

BEYOND THE FUTURE WARRANTY

The Best Warranty in the Industry!

Corrosion FREE Formula with CSC 850 takes over where other treatments left off.

The **Corrosion FREE** Warranty Program is designed to offer maximum corrosion protection within a disciplined maintenance program for vehicle owners who want to keep their vehicles structurally sound and free of damage caused by rust and corrosion. If the customer follows the program and the required application cycles, **Corrosion FREE** of North America Inc. will authorize and arrange, at its expense, for the repair or replacement of body panels or structural frame members weakened by corrosion or rust.

When applied by an authorized "Factory Certified" **Corrosion FREE** dealer, the warranty covers the vehicle body structure including the roof and floor pan. It is understood that the Warranty is dependent upon the periodic application of **Corrosion FREE**'s proprietary formula. **Corrosion FREE** relies upon the customer bringing the vehicle to an approved **Corrosion FREE Zone** facility for inspection and reapplication of the treatment.

SURFACE CORROSION may result from a stone chip or other form of abrasion. For vehicles protected by Formula 3000, the Warranty will apply to the extent described herein. At the first sign of rust or corrosion the customer must return to a **Corrosion FREE Zone** facility where the surface corrosion will be treated on a no charge basis. This service will stop the surface corrosion giving the customer ample opportunity to have the paint damage repaired at his or her expense. **Corrosion FREE** is not responsible for repainting damage caused by paint chipping or blistering.

Corrosion FREE has developed a Computerized Customer Tracking and Reminder System. Customers will be reminded by mail within 30 days of their scheduled reapplication date. Failure to comply with the disciplined maintenance program invalidates the Warranty. Reminders are done as a courtesy, it is understood that compliance is solely the responsibility of the customer.

ACCIDENTS - In the event of an accident, bring the vehicle to a **Corrosion FREE Zone** Dealer for a reapplication of the Formula to the repaired areas. This must be done within 30 days of the repairs being completed as it will keep your vehicle protected and maintain the good standing of the Warranty.

The total liability of **Corrosion FREE** will be limited to the cost of repairs as covered by the Warranty, and the total cost of repairs or replacement shall not exceed the then current cash value of the vehicle. **Corrosion FREE**, under the terms of the Warranty, shall not be responsible for lost time, inconvenience, consequential damage or loss of use of vehicle while being repaired and at its sole discretion may limit the warranty to one claim or refund of application charges.

The certificate is offered in lieu of any and all expressed warranties made with the transaction, and **Corrosion FREE** shall have no further liability whatsoever for damages other than those covered by the agreement.

* Warranty Exclusions:

Paint peeling, blistering, bubbling along seams.

All mechanical parts including but not limited to: Engine oil pans, gas tank sending units, air conditioning/power steering lines, window trim, caulk filled seams and foam filled areas are excluded from warranty coverage.

It is understood that the **BEYOND THE FUTURE WARRANTY** IS SPECIFICALLY TIED TO PERIODIC MAINTENANCE. Defects or recalls covered by the manufacturer's warranty will supersede the herein stated Warranty. Corrosion FREE will monitor manufacturers defects and recalls and attempt to notify customers of any such programs.

RUSTPROOFING

at its
Best!

Corrosion FREE Formula

Corrosion FREE Protection is founded on an outstanding formula that is not tar-like, drippy or messy.

It is a clean, clear odorless solution which protects all metals from corrosion, not just rust. It also stops electrolysis between dissimilar metals.

The **Corrosion FREE** formula is a combination of environmentally sensitive ingredients designed to provide a two edged sword of protection. The first leading edge releases cleaners and corrosion inhibitors which deeply penetrate to displace moisture and terminate corrosion. The second leading edge releases a lubricating film of superior rust and corrosion protection.

Unlike conventional rustproofing, **Corrosion FREE** does not interfere with the natural factory appearance of the vehicle. **Corrosion FREE** treats metal and plastics similar to the benefits provided by skin lotions or conditioners.

The technology behind the **Corrosion FREE** formula is ideal for lubricating the tiniest electronic contact or for searching out and protecting the most difficult to reach moisture trapped seam where crevice corrosion begins.

**NO-DRIP
ECO-FRIENDLY**

Products that drip off your vehicle pollute our environment.

SAY NO TO DRIPS

Everyone's Talking About Corrosion FREE's "Cure for Rust"™

Here are the answers to some of their questions.

What is so Special about Corrosion FREE?

Formula 3000 with CSC850 is clean, clear, dripfree, solventfree, odorfree, non-toxic, a super lubricating metal conditioner with creeping and penetrating benefits - all in one formula. It is not a sealant that traps moisture or an oil spray that rots rubber, damages plastic and tends to be messy and drippy. It contains active moisture displacers that last up to 18 months. Because it is clean and transparent you can actually see it preserving the original 'factory new' appearance. It does not dry out, chip or peel off and its lubricating benefits continue indefinitely.

Will it void my warranty?

Absolutely not! You can understand why manufacturers void warranties, when you have the oil sprays ruining rubbers and the waxy and tar like materials seizing up door locks and window mechanisms. Because Corrosion FREE is an entirely different approach it actually benefits all the moving parts in the hidden cavities of your vehicle. This eliminates annoying electrical malfunctions and makes the vehicle work better and last longer. While the manufacturers probably won't admit it, they just have to love Corrosion FREE because it will reduce the number of corrosion related warranty claims they are obligated to pay. It also saves customers the time and aggravation associated with claims against warranties.

Do you clean the car first?

If your vehicle arrives at a Corrosion FREE Zone with a heavy residue of mud, we would have to wash it before the treatment could be done. We recommend that any heavy accumulation of mud and dirt be pressure washed from the frame and wheel wells before you have Corrosion FREE applied.

Corrosion FREE, the best of both worlds... the Creeps without the Drips!

Formula 3000 with CSC 850 – Corrosion FREE's secret weapon against corrosion. It creeps continuously year round searching for moisture prone crevices, leaving behind a longer lasting corrosion fighting lubricating film. It is totally dripfree, leaving more product on the vehicle. (Reapplications can be extended to 18 months)

Corrosion FREE gives your vehicle the ability to fight back.

Corrosion FREE is designed to penetrate the seams and crevices. It eliminates moisture and maintains a dry Arizona-type condition in the inner panels. That's why vehicles don't rust in the Arizona desert.

And **Corrosion FREE** rustproofing is effective on all vehicles, new, used and antique.

Unlike oil spray applications, **Corrosion FREE** has the ability to cling to the metal, even in high pressure car washes.

The low cost of a **Corrosion FREE** treatment makes a lot of sense and gives customers peace of mind.

At Corrosion FREE, we take our commitment to your vehicle seriously. Not only did we develop the formula, but we also design and manufacture the special equipment to apply the product. You have the assurance of a thorough treatment in all the hidden areas requiring protection.

Our computerized **Customer Reminder** and tracking system reminds you to come back for future applications.
