CHEVROLET

SIX

Chevrolet Dealers:

When you start from a position of strength, the bar gets raised to unimaginable new heights. That's exactly what happened when we designed and engineered the sixth-generation Camaro — the sports car that builds off the legendary DNA of America's best-selling performance car for five consecutive years.

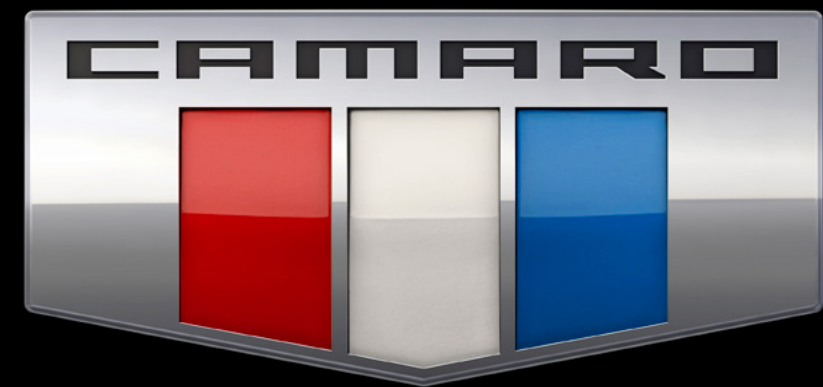

The sixth-generation Camaro establishes a new benchmark of performance — performance that has evolved over the past five, historic Camaro generations. The 2016 Camaro brings an evolutionary look that stays true to its roots but possesses tighter curves, an aerodynamically optimized design and new modern lighting technologies. A faster, more nimble driving experience enabled by an all-new lightweight architecture will keep it the dominating force that it is in the sports car segment. Inside, it's been redesigned with refinement, convenience and technology features that all add up to bring a thrilling experience behind the wheel. In addition, six different powertrain combinations expand the Camaro performance range.

The following pages will introduce you to the all-new 2016 Camaro. We're excited to help you get ready to support the launch of this sixth-generation icon. Start of production is currently scheduled for Q4 of 2015.

Thank you for your continued support in returning Chevrolet to sales leadership.

Vice President, Chevrolet

THE SIXTH-GENERATION CAMARO

ALL NEW FROM THE INSIDE OUT

The 2016 Camaro promises to be everything its loyal enthusiasts expect and more. Although it benchmarked its Camaro predecessor as a starting point (the number one selling car in the sports car segment), only two parts will carry over from the fifth generation – the bowtie emblem and the SS badge.

LIGHTER, LEANER AND FASTER

A faster, more nimble driving experience is enabled by an all-new lightweight architecture and 2.0L Turbo¹, 3.6L V6 and 6.2L V8. In addition, new technologies like Active Rev Matching (SS with manual transmission only), Driver Mode Selector and Magnetic Ride Control™ (SS models) contribute to serious performance.

MORE INNOVATION AND REFINEMENT

The ultimate in connectivity is available on the 2016 Camaro with available wireless charging² for cell phones, new available Interior Spectrum Lighting with 24 different colors and available OnStar® with 4G LTE Wi-Fi³. Inside, it's been redesigned with increased refinement and a new driver-focused design.

A NEW, MODERN DESIGN

The evolutionary exterior of the 2016 Camaro breaks new ground with a new leaner, more athletic and sculpted iconic design – yet still possesses the unmistakable Camaro DNA.

“You should look at a car without any graphics on it and know exactly what it is ... our goal was to build off the design strength of the current Camaro but take it into a new modern direction.”
– Tom Peters, Director of Exterior Design

REFINED AND DRIVER-CENTRIC

The inside of the 2016 Camaro is all new and designed for the high-performance driver with everything in the right place. It incorporates a sophisticated look with high-quality materials and advanced technologies focused on the driver.

“We looked to make a bold move forward and create a modern statement through powerful design, quality materials and advanced technology. The Camaro is all about having fun as a driver and the interior is designed around that.”

– Ryan Vaughan, Design Manager, Camaro Interior

- Instrument panel that's a modern interpretation of the first-generation Camaro
- Center console provides improved storage (with cord pass-through) and range-of-motion for shifting (due to repositioned cup holders)
- Functional air vent control rings provide clever access to HVAC controls and eliminate additional buttons from the IP
- Electronic Park Brake replaces mechanical parking brake handle (to free up room for shifting on manual transmission models)
- Flat-bottom leather-wrapped steering wheel on all models that incorporates paddle shifters (auto) or Active Rev Matching controls (SS manual)
- Seating with aggressive lateral support and available heat and ventilation
- Driver-side knee pads add comfort during spirited or track driving
- Premium materials with major touch points wrapped in soft trim, tailored stitching throughout and real aluminum (select models) in door inserts and shift knob
- Available 8-inch diagonal reconfigurable center screen display in instrument cluster (provides information on navigation, performance and infotainment features)

PERSONALIZATION THROUGHOUT

The 2016 Camaro brings new expressive interior color options along with all-new customizable LED interior lighting.

INTERIOR SPECTRUM LIGHTING

New Interior Spectrum Lighting with 24 different colors includes fade/transition effects that spread across the interior (also includes theatrical “car show” mode). When a new color is selected from the touch-screen, it will appear first on screen and then flow outward on the IP toward the driver-side and passenger doors. Available on 2LT, standard on 2SS.

ALPHA PERSONALITY

The 2016 Camaro is lighter, leaner and faster thanks to General Motors’ Alpha architecture that’s been tailored specifically for a new level of Camaro performance.

“We were able to take the mass efficient and structurally efficient Alpha architecture and develop a new Camaro that keeps the Camaro DNA but takes advantage of the lightweight structure, which allows us outstanding performance ... we’ve created a leaner, faster Camaro.”
— Al Oppenheiser, Chief Engineer, Camaro

2SS preproduction model shown. Actual production model may vary.

- Lighter, stiffer architecture enables an agile, nimble driving experience
- Structural rigidity increased by 28%
- Key components optimized for mass
- Mass reduced by 200 lbs. or more (depending on model)
- New suspension assemblies are 21% lighter
- Lighter, multilink MacPherson strut front suspension with improved steering feel
- Lighter, five-link independent rear suspension for improved lateral control and reduced squat during acceleration
- Six powertrain combinations
 - 2.0L Turbo¹, available 3.6L V6 or 6.2L Direct Injected V8 on SS
 - 6-speed manual (TREMEC® TR6060) or available 8-speed paddle-shift automatic (Hydra-Matic® 8L90)
