

2016 RAM 1500

RAM

CANADA'S LONGEST-LASTING^{1*} MOST FUEL-EFFICIENT LIGHT-DUTY PICKUPS.²

RAM: HIGHEST CUSTOMER LOYALTY OF ANY FULL-SIZE PICKUP.

Only Ram 1500 can make such a bold statement. Numerous best-in-class advantages, segment-exclusive features, bulletproof durability and an unfailing commitment to innovation all translate into the highest customer loyalty in the segment.¹

Canadian TRUCK KING Challenge BACK-TO-BACK WINNER Ram 1500 equipped with the 3.0L EcoDiesel V6 dominated both the 2014 and 2016 Canadian Truck King Challenge, beating out Ford F150 and Chevy Silverado.

The EcoDiesel V6 also makes Ram 1500 the industry's only diesel-powered half-ton pickup³ and the most fuel-efficient pickup in Canada.² Little wonder why Ram 1500 took top honours in the *Motor Trend* 2015 half-ton pickup shootout, and stands in first place as Canada's longest-lasting light-duty pickups.¹

¹Based on third-party Canadian competitive "trade-in" data for MY2008 to September 2015 CYTD new full-size pickups.

BRUTAL TESTING PAYS OFF BIG. THE OUTCOME IS EXCEPTIONAL DURABILITY.

From four-corner shaking machines to boulder-strewn test tracks, we subjected Ram 1500 to far greater challenges than you'll ever attempt. While you'll never put your pickup through the same conditions, it's good to know your Ram could survive the test. There's no compromise when it comes to quality—these are trucks built for the long run.

POWERTRAIN SUPERIORITY AS EFFICIENT AS 8.0 L/100 KM.*

RAM 1500 DELIVERS UNFLINCHING CAPABILITY. Three powerful and capable engines are available on the Ram 1500.

The class-exclusive 3.0L EcoDiesel V6³ delivers **best-in-class** fuel economy as efficient as 8.0 L/100 km (35 mpg hwy)^{2*} and impressive low-end torque that's also **best-in-class**.⁴

As a three time *Ward's* "10 Best Engines" winner,[†] the 3.6L Pentastar™ V6 delivers outstanding fuel economy figures with power to match.

The legendary 5.7L HEMI® V8, with 395 hp and up to 4,826 kg (10,640 lb) of towing capacity,⁵ is a leader in strength and durability.

Available with all three engines is the innovative and refined TorqueFlite® 8-speed automatic transmission.

RAM. HOW YOU MASTER THE CRAFT OF TOWING.

EVERYTHING YOU NEED FOR TOWING. Brawn and brains. Ram 1500 delivers the technology and complete capability for towing:

- Standard Electronic Stability Control (ESC)⁷ system features Trailer Sway Control, which helps stabilize the vehicle against crosswinds and the buffeting from large truck trailers.
- The Tow/Haul Mode, standard on every Ram 1500 transmission, varies the shift patterns to adapt performance for ideal towing.
- Structurally incorporated into the frame, available front tow hooks provide emergency pull-out capability when helping less-capable vehicles out of a jam.
- Other available features such as the Active-Level™ Four-Corner Air Suspension System, the integrated Class IV hitch receiver with 4- and 7-pin wiring harness, and the responsive electronic Trailer Brake Controller, were engineered specifically to help contribute to greater towing confidence and control.

MANAGE IT ALL WITH FINGERTIP EASE. The integrated switch bank is intuitively located on the centre stack and manages a host of standard and available towing and interior features, including Trailer Brake Controller, ESC⁷ system, Tow/Haul Mode, heat and ventilation for seats, heated steering wheel and modes of the Active-Level Four-Corner Air Suspension System.

BRIGHT LIGHTS. BIG TOWING. Ideally positioned in the rear bumper well, the standard 4- and 7-pin trailer connector keeps the connections far from dirt and debris; adjacent illumination makes it a breeze to hitch or unhitch a trailer at night. Providing both pin settings eliminates the need for an adapter or jumper when hauling different trailer setups.

Properly secure all cargo.

ACTIVE-LEVEL™ FOUR-CORNER AIR SUSPENSION.

IT'S RESPONSIVE AND REFINED. AND ONLY RAM 1500 HAS IT.

Master towing, hauling and the off-road, with the class-exclusive Active-Level Four-Corner Air Suspension System³ pioneered by Ram 1500. This available system offers five separate modes of operation keeping your Ram 1500 at the ideal level, maintaining a constant driving profile and ideal headlamp-to-road angle, even while under the heaviest payloads.

Off-road or on difficult surfaces? Two off-road modes help you to master the terrain.

Loading/unloading or getting in or out? The system lowers your Ram 1500, facilitating access to the cargo bed or interior.

On the highway, Aero Mode works automatically, lowering the vehicle for greater fuel efficiency.

OFF-ROAD 2 MODE

+51 mm (+2.0 in.)

+ **OFF-ROAD 2 MODE.** Provides impressive ground clearance for the path and trail and generous angles for approach, departure and breakover.

OFF-ROAD 1 MODE

+30 mm (+1.2 in.) front; +22 mm (+0.9 in.) rear

+ **OFF-ROAD 1 MODE.** Enjoy outstanding ride balance, with an extra degree of clearance when off-road scenarios are less severe than Off-Road 2 Mode requirements.

NORMAL RIDE HEIGHT

NORMAL RIDE HEIGHT. The most comfortable balance of ride and handling for everyday driving.

AERO MODE

-27 mm (-1.1 in.)

- **AERO MODE.** At highway speeds, the Aero Mode automatically lowers the vehicle, reducing aerodynamic drag and "body roll," and improving fuel efficiency.

ENTRY/EXIT MODE

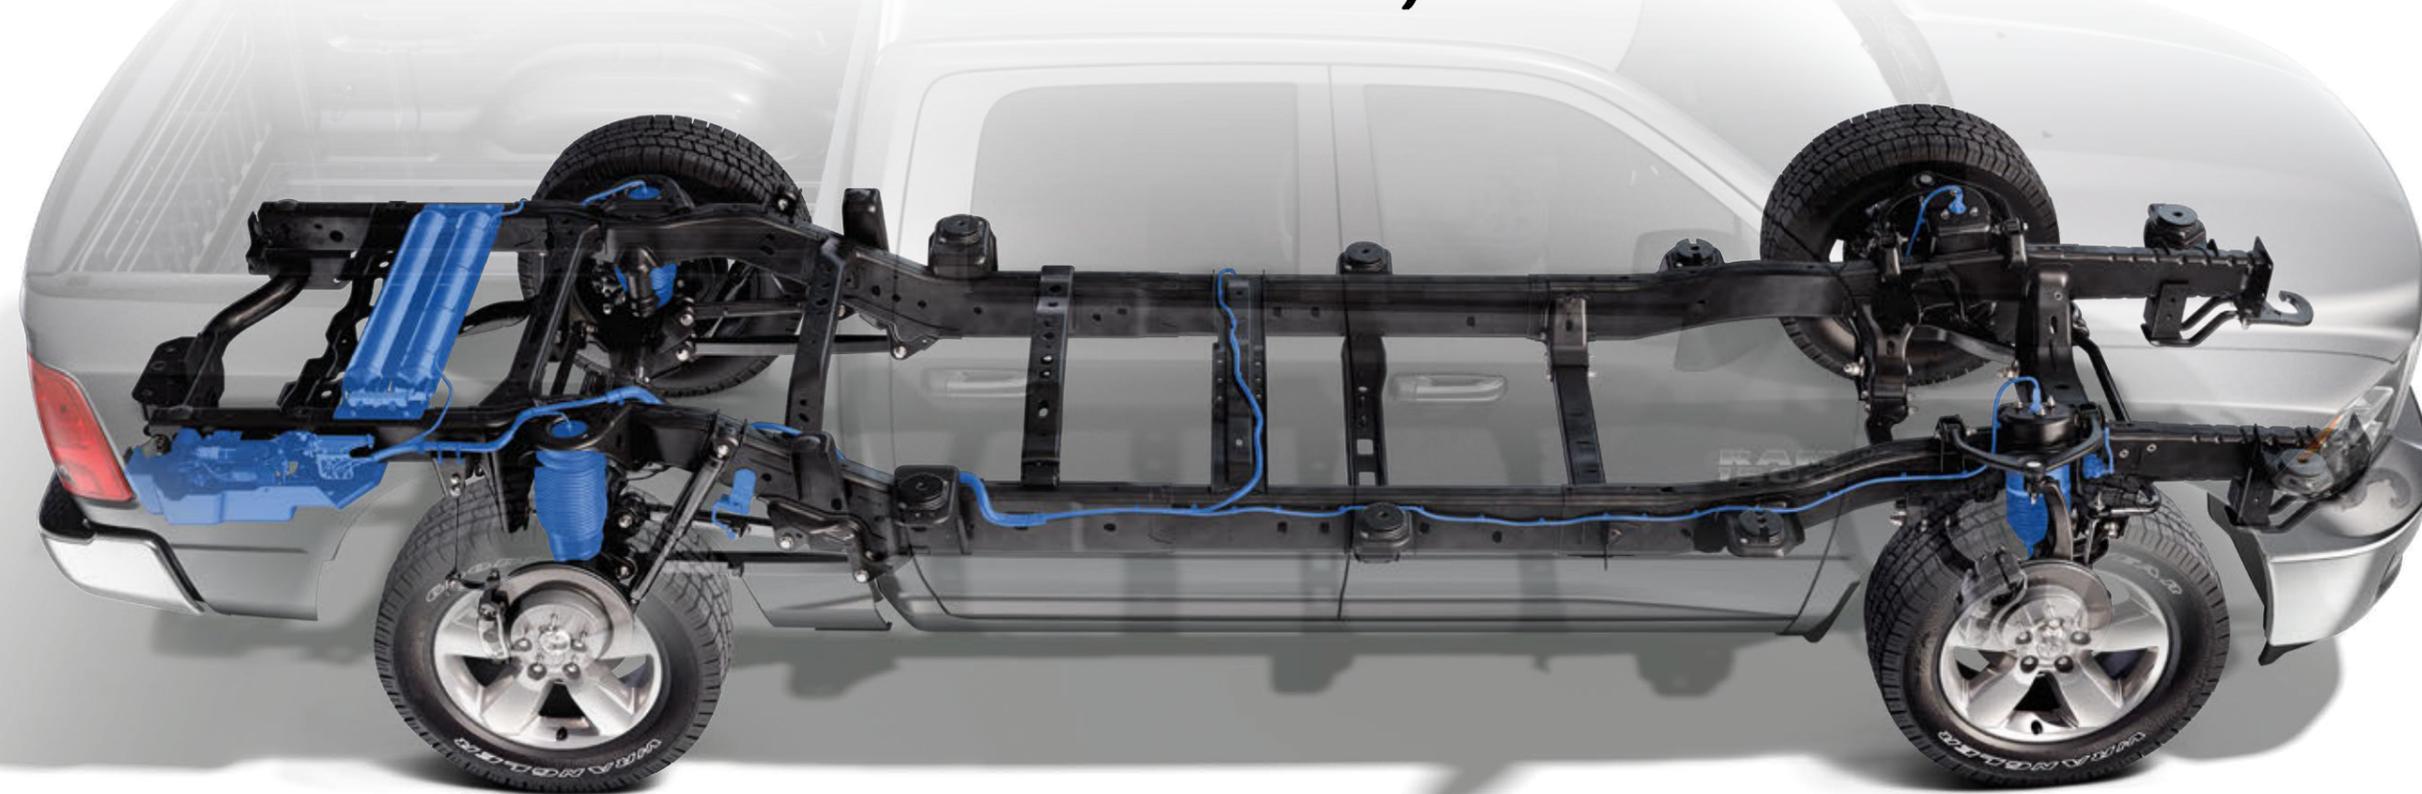

-53 mm (-2.1 in.) front; -43 mm (-1.7 in.) rear

- **ENTRY/EXIT MODE.** Automatically lowers the vehicle for easier entry/exit, loading/unloading, trailer hooking/unhooking.

FINGERTIP EASE. Operation of the available Active-Level Four-Corner Air Suspension, remote start and locking RamBox[®] is as simple as the touch of a button.

UNCOMPROMISING STRENGTH, CLASS-EXCLUSIVE SUSPENSIONS.³

• The **STRUCTURAL REAR BUMPER** is rated for Class III assignments and easily handles trailers up to 2,268 kg (5,000 lb).⁵

• The available **CLASS IV HITCH RECEIVER** bolts directly to the frame, and features 4- and 7-pin trailer tow connectors. Class IV pushes up trailering capability to a commercial-grade 4,826 kg (10,640 lb).⁵

• **GALVANIZED BODY PANELS** offer superb corrosion protection; our **BAKE-HARDENED STEEL**, used in the outer door panels, provides enhanced resistance against dents.

• With a **PARTIALLY HYDROFORMED** and **LOW-TORSION LADDER FRAME** with **FULLY BOXED SIDE RAILS**, ride quality, road manners, hauling and interior comfort are at the top.

• **LIGHTWEIGHT HIGH-STRENGTH STEEL** results in a full-size pickup that goes beyond tough; here, capability meets best-in-class fuel economy.²

• **THE HYDROFORMED INNER STRUCTURE FOR THE ENGINE COMPARTMENT** enables the fenders to become simple bolt-on panels that are easier and more cost-effective to replace.

CLASS-EXCLUSIVE MULTILINK COIL SPRING REAR SUSPENSION.³

UNPARALLELLED COMFORT AND CONTROL.

The multilink coil spring rear suspension is standard on most Ram 1500 models. It's so durable and comfortable, it's the preferred technology for railroad coaches and boxcars. The suspension supplies more lateral stiffness and greater vehicle control, and adds to what is an *already* supremely comfortable ride.

RAM. THE ULTRA-CAPABLE 4x4 AUTHORITY.

THE PART-TIME TRANSFER CASE. The BorgWarner[®] transfer case, standard on Ram ST, SLT, Outdoorsman and Rebel 4x4 models, is ideal for off-road, farm, industrial and leisure activities. It features two speeds with three operating ranges, plus Neutral. It is electronically operated via centre stack-mounted controls.

THE ON-DEMAND TRANSFER CASE. Long proven on Ram 1500 4x4 models, this two-speed transfer case offers four operating modes, plus the Neutral position, and features Auto Mode for all-weather operation—with no driver input required. It is electronically operated via centre stack-mounted controls and is standard on Ram Big Horn, Sport, Laramie, Laramie Longhorn and Laramie Limited.

HOW RAM 1500 BECAME CANADA'S LONGEST-LASTING LIGHT-DUTY PICKUPS!¹

THIS IS WHAT IT TAKES: begin as a concept designed to outdo any competitive vehicle. Undergo rigorous computer-aided engineering processes. Create a prototype and refine it further. Then subject the vehicle to treatments far worse than you will ever attempt. From testing chamber to gruelling on-road trials in weather conditions that ranged from 49°C (120°F) deserts to -29°C (-20°F) arctic climates, our testing was brutal to the extreme. The results are measured in quality that backs you with some of the best warranties⁶ in the business. That's the Ram promise, and we make good on it.

SAFETY TECHNOLOGY.

Ram 1500 employs comprehensive technology for safety and security that's focused on convenience and comfort. This pickup is all about keeping you and yours safe and secure.

PARK-SENSE® FRONT AND REAR PARK ASSIST® SYSTEM. Six Park-Sense sensors located in the front bumper, and four located in the rear bumper, monitor the areas within the sensors' fields. The front sensors can detect obstacles from a distance of up to 1.6 m (63 in.) and the rear sensors from a distance of up to 2.0 m (79 in.). This available feature utilizes readouts in the cluster display and audible chimes to fully notify the driver of front and/or rear objects within range.

REMOTE KEYLESS ENTER 'N GO!™ This available feature eliminates the need for keys in hand: with the key fob in a pocket or bag, the driver can approach the locked vehicle, touch the door handle, enter, push the ignition Start/Stop button and go. The remote keyless locking system also applies to locking and unlocking the tailgate and the available RamBox® Cargo Management System.

AUTO HIGH-BEAM HEADLAMP CONTROL. This optional system automatically toggles between low and high beams to maximize nighttime vision. Intuitive and intelligent, the system effectively ignores local ambient lighting like street lights, sign reflections and buildings. When cresting a hill, it instantly switches to low-beam light output.

BI-FUNCTIONAL PROJECTOR HEADLAMPS. An alternative to the standard headlamps, these 70-millimetre lamps ensure superb forward- and spread-light performance, using smart bi-functional technology to help increase peripheral light.

PARKVIEW® REAR BACK-UP CAMERA® This available system uses a tailgate-mounted hidden camera and conveniently displays the area behind you on the radio screen or rearview mirror (depending on radio system). When equipped with the 5- or 8.4-inch touchscreen radio, active grid lines automatically adjust the guide paths as the steering wheel is turned, an invaluable aid when aligning trailers and hitches.

ELECTRONIC STABILITY CONTROL (ESC)⁷ SYSTEM. Critical to towing control and daily safety and security, ESC is standard on every Ram 1500 model. The system is so refined, it can anticipate the intended path of the vehicle to optimize vehicle dynamics. The multiple technologies of ESC include:

- **TRACTION CONTROL.** Integrated with the ABS, it regulates wheelspin at all speeds. Impending wheel-slip during acceleration results in throttle control to reduce torque; in extreme situations it will selectively apply brakes to maintain control. It can be turned off with a console-mounted button.
- **READY ALERT BRAKING.** The system senses when the driver's foot is lifted from the accelerator, and then instantly applies a slight brake force to ensure brake pads and discs are correctly lined up should a sudden stop be necessary.
- **TRAILER SWAY CONTROL.** This system detects trailer sway and will automatically compensate for it by applying selective brake pressure on the tow vehicle's opposite side to counteract and reduce the sway.
- **ELECTRONIC ROLL MITIGATION.** Operational only during severe or evasive driving manoeuvres, this system anticipates wheel lift and applies the appropriate brake (or reduces engine power) to reduce lift.
- **ANTILOCK BRAKE SYSTEM (ABS).** This four-channel system monitors each wheel's speed and allows backup braking should one of the two braking circuits be compromised.
- **ELECTRONIC BRAKE-FORCE DISTRIBUTION.** This system regulates braking pressure from front to rear to minimize stopping distances for ideal control.
- **HILL START ASSIST.** While on hills or inclines, the system holds the vehicle stationary for two seconds after the brakes have been released to help prevent rollback.
- **RAIN BRAKE SUPPORT.** Activated by the windshield wipers, the brake calipers pulse against the rotor, removing water from the pads.
- **HYDRAULIC BOOST COMPENSATION.** Should a failure occur in the vacuum brake booster or any related line (e.g., a rupture from tough off-roading), the brake controller will run the ABS pump and the brakes will perform as normal until the failure is serviced.

Laramie® in Red Pearl with two-tone paint and optional equipment shown.

Laramie Longhorn® premium leather in Cattle Tan.

THIS IS THE LIFE OF LUXURY.

FIRST-CLASS COMFORT MEETS WORK-READY DURABILITY.

Every Ram 1500 offers a premium level of comfort, state-of-the-art technology and advanced degrees of sophistication. Touches of comfort and convenience are found throughout the lineup with unique trim levels and features that make a lasting impression.

Take refinement to the highest level in a Ram 1500 Laramie Longhorn® or Laramie® Limited. These top-of-the-line Ram models deliver class-exclusive 100% leather seating,³ bolstered by leather and real wood accents throughout the cabin, heated and ventilated front bucket seats, and a heated leather-wrapped steering wheel with audio controls.

INTELLIGENT AND INTUITIVE INTERIOR DESIGN. In a truck known for its impressive versatility, it's no surprise to find that every square centimetre of space is devoted to practical storage and pure comfort. From the oversize in-door bins to the smart behind-the-seat and available in-floor storage, you've got a multitude of places to carry equipment and hide valuables.

DUAL GLOVE BOX AND CONSOLE TREATMENTS. Dual glove boxes feature large upper and lower storage areas. The centre console armrest bins have three available integrated cup holders and provide access to the available media port for connectivity.

NEW INTERIOR REFINEMENTS. On all models with front bucket seats, the new console bin houses a cellular phone and tablet holder which can be concealed with a new tambour wood sliding door on Laramie Longhorn and Laramie Limited models.

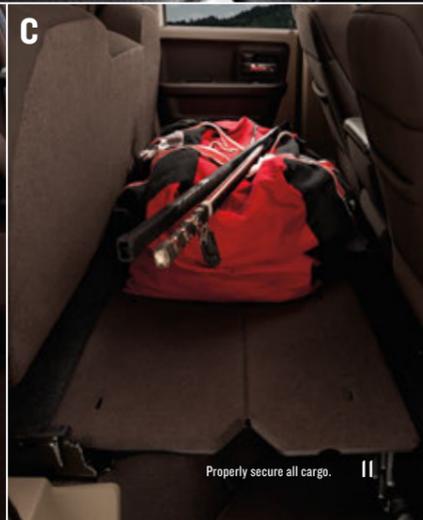

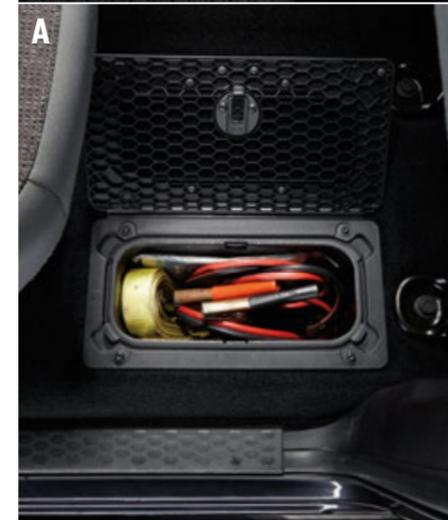

A IN-FLOOR STORAGE BINS. Ram Crew Cab models distinguish themselves with interior roominess and class-exclusive in-floor storage bins³ with a removable and insulated tray, perfect for keeping beverages and food cold, as well as stashing valuables and small tools.

B UNDERSEAT STORAGE. The rear underseat storage in Ram 1500 Crew Cab and Quad Cab® models is perfect for items best left out of sight.

C FOLD-FLAT LOAD FLOOR. Available on Crew Cab and Quad Cab models, it provides a convenient flat storage surface, ideal for cargo you'd prefer not to secure in the rear bed.

Laramie Limited premium leather in Black.

Properly secure all cargo.

THE ART OF TECHNOLOGY.

Each trim level of the 2016 Ram 1500 features a bold instrument panel cluster and interactive, in-cluster display centre.

Select Ram 1500 models feature driver-oriented technologies that enhance convenience and promote responsible on-road action. Among them is a full-colour 7-inch customizable in-cluster display centre. This multiview display screen features personalized settings for dozens of functions, including media, compass, temperature, fuel economy, trip info, cruise control, trailer braking, vehicle status and engine performance.

Our take on safety focuses on keeping eyes on the road and hands on the wheel. So you'll find dynamic information screens accessed using an intuitive "roller-menu" and controlled by a steering wheel-mounted toggle switch; available navigation operates by simple and safe voice commands.⁸

Your Ram utilizes a strong PowerNet electrical architecture which employs high- and low-speed data networks. These communicate with, and connect between, multiple in-vehicle system modules. Information about virtually every facet of vehicle operation is communicated through multiple smart modules that talk to one another.

What it all boils down to is knowledge. Ram 1500 delivers a wealth of information with fingertip-operated ease.

LARGEST TOUCHSCREEN IN ITS CLASS.³

Today's phone offers much more than the ability to make a simple phone call. We think the radio in your Ram 1500 should offer the same sophistication and multi-functional operation. Intuitive and simple to operate, the upgraded Uconnect[®] multimedia centres keep you in control. Available features include:

ENTERTAINMENT. Tune into SiriusXM satellite radio⁹ for dozens of commercial-free channels. Enjoy premium sound from available Alpine[®] audio systems. Opt for a CD player or plug into USB connectivity and check out Bluetooth[®] streaming audio.

PHONE. Bluetooth pairing of multiple phones, contact syncing, voice-activated hands-free calling and text messaging.⁸ The system can also automatically synchronize up to 1,000 entries from your Bluetooth-compatible phone's address book.¹⁰

NAVIGATION.¹¹ Travel in the know, using this intuitive, user-friendly navigational system with turn-by-turn directions. Available 3D displays make travel easy.

VOICE COMMAND.⁸ Use your voice to do what used to be manual: select radio stations and available SiriusXM satellite radio⁹ channels, listen to text messages and send a preformatted response⁸ as well as make/receive calls and select destination entries with available navigation.¹¹ New for 2016, **Siri Eyes Free** on select iPhones[®] allows you to use voice commands⁸ to send text messages, play music, and more on an 8.4-inch touchscreen.

CONTROLS. All your radio, touchscreen and steering-wheel controls are designed to be easy to find and easy to use. Adjust your seat or cabin temperature, select a music station or make a call without taking your eyes off the road.⁸ New for 2016, **Drag-and-Drop Menu Bar** allows you to personalize your radio to have one-button access to the features that matter most.

The Uconnect multimedia centres offer configurable screens with new "Drag and Drop" technology.

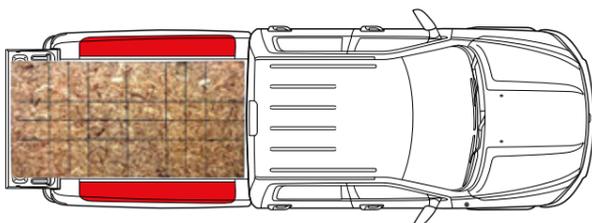

THE RAMBOX® CARGO MANAGEMENT SYSTEM.³

Ram 1500 is the go-to source for getting jobs done. Choose from Regular Cab, Quad Cab® and Crew Cab sizes, 5-foot 7-inch, 6-foot 4-inch and 8-foot bed lengths, and top it off with RamBox.

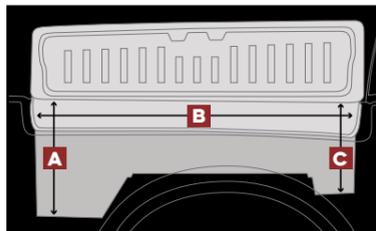

The class-exclusive RamBox Cargo Management System³ is available for most 5-foot 7-inch and 6-foot 4-inch beds. The system includes two large, drainable, illuminated and lockable compartments, each spacious enough to hold a variety of power tools or sports equipment.

RamBox also includes a cargo bed extender/divider, intelligently stored at the front of the bed, to customize the cargo bed area and extend usable bed length; reverse it to divide the bed for specific cargo. A built-in cargo bed rail system with four adjustable cleats offers secure tie-down points for cargo.

UNCOMPROMISING CAPABILITY. The RamBox System doesn't compromise your ability to haul—it enhances it. The system lets you carry 4x8-foot sheets of building materials in the flat cargo bed—along with all of your tools stashed safely in the bins.

RAMBOX DIMENSIONS

	5' 7" CARGO BED	6' 4" CARGO BED
A	480 mm (18.9 in.)	480 mm (18.9 in.)
B	1311 mm (51.6 in.)	1529 mm (60.2 in.)
C	366 mm (14.4 in.)	472 mm (18.6 in.)

NEW PICKUP BOX LIGHTING. For 2016 Ram models, we're also introducing all-new available pickup box lighting. These two rear-mounted lamps complement the centre high-mounted stop lamp (CHMSL), and make loading/unloading at night easier than ever. And if your Ram 1500 sports a tonneau cover, the lighting amply illuminates the rear area—so no need to adjust the cover.

Properly secure all cargo.

AUTHENTIC RAM ACCESSORIES.

CREATE THE LOOK THAT'S YOU. Here's how to get the most from your new pickup: employ hundreds of Authentic Accessories from Mopar—designed specifically for Ram 1500.

Mopar offers custom-crafted solutions to address virtually every aspect of looks, comfort, capability and performance. So think Cold Air Intake Kits to boost engine output. Space for golf clubs, power tools or the innovative RamBox Holster—all of which perfectly fit the RamBox storage compartments. Comfort items like Tubular Side Steps. Protective devices like Tonneau Covers and Bedliners. And, of course, dozens of practical accessories that make work easier.

SPECIFICATIONS

3.0L ECODIESEL V6³

3.6L PENTASTAR™ V6

5.7L HEMI® V8

Small displacement, impressive torque, high performance by design. Mated to the TorqueFlite® 8-speed automatic, the 3.0L EcoDiesel V6 utilizes high-temperature glow plugs and individual oil squirters to lubricate each piston. Dual filtration provides superb water/fuel separation. B20-capable, it delivers up to **1,225 km (761 miles) per tank¹⁵ with best-in-class fuel economy²: as efficient as 8.0 L/100 km (35 mpg) hwy.***

HORSEPOWER	240 @ 3600 rpm
TORQUE — lb-ft	420 @ 2000 rpm
DISPLACEMENT — cu cm (cu in.)	2988 (182)
CONSTRUCTION	Cast-iron block/aluminum head
VALVE SYSTEM	DOHC, 24 valves, chain-driven
OIL CHANGE INTERVAL¹ (under normal operation)	16,000 km or 12 months ¹

This award-winning V6 delivers outstanding performance. Both it and its partner, the TorqueFlite 8-speed automatic, feature Thermal Management Systems to keep fluids at the ideal operating temperatures. With its serious 10.2:1 compression ratio and pulse-width modulation, it all results in **impressive fuel economy: as efficient as 9.3 L/100 km (30 mpg) hwy.***

HORSEPOWER	305 @ 6400 rpm
TORQUE — lb-ft	269 @ 4175 rpm
DISPLACEMENT — cu cm (cu in.)	3604 (220)
CONSTRUCTION	Aluminum block/aluminum head
VALVE SYSTEM	DOHC, 24 valves, chain-driven
OIL CHANGE INTERVAL¹ (under normal operation)	16,000 km or 12 months ¹

Legendary in its wide range of applications over the decades, few engines attain the stature of the 5.7L HEMI V8 powerhouse. With Multi-Displacement System (MDS)/FuelSaver Technology seamlessly shutting off half of the cylinders during highway cruising, the HEMI V8 delivers 8-cylinder performance for towing and hauling—and fuel-sipping 4-cylinder efficiency for cross-country road trips.

HORSEPOWER	395 @ 5600 rpm
TORQUE — lb-ft	410 @ 3950 rpm
DISPLACEMENT — cu cm (cu in.)	5654 (345)
CONSTRUCTION	Cast-iron block/aluminum head
VALVE SYSTEM	Variable-cam timing, 16 valves, pushrod-operated
OIL CHANGE INTERVAL¹ (under normal operation)	16,000 km or 12 months ¹

¹Under no circumstances should oil change intervals exceed 16,000 km, 12 months or when prompted by the vehicle's oil change indicator light, whichever comes first.

Ram 1500 equipped with the 3.0L EcoDiesel V6, the industry's only diesel-powered half-ton pickup³ and the most fuel-efficient pickup in Canada,² dominated both the 2014 and 2016 Canadian Truck King Challenge, beating out Ford F150 and Chevy Silverado.

SOCIETY OF AUTOMOTIVE ENGINEERS (SAE) J2807 TOWING STANDARD. Towing ratings for all 2016 Ram 1500 models are compliant with the SAE J2807 towing standard. The towing standard outlines performance requirements for determining Gross Combined Weight Rating and Trailer Weight Ratings and is designed to reflect real-world conditions that truck owners would likely experience. Performance requirements take into consideration a truck's acceleration, gradeability, braking and handling, and its ability to handle heat in a standardized environment, both with and without a load.

TOWING ¹ (Conventional ball and hitch) (SAE J2807 Compliant) kg (lb) — Maximum ratings when properly equipped.				REGULAR CAB				QUAD CAB [®]		CREW CAB

¹Information subject to change. All weights are in kilograms (pounds). Please visit www.rambodybuilder.com for full specifications. Payload and Max Trailer Weights are ESTIMATED values. All weights are shown in pounds unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. Trailer Weight Rating (TWR) and Tow Vehicle Trailing Weight are calculated as specified in SAE J2807. Passenger Weight = 300 lb. Options Weight is option content above 33 percent of sales volume. Trailer Equipment Weight = Class IV hitch receiver is 11.1 lb (if not already included in Options Weight). Trailer Hitch is 10 lb if TWR is less or equal to 5000 lb and 65 lb if TWR is greater than 5000 lb. Payload and TWR are mutually exclusive. GVWRs, GVWRs and GCWRs should never be exceeded. The recommended tongue weight for a conventional hitch is 10 percent of the gross trailer weight. The maximum tongue weight for Class IV hitch receiver is limited to 1100 lb. Weight-Distributing Hitch is recommended for trailers over 5000 lb. Quad Cab and Crew Cab models with off-road tires (sales code TXN) and/or steel wheels (sales code WFP) have a 6800-lb GVWR. All models with 22-inch tires (sales code TY4) have a 6200-lb GVWR. *Big Horn models equipped with the 3.0L V6 EcoDiesel Engine and a 3.92 axle ratio have a 13,750-lb GCWR.

WARRANTIES: 2016 Chrysler, Jeep, Dodge and Ram vehicles are backed by a 5-year or 100,000-kilometre* fully transferable Powertrain Limited Warranty with \$0 deductible plus 24-hour roadside assistance.¹ Basic Warranty coverage is for 3 years or 60,000 kilometres.* Rust-through coverage on all body sheet metal is for 3 years. The Cummins Turbo Diesel engine is protected by a separate Limited Warranty, covering the engine for 5 years or 160,000 kilometres.

*Whichever comes first. Some conditions may apply. ¹The 5-Year/100,000-Kilometre Powertrain Limited Warranty does not apply to vehicles sold for certain commercial uses. See your retailer for full details.

MOPAR VEHICLE PROTECTION: FCA Canada Inc. has a vested interest in your satisfaction and owner experience with your new Ram truck. Mopar Vehicle Protection offers extended service plans to help ensure that you'll enjoy your truck for many years down the road. For more information on comprehensive vehicle coverage, see your Ram retailer, call 800-465-2001 or visit fcaCanada.ca/owners

DISCLAIMERS: 1 Based on longevity of the Ram Light-Duty Pickup segment compared to all competitive light-duty pickups on the road since 1988. Longevity based on IHS Automotive: Polk Canadian Vehicles In Operation data as of July 1, 2015, for model years 1988 – 2015 for all light-duty pickups sold and available in Canada over the last 28 years. 2 Based on *Automotive News* full-size pickup segmentation. 2016 *EnerGuide* highway fuel consumption ratings. Government of Canada test methods used. Your actual fuel consumption will vary based on driving habits and other factors. 11.3 L/100 km (25 mpg) city and 8.0 L/100 km (35 mpg) highway on Ram 1500 Quad Cab 4x2 HFE model with 3.0L EcoDiesel V6 and 8-speed automatic. 3 Based on *Automotive News* Full-size Pickup segmentation. 4 Based on *Automotive News* Full-size Pickup segmentation. 420 lb-ft of torque achieved at 2,000 rpm. 5 Compliant to Society of Automotive Engineers (SAE) J2807 towing standards. Specific model and optional equipment required to achieve maximum rating. See your retailer for full details. 6 This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of his/her surroundings and be prepared to take corrective action to avoid collisions. 7 No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. 8 Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. Voice commands of phone require a Bluetooth-compatible phone. 9 Requires SiriusXM radio subscriptions governed by SIRIUS terms and conditions available at siriusxm.ca 10 Phone must support Bluetooth Phone Book Access Profile (PBAP). 11 Never program while driving. GPS mapping and available 3D navigation may not be detailed or available in all areas or reflect current road regulations. 12 The advanced front air bags in this vehicle are certified to the federal regulations for advanced air bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. 13 Additional fees will apply for Retailer-Activated Navigation. 14 Not compatible with all garage door openers. 15 Driving range based on 2016 *EnerGuide* highway fuel consumption ratings and fuel tank capacity. Your actual driving range will vary based on powertrain, driving habits and other factors. Use for comparison purposes only.
