

GlassCoat[®]

Ceramic Paint Protection

Powered by **SIMONIZ**

HOW IT WORKS

GlassCoat Protects Your Vehicle's Paint

Unlike traditional waxes and sealants that temporarily **"cover the surface,"** GlassCoat chemically reacts with hydrogen and oxygen on the surface of the clearcoat. The end result is an extremely tough and durable ceramic film which protects your vehicle's paint.

GlassCoat Protects Your Vehicle's Interior

Simoniz[®] utilizes Stain Sentry advanced surface protectors for the interior seats, floor mats and carpeting of your vehicle. This process protects your interior from stains from any consumable food product plus make-up, vomit, crayons, urine, blood and pet waste.

Rental Car Coverage & Zero Deductible For Repairs

If your vehicle needs to be repaired, we will pay **\$50/day for up to 10 days** to provide you with a rental car.

WHAT IT COVERS

WHY GLASSCOAT?

Protection for New Vehicle Purchases

Created by Simoniz, a trusted maker of car care products for **over 100 years**.

Simoniz GlassCoat enhances the appearance of your vehicle, making it **worth more money** at trade-in time.

GlassCoat can increase the glossiness and thickness of a vehicle's paint by **as much as 10%**.

The GlassCoat application **provides added coverage** that you don't get from the manufacturer. Just ask your dealer to see the details in your Warranty Booklet and Owners Manual.

(The Simoniz GlassCoat Program can only be purchased prior to delivery of your new vehicle.)
