

# GOOGLE ASSISTANT COMMANDS

This is by no means a comprehensive list of voice commands available to Google Assistant, but a living list of commands geared more towards Volvo cars with Google built in. There may be variations of each command listed below that will accomplish the same task. For example, you'll find you can interchange words like "enable" or "activate." Each voice command sent to the car in the lists below should lead with phrase "Hey Google", "OK Google", or a press of the voice assistant button on the steering wheel. Not all features are available in every car.

## Climate Control

Feature	Examples
Air Conditioning	Turn the air conditioning on.
Airflow direction	Change the vent to body Set air to feet Change the vent to windshield Disable recirculation
Cabin Temperature	Set the temperature to 72 degrees Heat up my Volvo Set the front passenger temperature to 68. Cool down the car * Lower the temperature
