INNOVATIONS FOR YOUR SAFETY

Encore GX offers available safety and driver-assistance technologies that can help you drive with confidence, be more aware of your surroundings and stay safe on the road.

REAR CAMERA MIRROR The available Rear Camera Mirror allows you to use either a traditional inside mirror or a rearview camera mirror display that provides a wide, less-obstructed field of view to check for traffic. Available zoom and vertical-tilt adjustment add even more ways to see what's behind you. Plus, there's a washer to help clean the Rear Camera Mirror lens if it becomes dirty.

AUTOMATIC PARKING ASSIST WITH BRAKING Available Automatic Parking Assist with Braking helps you parallel and perpendicular park while moving at idle speed by automatically steering and braking the vehicle into a detected parking space while you follow text commands, select gears and override braking and acceleration as needed.

ADAPTIVE CRUISE CONTROL—CAMERA This available feature enhances regular cruise control by using camera technology to automatically adapt the vehicle speed to maintain your selected following gap time between your vehicle and any vehicles detected ahead while you steer, reducing the need for you to frequently brake and accelerate.

REAR CROSS TRAFFIC ALERT This available feature can alert you to detected left or right cross traffic behind you when in Reverse.

HD SURROUND VISION Available High Definition Surround Vision provides you with a high-resolution virtual “bird’s-eye” view of the scene around the vehicle at low speeds and adds several additional views on the infotainment display to help you park and avoid objects.
