

## Jonathan D. Miller

---

*Vice President and Chief Technology Officer  
J.D. Power and Associates*

Jonathan Miller is Vice President and Chief Technology Officer at J.D. Power and Associates. He is responsible for the company's technology strategy and execution.

Mr. Miller is a business-technology executive and entrepreneur with 25 years in information technology. He has extensive senior-level experience in both large corporations and start-ups and strong engineering process and operational excellence from building enterprise-class business systems and meeting stringent service levels.

Prior to joining J.D. Power and Associates in January 2012, Mr. Miller was the chief technology officer in the Information and Media Segment at The McGraw-Hill Companies, Inc. There, he was responsible for working with business leaders on major technology projects, with a particular focus on technology and engineering. Previously, he was the chief technology officer for Equity Research Services at Standard & Poor's, where he had global responsibility for software engineering, technical project management and quality assurance. Earlier, he was involved in several entrepreneurial ventures, including a software company he co-founded that pioneered employee and manager self-service human resources.

Mr. Miller received a bachelor's degree in physics from Hamilton College in New York and a master's degree in electrical engineering from Columbia University.
