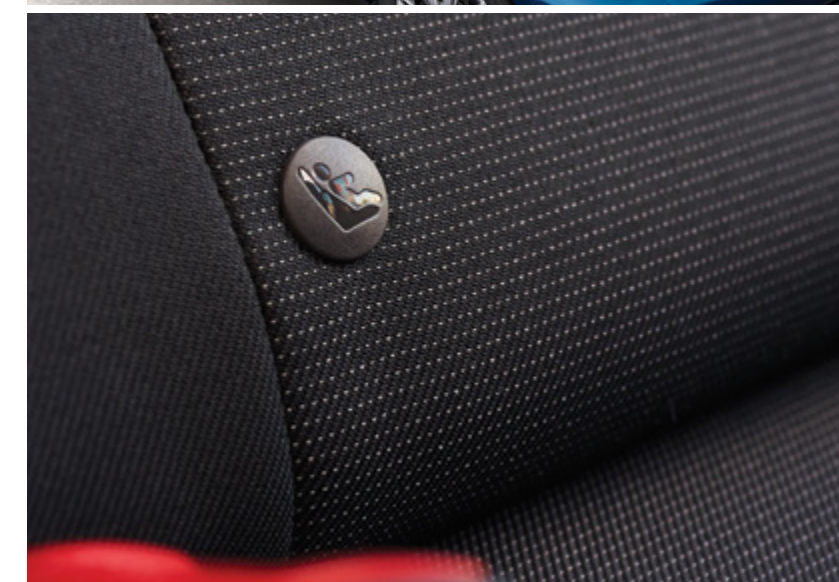

Redistributes brake force to help keep the rear wheels from locking up during sudden braking situations.

BA BRAKE ASSIST

Detects sudden or "panic" braking and adds the full pressure needed to help prevent a collision.⁷

SST SMART STOP TECHNOLOGY

Smart Stop Technology is designed to reduce engine power when the brake is firmly applied helping to bring the vehicle to a stop, even if the accelerator pedal is fully depressed.⁸

Nothing is more important than the safety of you and your family. And that’s why every 2015 Toyota vehicle comes standard with the Star Safety System™. It integrates an array of active safety technologies that work together to protect occupants by helping drivers avoid accidents in the first place. Safety is our number one priority and that is why Toyota was the first manufacturer to make all of the elements of the Star Safety System™ standard on every new vehicle. No matter which Toyota you choose, you’ll know it comes with peace of mind built right in.

Committed to Canadian Communities

Being a leader in the automotive industry does not simply start and finish with making great vehicles. It also means being a leader in the community. Toyota Canada and its dealerships across the country support non-profit programs that work to make a difference for Canadians in areas of environment, safety education and quality.

Together with Evergreen, we established the Toyota Evergreen Learning Grounds program, designed to transform Canadian school grounds into natural learning environments so students can have a healthy place to play, learn and develop a genuine respect for nature. Toyota also supports kartSTART, a program educating Canadian youth about vehicle safety in vehicles that fit them, go-karts. As part of our ongoing commitment to innovation, Toyota’s Collaborative Safety Research Center is partnered with the University of Toronto in a study, designing feedback (alerts) in vehicles to help induce safer driving behaviours.
