### MONITOR YOUR BUSINESS WITH RAM TELEMATICS™

**FACTORY-INSTALLED  
HARDWARE**

**MARKERS AND  
GEO-FENCING**

**EXCLUSIVE RAM  
DIAGNOSTICS**

**ANALYTICS AND  
AUTOMATED REPORTING**

**ADVANCED  
VISUALIZATION**

**ANIMATED VEHICLE  
ROUTE HISTORY**

Ram Telematics™ is a comprehensive set of diagnostics available for all Ram Commercial Vehicles in our portfolio. For fleets of all sizes, it's the way to track expenses, operations and efficiencies.

Engineered specifically for the Ram Brand and powered by Verizon Connect, now available Ram Telematics gives you instant and real-time on-screen monitoring of your vehicle(s); it provides complete visibility of your fleet operations; it communicates essential information about driver behavior,

including seat belt usage, harsh braking, speeding and more. Most importantly, it delivers bottom-line, business-savvy efficiencies with proven return on investment. Tracking nearly 100 mechanical functions, the system helps keep your vehicle in top-notch condition, lets drivers make better decisions and increases uptime. The numbers say it all: **15% greater productivity. 20% more vehicle utilization. 25% less fuel expenses. 30% reduction in idle time. 10% fewer miles driven—and 15% less overtime.\***

# SMART TECH IS HOW WE WORK.

**AN OVERRIDING CONCERN FOR YOUR SAFETY AND SECURITY.** The more technology we put into your Ram truck, the greater the benefit. Case in point and based on model: comprehensive standard and available safety and security features that now include Trailer Reverse Guidance<sup>[22]</sup> Lane Departure Warning<sup>[19]</sup> and Adaptive Headlamps. Illustrated here, left to right: available ParkSense<sup>®</sup> Front and Rear Park Assist<sup>[5]</sup> Forward Collision Warning<sup>[11]</sup> and Adaptive Cruise Control with Stop<sup>[12]</sup> More at [ramtrucks.com/commercial](http://ramtrucks.com/commercial)

A 2021 Ram truck embraces safety and security—and new additions in this area provide greater control and confidence than ever. New available features include:

- ▶ **Forward Collision Warning with Active Braking<sup>[11]</sup>** detects when the vehicle is approaching another vehicle or large obstacle too quickly. It prepares the brakes for emergency braking and visually and audibly alerts the driver (including a quick “brake jerk”). If the driver isn’t braking hard or fast enough, the system will apply the brakes automatically, even bringing the vehicle to a stop if traveling under 31 mph.
- ▶ **Adaptive Cruise Control with Stop<sup>[12]</sup>** This system features full functionality between zero and 100 mph, automatically adjusting the cruise control to a safe distance (selected by the driver) when slower traffic speeds are detected.
- ▶ **Blind Spot Monitoring<sup>[21]</sup> with Rear Cross-Path Detection<sup>[22]</sup>** Available only for Ram 2500 / 3500 Heavy Duty, it uses dual wide-band radar sensors to monitor the pickup’s blind spots and notifies the driver when a vehicle is present—during lane changes, when passing other vehicles or when being passed.

All Ram braking systems feature Electronic Stability Control (ESC)<sup>[9]</sup> ESC<sup>[9]</sup> features multiple assets for braking, including:

- ▶ **All-Speed Traction Control.** If slippage occurs during acceleration, automatic throttle control will reduce torque; in extremes, it will apply the brakes and reduce engine power to maintain control.
- ▶ **Trailer Sway Damping<sup>[9]</sup>** detects yaw and applies the tow vehicle’s brakes to reduce the sway.
- ▶ **Electronic Brake-Force Distribution** regulates brake pressure to minimize stopping distances.
- ▶ **Ready Alert Braking** senses when the driver’s foot is lifted from the accelerator; it applies an imperceptible brake force to ensure that pads and discs are lined up should an emergency stop be required.
- ▶ **Rain Brake Support** automatically activates when the windshield wipers engage; brake calipers pulse against their rotors to remove water from the pads.
- ▶ **Hydraulic Boost Compensation.** Should a failure occur in the vacuum brake booster or any related line, the brake controller will run the ABS pump and convey the problem to the driver. The brakes perform as normal until the failure is serviced.
- ▶ **Hill Start Assist.** On an incline, this system keeps the vehicle stationary for two seconds after release of the brakes or until the accelerator is depressed.

- ▶ **ParkSense Front and Rear Park Assist<sup>[5]</sup>** Available. It detects objects as far as 47 inches away from the bumpers; read-outs located in the gauge cluster display team up with audible chimes to notify the driver of proximity to front and/or rear objects.

\*Payload and Max Trailer Weights are ESTIMATED values. All values are shown in pounds unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. GAWRs, GVWRs and GCWRs should never be exceeded. Upfit or aftermarket equipment weight not included in Base Weight. Recommended tongue weight determined by class of hitch receiver and hardware limits of upfit. Frontal Area: maximum allowable Frontal Area, in ft<sup>2</sup> that the vehicle can project. For details on calculations, please refer to Ram Body Builders Guide. If VECI Label and Max Upfit Weight not available: vehicle is not restricted to MCVW, Frontal Area or Maximum Upfit Weight limits; however, GVWR/GAWR/GCWR cannot be exceeded.
