

Jaguar Land Rover South Hills

Recommended 8,000 Mile Service Interval

While the minimum required service interval for your new vehicle is once every 16,000 miles or 12 months, whichever comes first, Jaguar Land Rover South Hills recommends service every 8,000 miles. This recommended service interval will help you protect your investment and keep your vehicle on the road for many miles to come.

Your 8,000 Mile Service Appointment Includes:

Oil Change

Having your oil changed at the 8,000-mile interval will give you added protection and reduce the possibility of engine sludge build-up or failure.

Tire Rotation

This ensures your tread wears evenly, will extend the life of your tires, decrease vibration and noise, and can provide a smoother drive.

Open Recall Check

Our factory-certified technicians will review your vehicle history for open recalls and perform them if applicable.

Professional Carwash

Our team of detailers will vacuum and wash your vehicle after your service visit is completed.

It's very important to follow the manufacturer's required service intervals. If for some reason you miss a service interval, you could cause damage to your engine and you will not have warranty coverage.

Dont' miss out on this offer to protect your investment
