The Dodge Viper is the ultimate American supercar, hand-built with exotic materials, exceptional performance and one-of-a-kind style. At the heart of the 2017 Viper is the handcrafted, all-aluminum 8.4-liter V10 overhead-valve engine, rated at 645 horsepower and 600 lb-ft of torque. A frame constructed with high-strength steel and magnesium and body panels of hand-laid carbon fiber and super-formed aluminum bring a top-shelf power-to-weight ratio for optimum on-track performance. The driver-oriented, race-inspired, high-performance interior features hand-sewn premium materials, while hand-painted body panels and stripes offer exterior distinctiveness.
