

Factoids

1. Today's vehicles have more advanced technology than ever before. Safety features like Electronic Stability Control, Collision Sensors and Blind Spot Monitoring help keep you feeling secure. 3-D Navigation, Hands-Free Voice Command systems and Dual Zone Electronic Climate Control systems keep you connected and comfortable. Mopar Vehicle Protection plans provide peace of mind coverage for all of your vehicle's advanced technology systems.
2. Today's vehicles can have as many as 50 microprocessors that communicate over your vehicle's own internal high speed digital networks. Modern technicians must have the tools and training to interpret what your car is saying. Mopar factory-trained technicians speak your vehicle's language.

† About Mopar

First coined in the 1920s to describe the parts and services arm of FCA US LLC, Mopar (short for motor parts) soon became synonymous with automotive performance and racing prowess. Mopar automotive parts are sought after by car enthusiasts around the globe and are used exclusively for all FCA Canada Inc. vehicle repairs.

You own your car – it shouldn't own you.

This brochure is for your general information. Complete details are provided in the Terms and Conditions of the plans. FCA Canada Inc. reserves the right to change or discontinue plans or to change pricing without notice and without incurring obligation.

Life is busy. You're busy. And whether you're ferrying kids back and forth or stuck in traffic, there never seems to be enough time for you – let alone your car.

Maybe that's why regular vehicle maintenance often falls by the wayside. After all, it's easy to put off scheduling a tune-up when you're faced with an increasingly hectic day.

“What's that light on my dash? Did I miss my last service appointment?” You may try to tell yourself that it's probably nothing but...

FCA Canada Inc. Service Contracts provide a new generation of coverage – plans that are responsive to your unique, daily automotive needs, allowing you to drive in complete comfort and security.

But it can be better – much better.

An FCA Canada Inc. Service Contract can help you get the extra care you deserve. While it can't control inflation, or the price of gas, an FCA Canada Inc. New Vehicle Service Contract can protect you from the rising cost of maintenance and mechanical repairs. It can also be rolled into your regular car payments, spreading the costs throughout your ownership period. And best of all, any covered maintenance and repair work features genuine Mopar[®] parts.

FCA Canada Inc. Service Contracts keep us connected to you, our loyal customer, as we strive to build your next vehicle even better.

Get the most out of customer care.

Complete as your manufacturer's warranty is, it might not suit everyone's driving needs, nor does it cover the regular maintenance needed to keep your vehicle in peak condition.

Along with any factory warranty and any applicable statutory warranty, an FCA Canada Inc. New Vehicle Service Contract will customize your warranty from the day of delivery and continue where it leaves off.

Today's vehicles are different. They're more fuel-efficient and technologically advanced. Innovation has spurred the development of intricate parts that are engineered to work together, and one simple repair could lead to an entire system check.

Repair Cost Comparison

Historically, our automotive repair costs have increased each year. This chart projects what repairs might cost without an FCA Canada Inc. Service Contract.

COMPONENT	2014	2017	2020
Engine Overhaul or Replacement	\$7,650	\$8,359	\$9,134
Transmission Overhaul or Replacement	\$8,127	\$8,881	\$9,705
Air Conditioner (Compressor)	\$907	\$991	\$1,083
Body Control Module	\$608	\$664	\$726
Power Window Motor	\$262	\$286	\$313

Prices may vary. The cost of a single repair could be more than the price of your FCA Canada Inc. New Vehicle Service Contract. The cost for 2017 and 2020 was derived by adding a CPI increase of 3% to each year.

Component Coverage

FCA Canada Inc. New Vehicle Service Contracts feature the following Non-Powertrain and Powertrain component coverage:

- Engine
- Transmission
- Electrical
- Steering
- Front and rear-wheel drive
- Four-wheel drive (4x4)
