Benefits of ZurichShield® Premier

Zurich Shield Premier will be professionally reapplied should warranted damage to the vehicle's interior and exterior surfaces occur. Interior areas affected by fading, permanent stains, rips, tears and punctures will be repaired or replaced before Zurich Shield Premier is reapplied. Exterior surfaces with environmental damage will be prepped and reapplied with Zurich Shield Premier. This may include the removal of minor dents utilizing standard paintless repair methods in order to maximize the long-term effectiveness of Zurich Shield Premier.
