

Congratulations to **Country Chevrolet** for achieving
Green Dealer Program certification recognition for 2018-2020!

Through your dedication in driving eco-friendly initiatives, your team has earned recognition that very few automotive dealers have achieved. We are proud of your accomplishment and your efforts to reduce your impact on our environment, increase employee enthusiasm for green activities, and engage with local organizations and schools to make a positive impact on your community.

Your green efforts set you apart from your competitors and show your dedication to energy reduction, renewable energy, water conservation, waste-to-landfill reduction and community outreach. These practices align with your manufacturer's companywide mission to reduce its environmental footprint, and you are part of a group of more than 700 General Motors dealerships nationwide that are committed to sustainable practices.

Congratulations and thanks for all you are doing!
