Safety: 23"

WHEN IT COMES TO WINTER DRIVING, IGNORANCE IS ANYTHING BUT BLISS.

Canadian winters aren't just long and cold, they can be dangerous too. Especially if you're driving with the wrong tires. When the temperature drops to 7°C, regular tires – including so-called “all-season” tires – harden, losing their ability to grip the road as well. That's when the superior adhesion of our winter tires comes in. With their specially formulated rubber compounds, our winter tires can reduce your car's stopping distance by up to 25%. And that can make all the difference. Switch to winter tires, and stop winter – in its tracks.
