

MOUNTAINS TO SOUND GREENWAY

The Mountains to Sound Greenway encompasses over 1.5 million acres of connected natural lands and vibrant urban areas surrounding I-90 between Puget Sound and Central Washington. The Greenway conserves a shared heritage of working farms and forests, parks, sustainable communities and abundant outdoor educational and recreational opportunities.

This map illustrates that the Mountains to Sound Greenway is bounded by major watersheds, framed by the urban areas of Seattle and Ellensburg and woven together by the interstate highway and an extensive network of trails that link the public to the Greenway landscape.

The information included on this map has been compiled from various sources and is subject to change without notice. While not guaranteed, every attempt has been made to present the information accurately and completely. March 2011, HEARTLAND
