Loaner cars are available by reservation only. See Service Advisor for details.

RENTAL CARS

Rental cars are available through local vendors.

EARLY BIRD/AFTER HOURS DROP OFF

As a courtesy to our customers, an early bird/after hours drop off is located next to the front of the carport on the service drive.

IT'S MORE THAN JUST OIL.
IT'S LIQUID ENGINEERING.™

ABOUT THIS GUIDE

This Maintenance Guide was specifically prepared to assist you with the recommended servicing of your new automobile. You should note that this maintenance schedule is more detailed and calls for more frequent servicing than your warranty & maintenance booklet specifies. We have found this schedule to be more suitable for the wide range of climatic and driving conditions that our customers encounter in the New England area.

Please present this booklet whenever you bring your vehicle in for regular maintenance or for repairs. Your maintenance schedule will help us to expedite the processing of your repair order and will allow us to validate the book with our dealer stamp as servicing is done. Accurate record keeping and regular maintenance will help to increase the future trade value of your vehicle and insure you many miles of trouble-free driving.

NOTICE: THE RECOMMENDATIONS IN THIS MAINTENANCE GUIDE EXCEED THE MANUFACTURER'S REQUIREMENTS.

We make these suggestions because of the general driving conditions that exist in the New England area and in the belief that your Subaru and you will benefit from taking extra steps in maintenance. However, should you desire to only meet the basic manufacturer's maintenance requirements as set forth in the MANUFACTURER'S WARRANTY & MAINTENANCE BOOKLET, be assured your wishes will be adhered to and your warranties will remain valid. If you have any questions concerning the suggested service program related to your Subaru, please do not hesitate to contact us. Burlington Subaru reserves the right to change or discontinue, at anytime, parts and/or services contained in this Maintenance Guide without notice.

***Examples of severe driving conditions:** Repeated short distance driving; Driving on rough and/or muddy roads; Driving in dusty conditions; Driving in extremely cold weather; Driving in areas where road salts and other corrosive materials are used; Living in coastal areas; Repeated trailer towing.

Dear Valued Customer,

Welcome to Burlington Subaru Service and Parts Department.

This guide is intended to provide you with a clear, concise schedule for maintaining your Subaru vehicle. Following these recommendations will ensure that your vehicle stays in optimum condition and that your ownership experience is a pleasurable one.

It is our goal to deliver quality care at its very best. We install only Genuine Subaru Parts using state-of-the-art equipment. We promise accurate diagnosis and repair. Our dedicated, highly-skilled Advisors and Technicians are committed to providing informed, accurate answers to your questions.

We want to achieve your complete satisfaction by providing the most convenient, efficient and pleasurable service you have ever experienced. It is our mission to make you a customer for life.

Thank you again for choosing Burlington Subaru. We look forward to meeting all of your Subaru ownership needs.

Respectfully,

William S. Hunter
Service Director

PARTS & SERVICE

ADDITIONAL RECOMMENDED SERVICES

ENGINE FLUSH SERVICE

Frequent oil and filter changes are highly recommended, and for good reason. The lubricating properties of oil enable it to protect the metal and moving parts throughout your vehicle's engine. However, regular oil changes do not go far enough. A typical oil change is not able to remove all of the oil from the engine. As a result, such elements as sludge, metal fragments and contaminants remain trapped inside. Our Complete Engine Flush Service uses a powerful cleaning solution that is designed to rid your engine of harmful particles. We then replace the oil and filter and add a special conditioner to protect against contaminants. The goal is a smoother running engine and extended engine wear. The frequency of this service can vary depending on local traffic conditions and personal driving habits. Your service advisor can help you determine the interval that is right for you.

FUEL INJECTION FLUSH SERVICE

The fuel injector is an electronically controlled valve responsible for supplying an even flow of fuel to your vehicle's engine. The injectors spray directly into the intake valves, and it is critical that this spray is as fine a mist as possible, so that the fuel will burn more easily. When fuel injectors become dirty or clogged, your vehicle can experience problems ranging from surging and hesitation to hard starting. Utilizing our specialized equipment, one of our highly trained Technicians will clean your vehicle's fuel injectors with a specially formulated solvent that flushes out unwanted particles and deposits, enabling your vehicle's fuel injectors to deliver a fine, even spray. This service not only can improve driveability and restore horsepower, but it can also improve fuel economy.

Dirty Fuel Injector

Clean Fuel Injector

THROTTLE BODY SERVICE

The light turns green, you depress the accelerator, and your vehicle... stalls. You are frustrated, and so are the motorists blaring their horns behind you! If your vehicle is experiencing stalling or hesitation, it is likely due -- at least, in part -- to improper maintenance of the throttle body. In today's fuel injected engines, the throttle body is a device that controls the amount of air flow to the engine. Over time, dirt and gum can gradually accumulate in the throttle body. A portion of this debris is airborne dirt that makes its way through the air filter, but most of it results from oil and combustion gases coming from the engine as the intake valves open and close. As part of our Complete Throttle Body Service, one of our skilled Technicians will thoroughly clean the throttle body using highly specialized chemicals. This cleaning will protect the throttle body and ensure that it works in proper unison with the intake valves and fuel injectors.
