In 1963, Maserati made a remarkably bold move. We took a proven racing engine developed for use in our competition cars, mated it with a beautifully designed luxury sedan, and presented our creation to the world at the Turin Motor Show. This was our first Quattroporte—and the reception from the public, press and automotive connoisseurs was rapturous.

The excitement was understandable. Until then, Maserati was known for its formidable motorsport pedigree, glamorous coupes and striking convertibles. This was new. The Quattroporte was the world’s first supersedan.
The Quattroporte offers formidable, race-bred power from Ferrari-built V6 and V8 engines, while a long wheelbase offers a spacious, elegantly crafted interior of supreme luxury. Every comfort and convenience is provided, from hand-stitched premium Italian leather to the latest advanced driver-assistance systems. Furthermore, the Quattroporte’s undeniably athletic yet graceful styling evokes the power and presence the world has come to expect from Maserati.

As Maserati continues to shape the future of luxury grand touring, some things clearly never change.

The Quattroporte met a particular need for an exclusive group of discerning motorists.

Back then, Europe’s emerging network of roadways opened up thrilling possibilities for long-distance journeys. With the Quattroporte, grand touring became an experience to be savored—at high speeds, in spacious comfort and with breathtaking Maserati style.

Fast forward to the 2018 Maserati Quattroporte, and the principles remain much the same.
The Quattroporte embodies the enduring and progressive spirit of Maserati as part of a story that dates back more than 100 years.

Maserati officially opened for business in 1914 at No. 1 Via de’ Pepoli in Bologna, but the wheels were in motion long before. In 1900, Rodolfo Maserati’s eldest son, Carlo, built a single-cylinder engine and fitted it to a bicycle. At just 17 years of age, Carlo raced his motorized bicycle to victory in a punishing long-distance rally in northern Italy.

A short while later, the intrepid youngster designed another engine and fitted it to a wooden car chassis. This was, arguably, the world’s first Maserati vehicle.

Maserati’s drive to innovate and its passion for speed made the transition into elite motorsport inevitable. It was a move that reaped countless rewards on the world stage. Here are just a few of the brand’s many historic successes: In 1926, Alfieri Maserati drove the Maserati Tipo 26 to victory in its first-ever race—the Targa Florio. In 1939, Wilbur Shaw won the Indianapolis 500 at the wheel of the Maserati “Boyle Special” 8 CTF at an average speed of more than 115 mph. Shaw repeated this feat the following year, making Maserati the only European manufacturer to win the Indy 500 twice. In 1957, the legendary Juan Manuel Fangio took his fifth F1 World Championship at the Nürburgring (also known as the Green Hell) in a Maserati 250F. For Fangio, who was 46 years old, it was his final and greatest victory.

In the late 1940s, Maserati took a luxurious turn by creating the A6 1500 GT production grand tourer. Built in our current home in Modena, the 1500 GT featured sensuous Pininfarina coachwork. The convertible A6G Frua Spyder soon followed.

Such power and performance had never been so beautifully packaged—opening up new worlds of long-distance possibilities in the process.

Since then, all Maserati production models have followed this unique formula, offering race-bred performance, captivating Italian design, and all the luxuries and comfort you would expect from a prestigious grand-touring automobile.
Luxurious scale and power meet high performance in the Maserati Quattroporte. The supersedan eloquently expresses these qualities with its stately exterior lines and with a dynamic tension that sets the heart racing.

Maserati’s iconic Trident badge dominates the Quattroporte’s front. Inspired by the BMW concept, the Trident’s sharp angle presents an aerodynamic, high-performance shark-like effect. The imposing presence is brought into even sharper focus by stylish new adaptive full LED headlights. Other striking details include triple air vents in the front, frameless windows and a Saetta logo on each C-pillar. At the rear, quad chrome-tipped tailpipes convey the Quattroporte’s powerful ability to cross continents.
The interior of the Maserati Quattroporte is a profoundly engaging place to be—on two levels. An initial impression of massive performance contrasts with the sense of meticulously crafted comfort, technological convenience and peerless Italian style.

Among the Quattroporte’s signature details is Maserati’s Trident badge on the headrests and at the center of the steering wheel. The seats, upper dashboard and armrests are finished in fine leather. Touches of open-pore Radica wood provide a graceful accent. Both front seats feature 12-way power adjustment and heating, while a memory function reconfigures the driver’s seat, steering wheel and door mirror positions according to his or her personalized settings.

Other highlights include Maserati’s advanced 8.4-inch infotainment system and a standard air-quality sensor. The Quattroporte’s rear compartment is appointed with 60:40 split-folding leather seats for three passengers, plus a center armrest with storage, a USB port and a 12V socket. In short, every personal need is met—then exceeded.

**UNIQUE VITALITY**
ITALY IS RICH IN WONDERS
Here are two
The Quattroporte can be specified to an even higher level of luxury with the GranLusso trim. Building on the exclusive appeal of the Quattroporte, GranLusso trim features a discreet front spoiler, chrome vertical bumper details, body-color side skirts, and the GranLusso badge on the front fenders. Its luxurious stance is punctuated by 20-inch Mercurio light-alloy wheels with black brake calipers.
The Quattroporte GranLusso is crafted for individuals who desire the most luxurious Quattroporte imaginable, with an unmatched level of refinement and convenience. The exclusive interior features touches crafted by Ermenegildo Zegna, one of Italy’s most celebrated fashion design brands, including fine leather and Zegna’s mulberry silk inserts for the seats, door panels, roof lining and cabin lighting. The silk is embellished with a hand-stitched micro-chevron pattern. Three combinations of leather and silk with contrast stitching are available.

Other GranLusso cabin refinements include a wood-and-leather steering wheel, wood accents, power foot pedals and a power rear sunblind, as well as available four-zone climate control and heated rear seats.
Individuals who seek a more sport-oriented Quattroporte will appreciate the GranSport trim. Highlights include boldly sculpted angles for the central-front and side intakes, aerodynamic front splitters, and a Piano Black painted center spoiler and side inserts.

An optional black grille finish contrasts blue inserts within the Trident—a cue inspired by the original Maserati badge of the 1920s. This same blue adorns the Saetta logo in the C-pillars and on the wheel centers. The Quattroporte’s striking profile includes GranSport badging and sweeping side skirts; 21-inch Titano alloy wheels with red brake calipers are available. At the rear, a low set diffuser is finished in Piano Black.

The GranSport is also offered with the optional Exterior Carbon Package. This exclusive package includes carbon-fiber treatment for the door handles, exterior door mirrors, B-pillar covers and front splitters.
Amplifying the Maserati Quattroporte’s sporting character is an interior that features a set of sculpted leather front and rear sport seats, providing exceptional support during spirited driving. A leather-wrapped sport steering wheel and long aluminum gearshift paddles offer precise control. High-gloss wood trim on the dashboard and stainless-steel sport pedals complete this inspiring picture.

An Interior Carbon Package is also available with lightweight, tactile carbon fiber for the sport steering wheel, gearshift paddles, doorsills and interior trim.
Maserati vehicles are renowned for their ability to cover long distances at dynamic yet refined speeds. The Quattroporte upholds this tradition with a choice of two powerplants. With the Quattroporte S and S Q4, that power comes from a 3.0-liter, twin-turbocharged V6 engine, and in the GTS from a mighty twin-turbocharged V8, the most powerful engine offered by Maserati. Both engines—engineered by Maserati and hand-assembled by Ferrari in Maranello—offer track-ready performance while delivering remarkable efficiency.

When it comes to stirring emotion, nothing can match a Maserati engine note. The Quattroporte combines a lightweight exhaust system with bypass valves to deliver visceral sound with maximum effect. With Sport mode active—which also sharpens the vehicle’s handling parameters—the valves open to provide the shortest, highest-energy route for the exhaust gases. This transition results in optimized engine performance and an unmistakably resonant, spine-tingling sound.

**523 hp V8 Twin Turbo**
The flagship Quattroporte GTS features a magnificent 3.8-liter, twin-turbocharged V8 that develops 523 hp from between 6,500 and 6,800 rpm. Torque is equally impressive at 479 ft-lb, available between 2,000 and 4,000 rpm. The Quattroporte GTS reaches 62 mph from a standing start in a breathtaking 4.7 seconds and continues on to a top speed of 193 mph.

**424 hp V6 Twin Turbo**
The Quattroporte S and S Q4 feature the most powerful version of the Maserati V6. Maximum output has been raised to 424 hp for 2018 and is delivered at 5,750 rpm, and peak torque of 428 ft-lb is on tap between 2,250 rpm and 4,000 rpm, resulting in remarkable driving flexibility and performance. The S model achieves the sprint from zero to 62 mph in 5.0 seconds, while the S Q4 achieves it in 4.8 seconds. Both share a top speed of 179 mph.
ZF’s advanced eight-speed automatic transmission helps ensure precise gear changes and optimum performance, placing the power of the Quattroporte engines under your complete control.

With the aid of auto-adaptive software, the transmission modifies its shift pattern according to your personal driving style, offering a rewarding, custom driving experience. Long, high-speed journeys are a chance to experience reduced fuel consumption and extra comfort thanks to the specially calibrated seventh and eighth gears.

Power is routed through the transmission to the rear wheels via a standard mechanical limited-slip differential, ensuring superb traction in even the most challenging situations. For maximum driver engagement, the Quattroporte features five drive modes, selected using the buttons near the gear lever: Auto Normal, Auto Sport, Manual Normal, Manual Sport and Increased Control & Efficiency (ICE). Upshifts are fully automated unless a manual mode is selected.

**AUTO NORMAL MODE**
This pre-set mode provides smooth gearshifts at low revs to maximize ride comfort and help minimize fuel consumption. When a sportier driving style is recognized, the transmission automatically upshifts at higher engine speeds.

**AUTO SPORT MODE**
In this mode, gearshifts take place in less than 100 milliseconds and at higher revs. This delivers a near-seamless flow of exhilarating high power and a far sportier driving style.

**MANUAL NORMAL MODE**
This mode allows the driver to change gears using available paddles behind the steering wheel or via the center-mounted lever. Upshifts and downshifts occur automatically on approach to redline.

**MANUAL SPORT MODE**
In Manual Sport, the driver takes full control of the transmission; overboost is activated for maximum performance, gearshifts are quicker and sharper, while the engine can be pushed to the limit without the system intervening. If the revs drop too low, downshifting occurs automatically.

**ICE (INCREASED CONTROL & EFFICIENCY) MODE**
This mode helps ensure better control in all weather conditions, with a more comfortable and quiet engine response and lower fuel consumption.
A GRIPPING EXPERIENCE

The long road ahead—with its twists, turns and occasional surprises—is there for the taking in the Maserati Quattroporte, thanks to a host of intelligent systems.

Q4 INTELLIGENT ALL-WHEEL-DRIVE SYSTEM
The Quattroporte S Q4 is a perfect choice for drivers seeking the dynamic rewards of rear-wheel drive with the support of all-wheel traction. Maserati’s compact, lightweight Q4 intelligent all-wheel-drive system is the star of this performance. In normal conditions, Q4 sends all available torque to the rear wheels for perfectly balanced Maserati driving dynamics and optimal fuel consumption. If traction is lost during fast cornering, sudden acceleration, or limited rear-axle grip, Q4 can alter the torque split from 100 percent rear-wheel drive to 50:50 between the front and rear wheels. In an imperceptible 150 milliseconds—less than the blink of an eye—the Quattroporte Q4 system can intelligently apply power to maximize grip.

SKYHOOK SUSPENSION
Standard on all Quattroporte models is Maserati’s Skyhook suspension system with continuous damping variation. Skyhook uses sensors to monitor the movement of each wheel and of the car’s body to determine present road conditions and driving behavior. The system then instantly adjusts individual damper settings accordingly. Ride comfort is prioritized as standard, but a simple press of the suspension button on the central console immediately firms up the shock absorbers for more dynamic handling.

INTEGRATED VEHICLE CONTROL (IVC)
Maserati engineers believe that it is better to be proactive, rather than reactive, when it comes to driving dynamics. Integrated Vehicle Control (IVC) illustrates the Maserati philosophy perfectly. IVC aids in detecting the onset of vehicle instability and responds by applying corrective measures, optimizing control by selectively reducing engine torque and applying brake force to individual wheels.

ELECTRIC POWER STEERING (EPS)
This system, standard on all models, provides the excellent road feel and comfort expected from Maserati. Steering weight is adapted according to speed. When maneuvering in a tight spot, steering is lighter and easier to turn, but at high speeds, weight is added for improved road feel. This system is also more efficient—only requiring energy when the wheel is turned. As an additional benefit, the electronic steering rack integrates with the Quattroporte’s advanced driver-assistance systems like Highway Assist, Lane Keeping Assist and Active Blind Spot Assist.
INNOVATION FOR A CONNECTED WORLD

A cutting-edge infotainment package for the 2018 Quattroporte puts the focus on intuitive engagement, real-world assistance and adaptable enjoyment.

The interior of the Quattroporte is built around an intuitive, uncluttered and user-friendly driver interface. The instrument cluster features prominent analog gauges for the tachometer and speedometer, alongside a 7-inch TFT display illuminated by soft white backlighting. Major dynamic functions are incorporated into the buttons alongside the gearshift, while other on-board settings can be adjusted using the Maserati Touch Control Plus (MTC+) infotainment system and console-mounted control knob, or via the steering wheel controls.

MASERATI TOUCH CONTROL

The 8.4-inch Maserati Touch Control Plus (MTC+) unit is featured prominently at the center of the Quattroporte dashboard. With a minimalist layout and a highly responsive interface, it is designed to help the driver maintain focus on the road ahead.

MTC+ can be operated in three ways: with the touchscreen interface, the rotary control in the central console, or voice commands. The system incorporates the car’s radio, Bluetooth®, and satellite navigation system, along with connections to external sources such as mobile phones, tablets and laptops.

Passengers can play music using the aux-in port, USB sockets or the SD card reader. In addition, MTC+ controls the front seat heating, ventilation, steering wheel heating and the rear window blind (when equipped). When reversing, backup camera and grid lines are shown on the vivid center display.

The state-of-the-art MTC+ system supports the convenience of Apple CarPlay® and Android Auto™ mirroring functions. iPhone® users also benefit from Apple’s Siri® personal assistant, allowing them to carry out tasks like placing phone calls, accessing music or messages, reading emails or surfing websites—all via voice commands.

Wi-Fi Hotspot

The Quattroporte is also available with on-board Wi-Fi to keep you connected while on the move.

Apple CarPlay®: Requires compatible iPhone®. See dealer for phone compatibility. Data plan rates apply. Vehicle user interface is a product of Apple®. Apple CarPlay is a trademark of Apple Inc. (iPhone is a trademark of Apple Inc., registered in the US and other countries. Apple terms of use and privacy statements apply. Additional features and services may be available for Apple products. For more information, visit iSmarter 3.0.2 or higher or download app on Google Play. Android Auto and Google Play are trademarks of Google Inc. 1F U4/K1 subscription required. Vehicle must be properly equipped and in active and usable cellular range for Wi-Fi usage. This feature is not intended for using the device while the vehicle is in motion. Always drive safely.
The Quattroporte is offered with a choice of two exceptional audio systems. Fitted as standard, a powerful 900-watt, 10-speaker Harman Kardon Premium Sound system delivers elevated levels of audio refinement, with every facet tailored to match the Quattroporte’s stunning interior.

Those seeking the ultimate in acoustics can choose the latest-generation Bowers & Wilkins Surround Sound system. Featuring 15 speakers that include mid-range drivers and rear woofers made from Kevlar®, each is strategically built into the car’s architecture and powered by a 1,280-watt amplifier to deliver immersive sound for all on board. This system is simply the finest in sound perfection.
The Quattroporte is equipped with a comprehensive range of advanced driver-assistance systems. These innovative safety features offer greater peace of mind—whether you’re on an exclusive grand tour or dashing through the city.

**ADAPTIVE CRUISE CONTROL WITH STOP & GO FUNCTION**
Adaptive Cruise Control continuously monitors the vehicle ahead, maintaining a pre-set distance. With the Stop & Go function, the car will also adjust to the speed of the vehicle in front until it comes to a complete stop, provided the stop is less than two seconds.

**FORWARD COLLISION WARNING PLUS**
Forward Collision Warning Plus, in combination with Adaptive Cruise Control, monitors vehicles ahead and warns if the approach could result in a rear-end collision. This is linked to the Advanced Brake Assist system, which provides additional braking during an emergency stop. If the warning does not prompt any action from the driver, the autonomous Emergency Braking system automatically applies the brakes to reduce the risk of an impact.

**LANE KEEPING ASSIST (LKA)**
Lane Keeping Assist (LKA) provides valuable support if the driver is about to unintentionally leave a lane. A digital camera behind the rear-view mirror continuously monitors road markings to communicate vehicle status in the driver’s instrument panel. White lines on either side of the vehicle image indicate drivers are safely within the lane. One yellow line indicates that the Quattroporte is moving off-center, right or left. One flashing yellow line warns of lane departure, while two yellow lines indicate an unintentional lane change. The system intervenes with steering assistance. The intensity of this assistance is adaptable according to preference.

**HISTORY ASSIST SYSTEM (HAS)**
Combining the virtues of Adaptive Cruise Control with Stop & Go and Lane Keeping Assist, Highway Assist System (HAS) makes life easier while driving on highways. HAS uses information picked up from a digital camera behind the rear-view mirror, plus a radar system in the front grille, HAS automatically keeps the vehicle centered in its lane at a pre-selected speed and at a chosen distance from the vehicle ahead. HAS will even decelerate the Quattroporte as traffic conditions dictate. To help ensure safety, HAS requires the driver to keep his or her hands on the steering wheel at all times.

**REAR CROSS PATH FUNCTION**
Rear Cross Path Function emits a warning when an unseen vehicle is approaching, from the right or left, while the driver is reversing out of a parking space.

**TRAFFIC SIGN RECOGNITION**
Even the best drivers fail to recognize traffic signs on occasion, and for this reason, Traffic Sign Recognition is a particularly useful feature. While monitoring three types of indicators—speed limits, temporary speed limits and conditions like heavy rain, and no-passing zones—the system displays updated signs digitally in the gauge cluster. The Traffic Sign Recognition feature is powered by a digital camera mounted behind the rear view mirror and navigation data.

**FRONT AND REAR PARKING SENSORS AND SURROUND-VIEW CAMERA**
To assist with maneuvering in tight spaces, the Quattroporte comes equipped with parking sensors in the front and rear bumpers. Two cameras beneath the door mirrors, plus front and rear cameras, capture images. These images are then shown on the center display.

**SURROUND-VIEW CAMERA**
This provides a clear view around the car to assist with parking and highlights underneath Foldable obstacles. Two cameras beneath the door mirrors, plus front and rear cameras, capture images. These images are then shown on the center display.

**ACTIVE BLIND SPOT ASSIST**
Active Blind Spot Assist triggers a warning icon in the exterior door mirrors when a vehicle enters the driver’s blind spot. Three levels of support can be selected if the driver continues with or on the lane change. The system monitors the area either side of the vehicle and issues a warning if a vehicle enters the blind spot. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions.

**FORWARD COLLISION WARNING**
All Quattroporte models are equipped with the Forward Collision Warning system, which monitors vehicles ahead and warns if the approach could result in a rear-end collision. This system is a driver’s convenience system, not a substitute for active driver involvement. The driver must retain awareness of traffic conditions and be prepared to use the brakes to avoid collisions.

**TRAFFIC COLLISION WARNING PLUS**
This system is a driver’s convenience system, not a substitute for active driver involvement. The driver must maintain awareness of traffic conditions and be prepared to use the brakes to avoid collisions. This system is an alert system for the front of the vehicle. It is not capable of preventing a collision in all situations. Only the driver can prevent a collision by taking appropriate measures. Therefore, this system intervenes with steering assistance. The intensity of this assistance is also adaptable according to preference.

**REAR CROSS PATH FUNCTION**
Rear Cross Path Function emits a warning when an unseen vehicle is approaching, from the right or left, while the driver is reversing out of a parking space.

**TRAFFIC SIGN RECOGNITION**
Even the best drivers fail to recognize traffic signs on occasion, and for this reason, Traffic Sign Recognition is a particularly useful feature. While monitoring three types of indicators—speed limits, temporary speed limits and conditions like heavy rain, and no-passing zones—the system displays updated signs digitally in the gauge cluster. The Traffic Sign Recognition feature is powered by a digital camera mounted behind the rear view mirror and navigation data.

**FRONT AND REAR PARKING SENSORS AND SURROUND-VIEW CAMERA**
To assist with maneuvering in tight spaces, the Quattroporte comes equipped with parking sensors in the front and rear bumpers. Two cameras beneath the door mirrors, plus front and rear cameras, capture images. These images are then shown on the center display.

**SURROUND-VIEW CAMERA**
This provides a clear view around the car to assist with parking and highlights underneath Foldable obstacles. Two cameras beneath the door mirrors, plus front and rear cameras, capture images. These images are then shown on the center display.

**ACTIVE BLIND SPOT ASSIST**
Active Blind Spot Assist triggers a warning icon in the exterior door mirrors when a vehicle enters the driver’s blind spot. Three levels of support can be selected if the driver continues with or on the lane change. The system monitors the area either side of the vehicle and issues a warning if a vehicle enters the blind spot. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions.

**FORWARD COLLISION WARNING**
All Quattroporte models are equipped with the Forward Collision Warning system, which monitors vehicles ahead and warns if the approach could result in a rear-end collision. This system is a driver’s convenience system, not a substitute for active driver involvement. The driver must retain awareness of traffic conditions and be prepared to use the brakes to avoid collisions.

**TRAFFIC COLLISION WARNING PLUS**
This system is a driver’s convenience system, not a substitute for active driver involvement. The driver must maintain awareness of traffic conditions and be prepared to use the brakes to avoid collisions. This system is an alert system for the front of the vehicle. It is not capable of preventing a collision in all situations. Only the driver can prevent a collision by taking appropriate measures. Therefore, this system intervenes with steering assistance. The intensity of this assistance is also adaptable according to preference.
SAFETY

Maserati engineers have made safety a top priority when designing the Quattroporte, which combines mile after mile of high-powered driving excitement and luxury.

THE MASERATI STABILITY PROGRAM (MSP)
Developed under extreme testing conditions, the Maserati Stability Program (MSP) employs an array of sensors to constantly monitor driving conditions while utilizing a host of safety and performance systems to maintain handling and grip. If a skid is detected, MSP selectively reduces engine torque and can activate the brakes with finely varied inputs to restore stability within milliseconds.

The MSP system works in harmony with features like Anti-Slip Regulation (ASR), which reduces wheel spin and improves traction, and engine brake torque control (MSR), which helps prevent the wheels from locking during sudden downshifts. Additionally, the Anti-Lock Braking System (ABS) and Electronic Brakeforce Distribution (EBD) reduces wheel lockup and distributes brake force evenly between the front and rear axles. Further support is provided by the Brake Assistance System (BAS), which responds to emergency stops by boosting pressure in the hydraulic circuit to maximize stopping power. The Hill Holder function keeps the car from rolling backward as the driver sets off on an uphill slope.

ADAPTIVE FULL LED HEADLIGHTS WITH GLARE-FREE HIGH-BEAM ASSIST
Quattroporte models are fitted with new full-LED headlights that sharpen the striking Maserati look, significantly improve visibility and lower energy usage. These dazzling headlights also lengthen bulb life considerably. Compared with bi-xenon lighting, visibility is improved 20 percent, road illumination extends by 180 feet, and bulb longevity is roughly twice as long. Glare-free technology also allows the driver to utilize the full benefits of the headlights without affecting oncoming vehicles. A digital camera behind the rear-view mirror detects approaching vehicles and directs beam light away from them. The surrounding areas, meanwhile, remain safely and effectively lit with near-daylight-quality illumination.

ADAPTIVE FRONT LIGHTING SYSTEM (AFS)
Adaptive front lighting automatically adjusts the width and depth of the headlight beams, providing maximum lighting effectiveness and optimal safety. This is made possible with a camera mounted in the rear-view mirror and sensors that monitor several different parameters, including steering wheel position, vehicle speed and driving behavior. AFS initiates automatically when driving in inclement weather—on highways or in town.

TIRE PRESSURE MONITORING SYSTEM (TPMS)
Standard on all Quattroporte models, TPMS continuously monitors tire pressure via a valve-integrated sensor. In the case of a puncture or a sudden change in tire pressure, TPMS notifies the driver with visual and acoustic warnings. Tire pressure can be viewed on the dashboard display at all times.

AIR BAGS AND ACTIVE HEADRESTS
The Quattroporte is equipped with six air bags. Two front air bags, both dual-stage, shield the driver and front passenger in the event of a collision. Further protection is provided by side and curtain air bags. The front seats also feature active headrests, which automatically move closer to the occupants’ heads to reduce the risk of whiplash injury.

MASTER MASERATI DRIVING COURSES

These comprehensive courses allow participants to experience the performance of the full Maserati model range, with programs structured for specific levels of driving skill. Offering the ultimate driving experience in a track setting, each course is supervised by professional competition drivers whose aim is to improve every participant’s skills in an environment that is challenging and fun.

Participants develop their skills on a highly technical circuit through coursework that includes advanced driving techniques, dynamic handling on the track, exercises in low-friction surfaces and telemetry data analysis. The goal is to achieve a fluid relationship between car and driver, leading to more enjoyment at the wheel in all driving conditions. Master Maserati courses are held on the Varano de’ Melegari (Ravenna) circuit, a track with high safety standards and excellent on- and off-road facilities, situated in the Italian countryside. The Master Maserati driving courses also include an exclusive opportunity to tour the Maserati Modena factory.

MASTER TRACK WARM UP
Unforgettable—for your first track experience

This course is the ideal foundation for all upper-level Master Maserati courses, preparing drivers for the exhilarating world of Maserati. In a half-day program offered in select US markets, participants learn the basic principles of sporty driving on a world-class racetrack. The curriculum includes theoretical and dynamic exercises on the circuit and on low-grip surfaces.

MASTER TRACK PERFORMANCE
Raise the intensity level

The Master Track Performance course is designed for those who want to enhance their driving skills at the wheel of a Maserati. This intense, one-day program, offered in select US markets, comprises several dynamic sessions focused on individual driving techniques, all with the support of on-board video and a team of expert instructors.

MASTER TRACK HIGH-PERFORMANCE
An uncompromising step forward

This two-day course builds on the concepts introduced in the previous two programs, with the aim of honing theoretical and practical skills in the classroom and on the track. Advanced drivers will engage in technical, high-speed maneuvers with the support of telemetry data from track sessions. The Master Maserati Drivers Team will design a program for each participant according to his or her specific needs and expectations. The course is conduced by a thrilling session behind the wheel of the GranTurismo MC GT4, Squadre Clienti Maserati’s International GT4 race car.

MASTER ALL-TERRAIN PERFORMANCE
Introduction to all-terrain techniques

This course combines track techniques with an effective approach to off-road driving. The full Maserati model range is used, but with a focus on the Maserati Levante—demonstrating the marque’s immense capability off the beaten path. This single-day program introduces participants to driving off-road before they perform exercises on the circuit and on low-grip surfaces.

MASTER ALL-TERRAIN HIGH PERFORMANCE
The ultimate Maserati off-road experience

This two-day program builds on the techniques introduced in the all-terrain introduction. The entire Maserati range is involved, but pride of place goes to the Levante and its impressive off-road capabilities. Training is focused on challenging technical obstacles and extreme off-road areas before reaching a heart-pounding conclusion in the high-speed dirt track area. This is your opportunity to harness the full power of the Maserati of SUVs.

MASTER MASERATI INCENTIVE

FINANCIAL SERVICES

Your authorized Maserati dealer will be pleased to provide you with professional guidance on the various lease and finance options available, and create a package tailored to your individual requirements.

FACTORY TOUR

Learn about the talent required to produce some of the world’s most stylish sports cars by visiting the Maserati plants in Turin and Modena. Our exclusive, 90-minute factory tour includes a welcome reception in our showrooms and a presentation of more than 100 years of Maserati heritage. The tour also includes a guided walk of the factories, an opportunity to view the finished cars and a chance to browse the Maserati store.

SHOWROOM TOUR (MODENA ONLY)

For those short on time, we also offer a 40-minute guided showroom tour. After a welcome reception and heritage presentation, your guide will discuss the entire Maserati model range displayed in the Modena showroom. Commentary can be provided in English, Italian, German, French or Spanish. It is also possible to combine the Maserati Factory Tour with a Master Maserati Driving Course and experience the entire World of Maserati. For more information and registration, contact: factorytour@maserati.com

MASERATI COLLECTION

The Maserati Collection of exclusive leisurewear and branded merchandise has been specially designed for those with a passion for all things Maserati. Maserati Collection items are available from all authorized Maserati dealers and the Maserati Store at our showroom in Modena. Items can also be purchased online at maseratistore.com and delivered directly to your home.

THE WORLD OF THE TRIDENT

MASERATI CLUB

Joining the exclusive Maserati Club means sharing insights, experiences and excitement with other Maserati owners. Members also receive invitations to special motoring events all over the world. Owners of Maserati automobiles from every era will enjoy driving their cars in a calendar of events created especially for club members. The Maserati Club provides a link between the past, present and future of the company. Visit maseraticlub.com for more information.

MASERATI GENUINE ACCESSORIES

Maserati Genuine Accessories offer the perfect combination of exclusive design and exceptional functionality. The attention to detail, style and quality of each accessory reveals the very essence of the Maserati brand. Maserati-branded transport accessories, for instance, include a luggage compartment mat, a foldable luggage compartment box and a ski/snowboard bag. Also offered are Maserati Factory Tires and stylish car covers. An extensive range of Genuine Maserati Accessories can be viewed at the official website maserati.com and are available from your authorized Maserati dealer.

MASERATI CLASSICHE

Created for enthusiasts and owners of vintage Maserati automobiles, Maserati Classiche is an organization dedicated to those who wish to engage with the marque’s glorious past. Maserati Classiche includes products that celebrate the company’s history, including paintings of momentous events, pictures of classic Maserati models, original reproductions of parts catalogs, owners’ handbooks and historic literature, clothing, scale models and more. For more information, contact maseraticlassiche@maserati.com
The illustrations and texts contained in this brochure are based on information available at the time of production and do not contain a description of specific characteristics of the car by the Manufacturer. Some models, equipment and accessories may not be available or may become available only after the automobile's launch on the market. Maserati reserves the right to modify colors, designs and technical features at any time and without advance notice. Official Maserati dealers will be glad to provide further details and updates on this regard. ©2018 Maserati North America, Inc. All rights reserved.
