

2010 Outback

Love. It's what makes a Subaru, a Subaru.

Introducing the all-new 2010 **Subaru Outback**.

When leaving it all behind, start with your limitations.

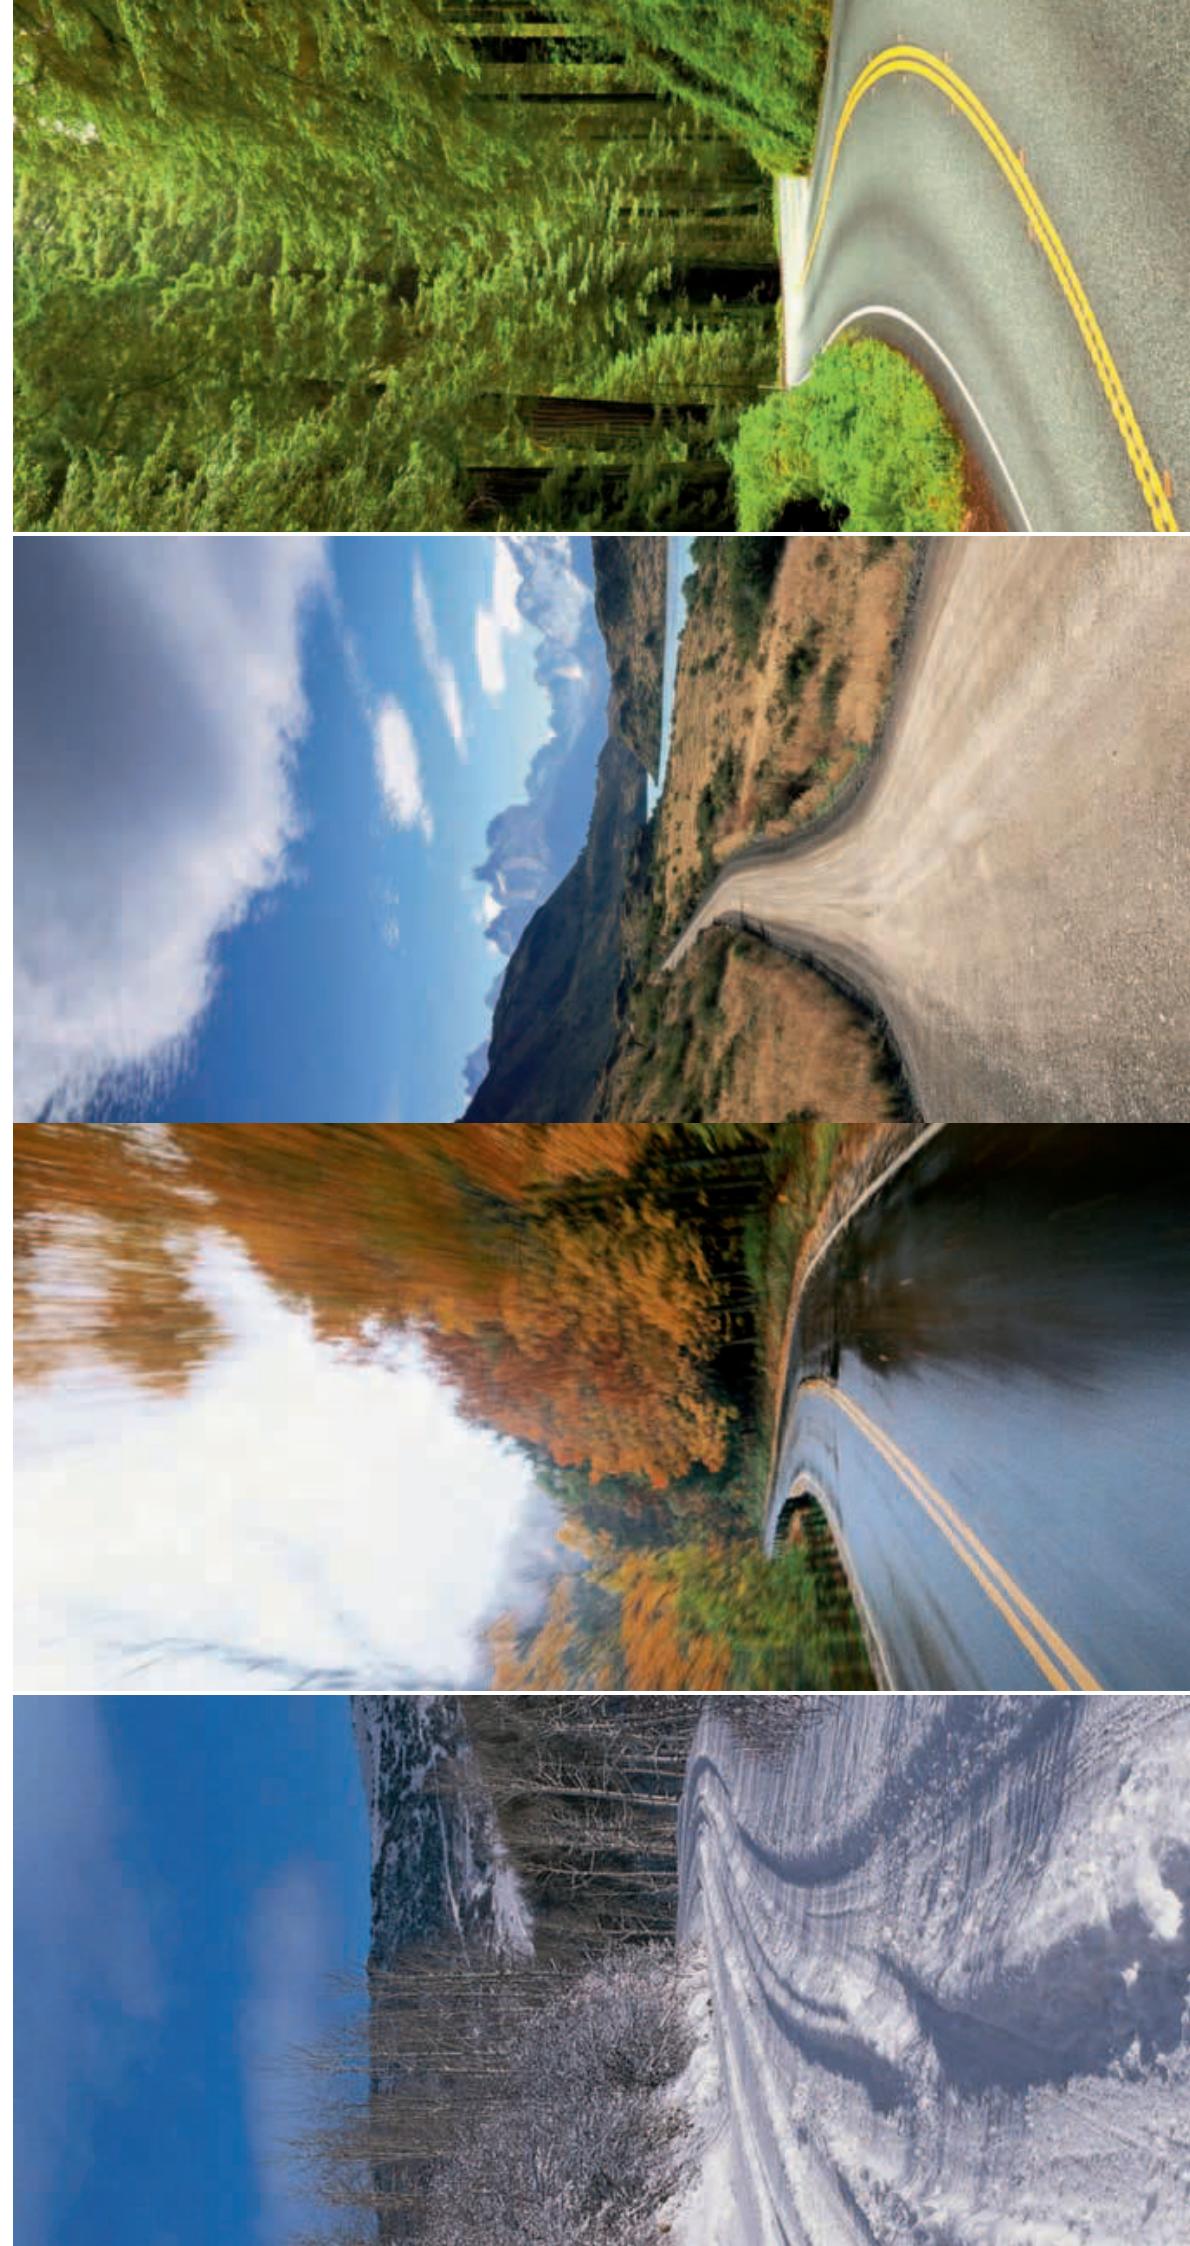

Love the possibilities.

A new hobby. A new tradition. A new way to challenge yourself. A new adventure every day. Subaru vehicles are uniquely designed and equipped to get you out, to keep you going, and to inspire you to embrace more of life's opportunities. It all starts with the balance of Subaru Symmetrical All-Wheel Drive. Standard on every Subaru, it gives you the stability and control to drive where you want, when you want—always with the greatest confidence. That poise is matched with the reassurance of being protected by award-winning safety. It's why we hear again and again, "I love my Subaru."

Love. It's what makes a Subaru, a Subaru.

All wheels. All roads.
All the time.

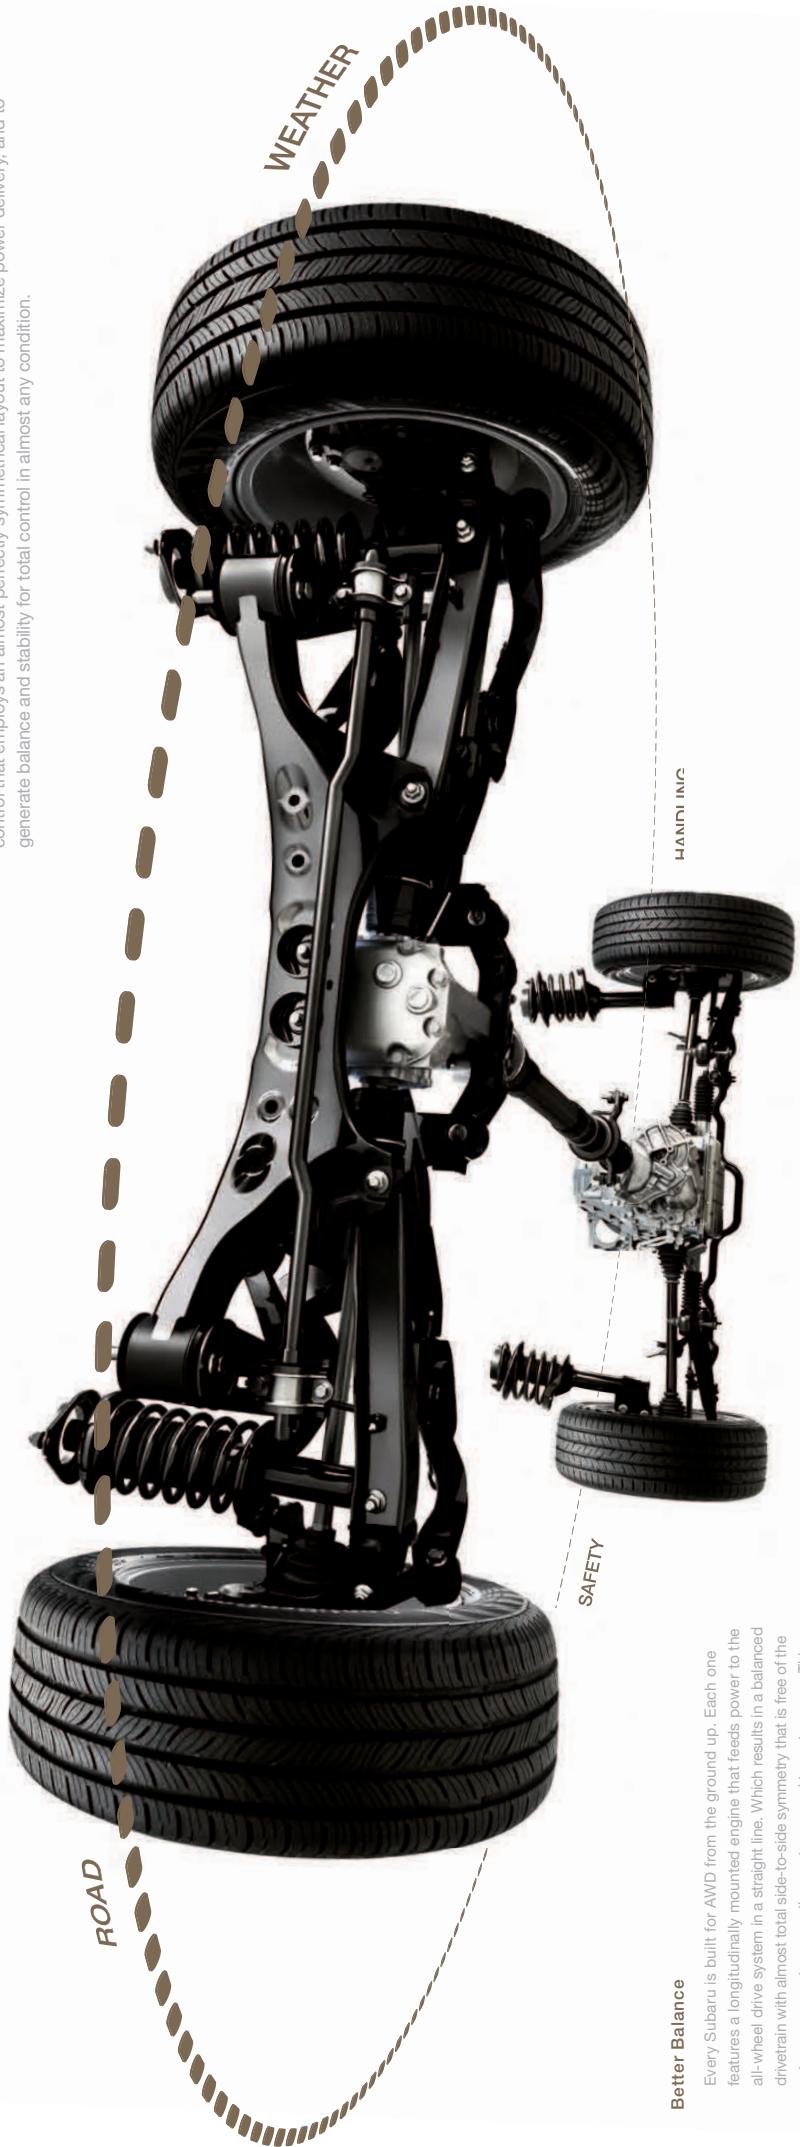

By combining the balance and road adhesion of Subaru Symmetrical All-Wheel Drive with the stability of the SUBARU BOXER® engine, Subaru builds more than cars—we build confidence. Confidence that can help you enjoy getting there as much as being there. And can help you feel the freedom to live more of the life you love.

Better grip for better adventures.

All-road Agility | All-weather Conditions | Active Safety | Confident Handling

Subaru Symmetrical All-Wheel Drive

In any season or condition, confidence behind the wheel comes from one place—where your tires meet the road. Wet or dry. Rough or smooth. A sure grip of the road can give you the control to step around danger. The assurance to add more destinations to your list. The engagement to delight in every mile. Subaru has spent nearly 40 years developing a system for traction and control that employs an almost perfectly symmetrical layout to maximize power delivery, and to generate balance and stability for total control in almost any condition.

Better Balance

Every Subaru is built for AWD from the ground up. Each one features a longitudinally mounted engine that feeds power to the all-wheel drive system in a straight line. Which results in a balanced drivetrain with almost total side-to-side symmetry that is free of the extra components some other systems need to route power. This symmetry and balance means stability that helps make driving your Subaru safer and agility that makes it more fun.

Quicker Response

There are only four small patches of rubber that keep you in control of your vehicle. The more your tires are engaged, the more control you have. Subaru Symmetrical AWD keeps power routed to all four wheels to keep components—and frictional power losses—to a minimum. All while maximizing the seamless feeling of traction whenever you need it.

Efficient Design

Because some systems lack the simplicity of Subaru Symmetrical AWD, they not only sacrifice efficiency, but also can incur more wear and tear. Subaru routes power directly from the engine to all four wheels to keep components—and frictional power losses—to a minimum. All while maximizing the seamless feeling of traction whenever you need it.

Learn more about the benefits of Subaru AWD.
subaru.com/awd

An engine that runs on good ideas.

Subaru Boxer Engine

We think about engines a little differently. We believe an engine should deliver both power and control. It should conquer back roads and handle parking lots just as well. That's why every Subaru is powered by the SUBARU BOXER® engine. Its horizontally opposed design and symmetrical layout provide plenty of smooth acceleration, but also balance and stability that set it apart from engines with "V" or inline configurations. It's an intelligent difference that has the power to inspire you to go further every time you set out.

Horizontally Opposed Design

The pistons move in 180-degree opposition to each other on a horizontal plane, so each naturally cancels out the vibration of the piston opposite it.

Smoother Operation

Step on the accelerator and the revs come on smooth. While there's plenty of power when you need it, it never compromises your comfort or control.

Durable Construction

The engine's flat design is inherently rigid, and reduces the amount of vibration that "V" or inline engines—with more upright pistons—are subjected to during operation.

Lower Center of Gravity

The flatter profile and perfectly symmetrical design of the engine block, and the fact that it sits lower in the chassis, make the overall vehicle more stably balanced and resistant to side-to-side motion than other designs.

Increased Durability

An engine subjected to less vibration lasts longer. It's no wonder 94% of Subaru vehicles built in the last 10 years are still on the road today.¹

¹ Based on R.L. Polk & Co. registration data in the U.S., 1998 to 2008.

Greater Agility

The vehicle responds more quickly to changes in direction, which gives a feeling of tightness in turns. And it's less likely to become unstable during maneuvers, giving you an increased feeling of being in control at all times.

how our engine compares.
subaru.com/boxer-engine

Life begins at dirty.

Up to 256 Horsepower

Lineartronic™ CVT

8.7-inch Ground Clearance

Ruggedly capable.
Incredibly driveable.

Outback 3.6R Limited in Steel Silver Metallic.

All-condition Performance

Remote hiking trails? Muddy single track? Powdery ski runs? Whatever fills you with wanderlust, the Outback has what it takes to fill you with confidence on your journey there. Subaru Symmetrical All-Wheel Drive holds tight to virtually any surface you encounter on the way. Opt for the efficient 2.5i and get smooth, reliable performance to power you through. Or, get the 3.6R and have 256 horsepower seamlessly on tap. If the way turns rough, 4-wheel independent suspension with class-leading ground clearance will help you take it on. And the Outback now features a double-wishbone design rear suspension and improved wheel articulation to combine smooth-riding comfort with inspiring responsiveness.

Lineartronic™ CVT

The price of performance has just been reduced. Lineartronic™ CVT (Continuously Variable Transmission), now available on Outback 2.5i models, can save you gas money and shrink your carbon footprint. This innovative technology infinitely adjusts the transmission to match your acceleration needs—maintaining the optimal rev range at all times. The need to shift is removed, and vehicle momentum is preserved, thereby reducing fuel consumption. And for tackling steep grades, or for quicker acceleration, 6-speed manual mode and paddle shifters give you immediate access to higher revs and more engine power.

Get out there.
Fit it in here.

Versatile Roof Rack | Underfloor Cargo Storage | 71.3 cu. ft. Cargo Space

Cargo Capacity

From mountain bikes to water bottles, the all-new Outback is better equipped than ever to conveniently load all the gear that goes along with embracing your adventurous side. Keep more items conveniently at hand with an array of compartments, pockets and holders. You'll have eight cup holders, door handle pockets sized perfectly for a cell phone or an MP3 player, and a two-stage center console bin, among others. In the back, cargo hooks that fold flush when not in use help keep items where they belong. And the underfloor cargo-area storage compartment keeps valuables safely and discreetly stored, as well as having a spot perfect for storing the retractable cargo cover.

Retractable Cross Bars

A new take on taking it with you. This unique design, available for the first time on the 2010 Outback, features cross bars that fold up and tuck away into the body of the integrated roof rails. It's a convenient way to reduce wind noise and improve vehicle aerodynamics, and avoids the problem of having to store the cross bars when not in use. What's more, they come standard on every Outback.

Integrated Roof Rails

When gear has to go on the outside, the Outback can easily accommodate some pretty heavy-duty equipment. The easy-to-reach roof rack system – standard on the Outback – will hold up to 100 pounds. And because Subaru has a wide selection of accessory attachments available, it can quickly be made to accommodate your particular idea of adventure.

Live bigger.
There's room.

Outback 2.5i Limited with Warm Ivory leather, optional moonroof and navigation system.

Reclining Rear Seats

Even with the significant increase in room for rear passengers, those in the back still might desire a more relaxing and comfortable ride. With the reclining rear seats—new for the 2010 Outback—all they have to do is pull a lever, lean the rear seat back, and their part of the journey will be made all the more rewarding.

More Interior Space

For 2010, the interior of the Outback has been completely redesigned with expanded proportions in almost every area. This new design makes getting in, getting out, loading and unloading easier and your adventures more enjoyable. Not only is there more headroom in front and back, but the driver and front passenger will enjoy a sizable increase in hip room, and rear occupants will have nearly four inches more legroom. And with features like 60/40 folding rear seats that allow you to haul large items and passengers, all this space is just as intelligently distributed as any previous Outback.

Voice-activated Navigation

harman/kardon® Audio

Dual-zone Climate Control

Ready, willing and comfortable.

Interior Features

In the 2010 Outback, you'll find the right features designed in the right way to make every journey more rewarding. Long and short treks are more enjoyable with optional power adjustable front seats, now with power adjustable lumbar support. Also, if you opt for the 9-speaker harman/kardon premium audio system, all of your adventures will have a stunning soundtrack. And you won't have to ignore the scenery or the road to enjoy the convenience of available features like steering wheel-mounted controls, the voice-activated navigation system, and Bluetooth® hands-free calling.

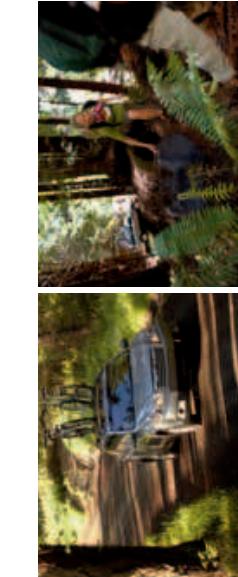

This is how we show our love.

Building Cars That Last

Life is too important to slow down with a car you can't rely on. That's why we build each of our vehicles with the highest standards of manufacturing, and with designs that are inherently tough, and engineering that can keep you going, and keep you out there. This commitment is why 94% of all the vehicles we've built in the last 10 years are still on the road today.¹ And why a Subaru can keep its value, and stay out of a landfill longer.

¹ Based on R.L. Polk & Co. registration data in the U.S. 1998 to 2008.

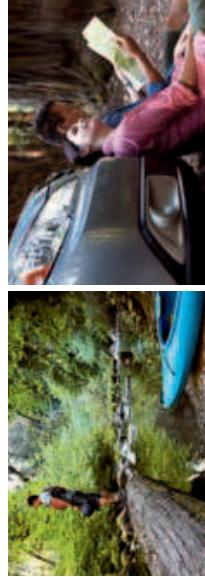

Supporting Partners That Care

Subaru has spent decades building relationships with dozens of organizations that believe in building a cleaner, greener, healthier and more hopeful world as much as we do. That's why you'll see us offering our support at events like Dining Out for Life, or promoting responsible recreation with Leave No Trace. Our recent Share the Love sales event harnessed the generosity of Subaru owners to raise nearly five million dollars for deserving causes like the ASPCA and Habitat for Humanity.

Protecting Your Investment

Once you're part of our family, we'll be there for you. Every Subaru comes with 24-hour roadside assistance for 3 years or 36,000 miles. If you have trouble on the road, a tow to the nearest Subaru dealership and other services are just a phone call away. And to protect you over the long haul, we offer Subaru Added Security[®]—extended service agreements and maintenance plans that will help protect your car for up to 7 years or 100,000 miles. They're the only mechanical and maintenance plans backed by Subaru of America, Inc., and because we've been backing them for more than 25 years, they're agreements you can trust. Your dealer has full coverage details.

Ensuring You're Fully Covered

We know you love your Subaru, but sometimes accidents happen. Subaru Equity Shield[™] GAP could help you avoid further sorrow by paying all or most of a possible difference between what your insurance company covers for your Subaru that was totaled, or stolen and not recovered, and what you still owe in payments. It will even cover your deductible for up to \$1,000. Also, being part of the Subaru family may save you money on some types of insurance, such as auto and homeowners. Subaru owners may be eligible for exclusive rates through Subaru Advantage Insurance by Liberty Mutual. Find out more at subaru.com.

Protected from every angle.

★★★★★
for front and side-impact collisions!
National Highway Traffic Safety Administration

When it comes to feeling confident, nothing is more important than feeling safe. That's why Subaru places safety as one of our highest priorities, and why we think about safety in 360 degrees. First, we engineer our vehicles with exceptional control and advanced accident-avoidance technologies to help keep accidents from happening in the first place. Then, we build every Subaru with protection technologies that have won safety awards and distinctions year after year. The end result is a car that—in a worst-case scenario—is one of your best possible bets.

Exceptional Control

Safety begins with avoidance. The traction and balance of Subaru Symmetrical All-Wheel Drive and the stability of the SUBARU BOXER® engine provide you with the outstanding control you need to react to hazards. Every Outback also comes standard with VDC electronic stability control, which can detect a loss of control and intervene to help keep you on your intended path.

Subaru Active and Passive Safety

Discover in-depth the
Subaru safety advantage.
subaru.com/safety

Increased Awareness

Before you can avoid danger, you have to see it coming. Not only is the all-new Outback designed for excellent visibility on all sides, it is now available with the rear vision camera. This feature—standard with the navigation system—gives you a clear view of the area behind your vehicle, so you can always be in charge of your surroundings.

All-around Protection

Our Ring-shaped Reinforcement Frame is exceptionally strong for maximum resistance to impact energy, while its unique configuration helps divert that energy away from occupants. To further help prevent injury, an array of sensors, including the new rollover sensor, can detect an impending crash and deploy front, front-side and side-curtain airbags²—working to surround and cushion outward occupants.

Stopping Power
Powerful and reliable vented disc brakes are teamed with advanced technology to help you stop short of danger. Antilock brakes help make sure you don't lose traction, and the advanced Brake Assist system helps ensure maximum pressure is applied to the brakes as quickly as possible in an emergency situation.

Everyone collects something.
I collect adventures.

Log on and take off.

What makes an Outback, an Outback.

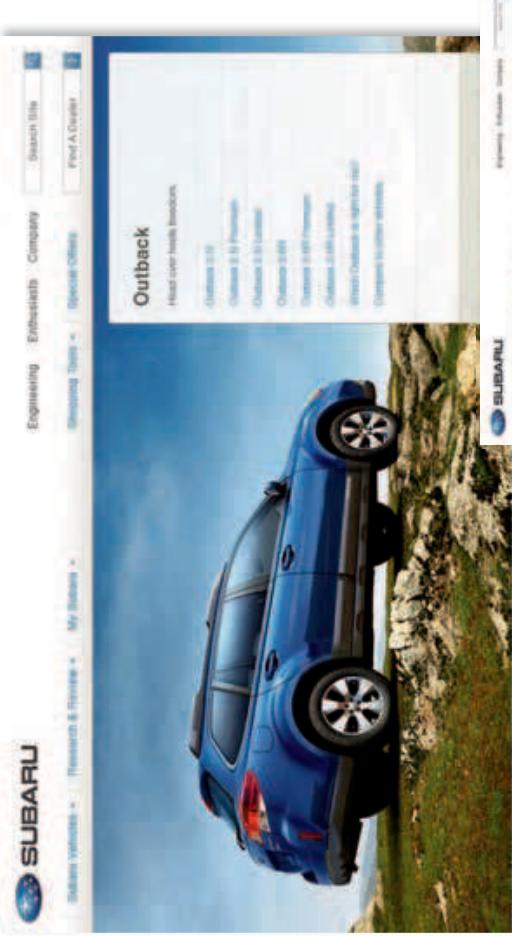

Making the final decision to purchase a vehicle can be complex. That's why you'll find everything you'll need to know about being an Outback owner at subaru.com. Not only will you find images of the Outback and detailed information about it, but you'll also be able to check out special offers, ratings, reviews, and news about Subaru. We've also provided a wealth of interactive tools to help you decide if a Subaru is right for you.

subaru.com/vehicles/outback

Configure your own.

With a wide variety of trim levels, colors and options to choose from, there is an Outback for you. Use this tool, and within a few minutes you'll know exactly which Outback that is.

Outback® Specifications

ENGINE AND DRIVETRAIN		3.6R, 2.5i Premium and 2.5i Limited	
Paint		2.5i Premium	3.6R Limited
Exterior		2.5i Premium	3.6R Limited
FUEL		Manual: 19/27 mpg CVT: 22/28 mpg Unleaded gasoline (87 octane)	18/25 mpg
SYMMETRICAL ALL-WHEEL DRIVE		Models equipped with 6-speed manual transmissions utilize a viscous-type locking center differential with torque distribution normally configured at a 50/50 split front-to-rear. If wheel speed differs between front and rear axles, the system helps distributes power to the wheels with the most traction.	
Continuous All-Wheel Drive	Fuel requirement	Models equipped with 6-speed manual transmissions utilize an electronically controlled variable transfer clutch in conjunction with a viscous-type center differential and a viscous-type torque converter. The torque converter is mounted on the transmission output shaft. Sensors monitor parameters such as wheel slippage, throttle position and braking to help determine torque distribution and direct it to the wheels with optimum traction.	Models equipped with 6-speed manual transmissions utilize an electronically controlled variable transfer clutch in conjunction with a viscous-type center differential and a viscous-type torque converter. The torque converter is mounted on the transmission output shaft. Sensors monitor parameters such as wheel slippage, throttle position and braking to help determine torque distribution and direct it to the wheels with optimum traction.
STABILITY AND TRACTION		VDC electronic stability control utilizes sensors which constantly monitor wheel speeds, steering angle, brake pressure, vehicle yaw rate and lateral g-forces. If VDC detects a difference between the driver's intended path and the one the vehicle is actually taking, VDC applies braking power to one or more wheels to help correct vehicle path.	
Chassis	Vehicle Dynamics Control (VDC) Traction Control System (TCS)	VDC also incorporates an all-wheel, all-speed traction control system which senses a loss of traction and applies braking force to the slipping wheel or wheels, as necessary to maintain vehicle motion.	
WHEELS AND TIRES		When emergency braking is detected by how quickly the brake pedal is pressed, maximum brake pressure is immediately applied.	
Wheels	2.5i Premium and 2.5i Limited: 17 x 7.0-inch 6-spoke aluminum-alloy.	17 x 7.0-inch 6-spoke aluminum-alloy.

Outback® Equipment

**All-weather Floor Mats**

Custom-fitted, heavy-gauge protective mats. Helps protect vehicle's carpet from sand, dirt and moisture.

Not intended for use over top of carpeted floor mats.

**Dog Guard/Compartment Separator**

Separates pets and cargo from the passenger area.

Not for use with child seats requiring tether straps.

**Trailer Hitch**

Heavy-duty rated at 2,700 lbs. towing capacity and 200 lbs. tongue weight.

Hitch ball not included. Trailer brakes may be needed.

**Blueconnect**

Bluetooth® wireless technology with advanced voice recognition allows you to make and receive calls, store phonebook information, and recognize up to seven different cell phones.

Some phones may not be compatible.
Details at subaru.com/blueconnect.

**Ski and Snowboard Carrier**

Holds up to 6 pairs of skis or 4 snowboards. May also be used to carry fishing rods.

**Puddle Lights**

L.E.D. lights activate when vehicle doors are unlocked using the keyless entry. A soft glow illuminates the ground, aiding entry and exit of the vehicle.

**Auto-dimming Mirror with Compass and HomeLink®**

Mirror darkens when headlights are detected from behind the vehicle. Includes a compass and three integrated HomeLink buttons that are programmable for most garage-door openers and other HomeLink-compatible devices.

**Kayak Carrier**

Cradles and securely transports most kayak hull shapes. Includes straps with padded buckles.

**Hood Protector**

Matches the contours of the hood while helping to protect it from bug strikes and stone chips.

**Remote Engine Starter**

Allows vehicle to start by pushing a button from the convenience of home or the office (up to 400 feet away depending on obstructions) so that the vehicle's interior temperature is more comfortable upon entry. Remote confirms when vehicle engine has been started.

**Rear Bumper Cover**

Helps to protect the upper surface of the rear bumper from scratches and dings during cargo area loading and unloading.

**Splash Guards**

Helps protect the vehicle's paint finish from stones and road grime.

The earth isn't disposable. Neither is a Subaru.

The Outback may be uniquely designed for getting out there, but at Subaru, we put just as much emphasis on not leaving it out there. First, we build vehicles for maximum **durability**, because more time spent on the road is less time in a landfill. It's why 94% of the vehicles we've built in the last 10 years are still on the road today.¹ We also work diligently to cut waste before the car ever rolls out of the factory. In 2004, Subaru of Indiana Automotive, Inc. (SIA) became the first manufacturing facility in the U.S. to reach **zero landfill status**—nothing from its manufacturing efforts ever goes into a landfill. Subaru facilities in Japan have achieved similar goals in reusing and recycling. And, because clear skies are just as important as clean landscapes, the Outback is one of the few SUVs to achieve Partial Zero Emission Vehicle—**PZEV**²—status and **SmartWay**^{®3} certification. It achieves such cleanliness and efficiency without the negative environmental impact required to manufacture many vehicles with battery-based drive systems, and without compromising performance and versatility.

1 Based on R. L. Polk & Co. registration data in the U.S. 1998 to 2008. 2 Available on 2010 Outback models certified as Partial Zero Emission Vehicles (PZEV) that are sold and registered in California, Connecticut, Maine, Massachusetts, New Hampshire, New York, Rhode Island and Vermont. PZEV emissions warranty applies to only certain states. See your dealer for complete information on emissions and new car limited warranties. 3 For all 2009 Forester, Legacy and Outback non-turbo 2.5i-liter models certified as PZEV that are sold and registered in California and certain other states. Visit www.epa.gov/greenvehicles for more information.

This brochure was printed with vegetable-based inks and produced using a "Green Printing Process" and FSC standards. The Forest Stewardship Council (FSC) is an international organization that brings people together to find solutions which promote responsible stewardship of the world's forests and environments.

By producing this brochure in a green way rather than by traditional methods, we saved 133 trees preserved for the future; 384 lbs water-borne waste not created; 56,534 gallons wastewater flow saved; 6,255 lbs solid waste not generated; 12,316 lbs net greenhouse gases prevented; 94,269,420 BTUs energy not consumed.
