Crystal Fusion™ Advanced Windshield Protection

Windshield Repair Coverage

Crystal
fusion™
TECHNOLOGIES, INC.

The Choice is Clear. Crystal Clear.

Repairs any small cracks, stars or chips on the front windshield caused by road hazards that are repairable through an existing windshield repair process. Windshield repair is a permanent process that removes air from the break and fills it with a curable resin. The process bonds the glass together, restores strength to the windshield, improves the break's appearance and prevents the break from spreading.

***Remove unsightly stars, chips or small cracks from your windshield-
without a deductible!***

Crystal
fusion™
TECHNOLOGIES, INC.

Crystal Fusion™ technology, which is more than just a coating that can peel and blister over time, molecularly fuses with glass to form a hydrophobic barrier. It enhances visibility in bad weather and strengthens glass weight load by up to ten times. As a result, water beads up and rolls away, and small road debris ricochets off.

Benefits of Windshield Repair

- Windshield replacement can cost as much as \$1,000 or more.
- A professional technician will repair your damaged windshield.
- Saves on costly windshield deductible.
