

ENGINE OIL

Change your oil regularly. One of the ways you can keep your vehicle in top operating condition is to change the engine oil as outlined in your Nissan Recommended Maintenance Schedule. Oil lubricates the moving parts of your engine, preventing harmful metal to metal contact, minimizing friction, and carrying away excess heat. By doing these things, oil enables your engine to operate more efficiently, providing you with increased performance and fuel savings

IN-CABIN MICROFILTER

Most Nissan Vehicles are equipped with an in-cabin microfilter that filters out dust, pollen, sand, bacteria, cigarette smoke and other minute airborne particles. A dirty in-cabin microfilter may restrict air-flow volume and cause a drop in the overall performance of your heating and cooling system. Replace your in-cabin microfilter every 18 months or 24,000 k m.

SHOCKS & STRUTS

Shocks and struts influence the control and handling characteristics of your vehicle by holding the tires to the road. They control the action of the spring to resist bottoming out – like when you hit a pothole – and keep the movement of the springs under control when they rebound. Worn shocks or struts prevent required contact when coming out of a dip, or compression in the road. Without shocks and struts, a vehicle would continually bounce and bound down the road making driving hazardous.

OIL FILTERS

Technology in design and manufacturing are the primary difference between oil filters. Genuine Nissan filters incorporate the following features into each filter we sell: The anti-drainback feature minimizes oil drainage from the filter when the engine is turned off; when the engine is turned on later, oil is immediately supplied to all engine components. The high-quality paper is finer and resists clogging and tearing. Combined with up to 33% more area of the filter paper, the Genuine Nissan oil filter is the best choice for removing impurities and ensuring lasting engine life.

BRAKING SYSTEM

Be familiar with the braking system your car uses (eg., drum, disc, ABS, etc.). Ask your Nissan Dealership if you're not sure. If you have Anti-Lock Brakes (ABS), there is no need to "pump" them to avoid skidding. Simply apply the brakes firmly.

TIRE ROTATION

Regular tire rotation prolongs tire life.

Tires are inspected for wear, improper alignment, inflation pressure, and steering/suspension concerns.

Grande Prairie Nissan Detailing

Gold Package \$299.99

- Full interior wipe-down with vinyl and leather conditioning
- Door and Trunk Jam wipe-down
- Vent dust blow-out
- Power steam cleaning of carpet and upholstery
- Window cleaning – both inside and out
- Headliner cleaning
- Exterior soap and wash

Silver Package \$199.99

- Full interior wipe-down with vinyl and leather conditioning
- Door and Trunk Jam wipe-down
- Vent dust blow-out
- Window cleaning – both inside and out
- Headliner cleaning
- Exterior soap and wash

Bronze Package \$89.99

- Vacuum and wipe-down
- Exterior soap and wash

Interior

- Vacuum and wipe-down \$70.00
- Steam clean \$149.99
- Fabric protection \$169.99
- Pet hair/fur removal \$80.00 per hour
- Deodorizer \$50.00
