Tire Pressure Monitoring System (TPMS)	20
Volkswagen DoubleCheck	21

Pairing your phone with the RNS 850

First, check your phone's compatibility at www.vw.com/bluetooth.

Start the ignition and turn on the radio.

Press the SETUP hard key on the RNS 850. Press the Telephone soft key, then press the Bluetooth® Settings soft key.

Select "Search for Bluetooth® Devices" and select your phone from the Found Bluetooth® device list.

Select "Hands Free Function." A four-digit PIN will appear.

Press the Accept soft key and enter the same four-digit PIN on your phone to complete the pairing process.**

Pairing your phone with the RCD 550

First, check your phone's compatibility at www.vw.com/bluetooth.

Start the ignition and turn on the radio.

From the Bluetooth® menu on your phone, search for new devices and select VW PHONE.

A connection request will appear on the multifunction display. Press OK on the steering wheel.

The multifunction display will then show a PIN.†

Make sure the same PIN is displayed on your phone and press OK on the steering wheel. Then press PAIR on your phone.**

Text* **PAIR11 to 38981** to watch the Bluetooth® Pairing video.
Standard text and data rates apply.

*Do not text while driving.

**You must enter the PIN on your phone within 30 seconds of entering the PIN on the touchscreen; otherwise the pairing process will restart.

†Some phones may require entering a four-digit PIN (0000) to complete the pairing process.

Bluetooth® Voice Recognition

Call by name

Press the microphone button on the multifunction steering wheel. After the chime, your vehicle's Bluetooth® system will say, "Main menu".

After the chime say, "Call", followed by the name of the person you want to call. For example, "Call Mike Brown".

The system will answer, "Calling Mike Brown".

*Do not text while driving.

Text* **VOICE11 to 38981** to watch the Voice Recognition video.
Standard text and data rates apply.

Voice recognition tips

- The name must be said exactly as it is stored in the directory. If the name is not recognized, ensure you are saying it as it is stored in directory.
- If multiple numbers are stored per name, you may use the shortcut "Call Mike Brown at work", or the system may ask you to choose (e.g. work, mobile, home).
- If at any time during Voice Recognition you wish to cancel a request, simply press the microphone button on the multifunction steering wheel.

LEARN MORE AT
knowingyourvw.com

Important Safety Instructions and Warnings which you must read, are listed on the last panel under BLUETOOTH® TECHNOLOGY.

Dial by number

Press the microphone button on the multifunction steering wheel.

After the chime, your vehicle's Bluetooth® system will say, "Main menu".

Say, "Dial number".

The system will respond, "Number please".

After the chime, say the number. (Speak the number in single digits 1-2-3.)

The system will repeat the number, and then say, "Continue".

After the chime say, "Dial".

Dial by number tips

- If the system repeats the number incorrectly, say, "Correct" and repeat the number.
- You do not have to include a "1" before the area code.

Redial

Press the microphone button on the multifunction steering wheel.

After the chime, your vehicle's Bluetooth® system will say, "Main menu".

Say, "Redial".

The system will respond, "Redial, Dialing".

Help

1. Press the microphone button on the multifunction steering wheel.
2. After the chime, your vehicle's Bluetooth® system will say, "Main menu".
3. Say, "Help", then follow the prompts.
4. You can say, "Help" after any prompt for the system to give you available options. This will take you to further options (e.g. read phone book, call history, or settings).
5. To end prompts, press the microphone button again.

Answer an incoming call

The Bluetooth® system will interrupt your car stereo with a ringtone. Press the phone button on the multifunction steering wheel to answer the call.

End a call

Briefly press the phone button on the multifunction steering wheel.

Image shown is the RNS 850.

Select and save a preset radio station

Press the BAND hard key to toggle from FM, AM or SAT.

Press the Presets soft key located on the bottom of the display to choose a preset group.

Turn the tuner knob to select a station.

Then press and hold a preset station soft key until you hear a confirmation tone.

Program your radio to scroll through presets or the station list

You can program the arrow buttons on your steering wheel or on the infotainment display to scroll through preset stations or the station list.

1. Press the SETUP hard key, then press the Radio soft key.
2. Tap the Arrow keys soft key, and select either Station list or Presets on the drop-down menu.

Streaming audio with Bluetooth® technology

First, you'll need to activate your car's Bluetooth® audio function. You'll only go through these steps the first time you stream audio.

Make sure your device is paired with your car's Bluetooth® system.

Press the SETUP hard key.

Press the Telephone soft key.

Press the Bluetooth® settings soft key.

Tap the Bluetooth® audio (A2DP) soft key and make sure the box is checked.

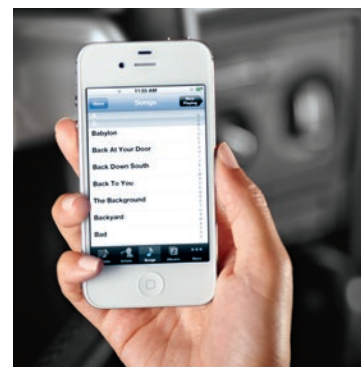

Scroll down and tap the Bluetooth® device list soft key.

Press the soft key with the name of your connected device.

Press the Audio player soft key.

From now on, all you will need to do in order to stream audio is:

1. Press the MEDIA hard key.
2. Press the SOURCE soft key, followed by the BT soft key.

Enter a destination (voice command)

Press the Talk Button on the steering wheel and listen for the chime.

Say, "Enter destination".

When prompted for the city name, respond after the chime.

Follow the same steps to enter the street name. When prompted to enter the address number, be sure to say the number as single digits.

After entering the address, say, "Yes" to start route guidance.

NOTE: If a mistake or correction has been made in the process of entering the address, simply say, "Correction" to re-enter the information.

TIP: At any point when entering an address, you can say "Start route guidance".

Enter a destination (manual input)

Press the NAV hard key.

Press the Destination soft key.

Press the New dest. soft key.

Press the Address soft key.

Press the City/zip soft key. The keypad will appear. Enter the city or zip code, and press OK.

Press the Enter Street soft key, use the keypad to enter the name of the street and press OK. Then follow the same steps with the Enter House Number soft key.

Press the Start Route Guidance soft key to display the route.

Change the route settings

The system will automatically display the fastest route. You can also have the most economical or shortest route displayed.

Press the SETUP hard key.

Press the Navigation soft key.

Enable "3 alternative routes" by checking the soft key. The alternative routes will be displayed after entering a destination.

NOTE: You can change the route settings before or after entering the address.

To cool or heat the interior

Turn the temperature dial to 72°F.

Press the AUTO button.

Like a thermostat, the system will maintain the temperature.

Program the fan speed for the AUTO setting

Press the CLIMATE hard key.

Tap the AUTO soft key repeatedly to select from a low, medium, or high fan speed.

The Climatronic system works automatically to heat or cool the car's cabin and regulate the fan speed as needed.

Apply the driver's climate settings to the entire cabin

Select your preferred temperature with the left temperature dial.

Adjust the fan speed and vents if necessary.

Press the SYNC hard key. The light in the hard key will go on.

Now, the driver's settings will be applied to the cabin's four climate zones.

Defrost the windshield

1. Press the defrost button next to the left temperature dial.
2. For optimal performance, the AC function comes on automatically to dry the air.
3. When the windshield is clear, press the AUTO button.

Text* **CLIMATE11** to **38981** to watch the Climatronic and Automatic Climate Control video.
Standard text and data rates apply.

*Do not text while driving.

Activate

Pull the cruise control stalk toward you. The speedometer icon will appear in the multifunction display.

Text* **CRUISE11** to **38981** to watch the Cruise Control Operation video. Standard text and data rates apply.

*Do not text while driving.

Set cruising speed

When you get to your cruising speed, press the SET button at the end of the stalk.

Your speed will appear next to the speedometer icon.

The green CRUISE light will appear in the instrument cluster.

To increase/decrease your speed to the nearest increment of 5 mph, tap the stalk up or down.

To increase your speed by 1 mph, pull the stalk toward you.

Cancel and resume

- To cancel and resume cruise speed, press the brake pedal or slightly push the stalk away from you. The CRUISE light will go off.
- To resume, pull the stalk toward you. You'll resume cruising at your saved speed.

The speedometer icon and your set speed will appear in the bottom margin of the multifunction display. The icon and set speed will become more prominent when cruise control is activated. Your speed will remain in memory until you turn off either the cruise control or your Touareg.

Key Fob Programming

Program either the driver's door or all the doors to unlock with one press of the key fob.

Press the CAR hard key.

Press the Vehicle Settings soft key (for the RCD 550) or the Settings soft key (for the RNS 850).

Scroll down to the Central locking soft key and tap it.

Select the Unlock doors soft key.

Select "All" or "Driver only".

"All" unlocks all doors with one press of the unlock button.

"Driver only" unlocks the driver's door with one press of the unlock button.

 Important Safety Instructions and Warnings which you must read, are listed on the last panel under KEY FOB.

*Do not text while driving.

Setting the Clock

Setting the clock on a Touareg equipped with the RNS 850 navigation system

Turn the ignition on.

Press the SETUP hard key on the infotainment system.

Press the System soft key.

Scroll down to the Set Time soft key and tap it.

Use the arrow buttons to set the time.

Once you have the correct time set, press OK.

Driving on today's roads demands the full attention of the driver at all times. Driver distraction causes accidents, collisions, and serious personal injury. Never use the buttons in the instrument cluster while driving.

LEARN MORE AT
knowingyourvw.com

 Text* **FOB11** to **38981** to watch the Key Fob Programming video. Standard text and data rates apply.

Setting the clock on a Touareg equipped with a RCD 550 non-navigation system

With the ignition on, press the CAR hard key on the infotainment system.

Press the Vehicle Settings soft key.

Then the Set Time soft key.

Use the arrow buttons to set the time.

Once you have the correct time set, press OK.

Setting the clock in the radio infotainment system also sets the clock in the instrument cluster as well.

 Text* **CLOCK11** to **38981** to watch the Clock Setting video. Standard text and data rates apply.

*Do not text while driving.

Panoramic Sunroof

Set to comfort position

To open the sunroof to the comfort position, which will help minimize variations in cabin pressure and wind noise, turn the dial to the largest circle.

Open

Simply turn the dial clockwise to any dot.

To open the sunroof completely, twist the dial clockwise as far as it will go and hold.

When the sunroof opens, the windscreen will automatically rise. This will help reduce wind noise.

NOTE: Panoramic Sunroof is available on certain trim lines.

 **Important Safety Instructions and Warnings** which you must read, are listed on the last panel under SUNROOF.

Close

Turn the dial counterclockwise to the closed position.

Tilt

For the sunroof to tilt up, put your thumb under the lip of the sunroof dial and gently push upward. To tilt down, pull down on the dial lip.

Using your sunshade

There are two arrow buttons inside the dial that move the sunshade forward or back.

One touch of the relevant button opens or closes the sunshade all the way.

To stop the sunshade while it is moving, press the button again.

Text* **SUNROOF11** to **38981** to watch the Panoramic Sunroof Operation video. Standard text and data rates apply.

*Do not text while driving.

Memory Seats

Setting your memory seats and mirrors

Press the SET button, located on the driver's door.

Press one of the numbered memory buttons until you hear a tone.

The side mirrors are programmed along with the seat position. When you press your program button, they will adjust automatically.

Text* **SEATS11** to **38981** to watch the Memory Seats video. Standard text and data rates apply.

Two ways to recall memory seat settings

Briefly press the corresponding memory button when the door is open.

OR

When the door is closed, press and hold the corresponding memory button until the seat and mirrors move to your set memory position.

NOTE: Memory Seats is available on certain trim lines.

*Do not text while driving.

LEARN MORE AT
knowingyourvw.com

Important Safety Instructions and Warnings which you must read, are listed on the last panel under MEMORY SEAT.

Use the rain-sensing wipers

From the OFF position, move the wiper stalk one click up to activate the rain-sensing wipers. The rain sensor automatically turns on the wipers when it begins to rain, adjusting the wiper frequency in line with rainfall intensity.

The rain sensor's sensitivity can be adjusted manually.
Adjusting the sensitivity of the rain sensor:
Move switch to the right – high sensitivity.
Move switch to the left – low sensitivity.

NOTE: Be sure to turn off the rain-sensing wipers before going through a car wash.

Continuous

LOW: From the OFF position, move the wiper stalk two clicks up.

HIGH: From the OFF position, move the wiper stalk three clicks up.

Pulsing/quick wipes

From the OFF position, press the wiper stalk down for a single wipe.

Press and hold the wiper stalk down for two seconds for a faster wipe.

Text* **WIPERS11** to **38981** to watch the Windshield Wipers video.
Standard text and data rates apply.

Wash

Pull the stalk toward you to spray washer fluid.

Rear Wiper

Simply push the lever one click away from you. Anytime you have the front wipers on and you put the car into reverse, the rear wipers activate automatically.

Rear Wash

To clean the rear window, push the lever two clicks to send a spray of washer solvent onto the rear window and to activate the rear wiper. You can also hold it in this position for longer washing.

*Do not text while driving.

You must be carrying your vehicle key (e.g. in your pocket, hand, purse, etc.).

The ignition must be off, and any keys removed from ignition.

Quickly move your foot and shin as close to the bumper as possible. Your shin must be in the upper part of the sensor's range, and your foot in the lower part.

Quickly move your shin out of range. The rear hatch opens automatically.

 Important Safety Instructions and Warnings which you must read, are listed on the last panel under REAR HATCH.

Tire Pressure Monitoring System (TPMS)

Text* **TPMS11** to **38981** to watch the Tire Pressure Monitoring System video. Standard text and data rates apply.

Seeing the TPMS light? Here's what to do.

To view the current tire pressure

1. Press the right menu button on the steering wheel to scroll to the "Vehicle" menu in the multifunction display.
2. Press the submenu button on the steering wheel repeatedly until the Tire Pressure menu is displayed, and press OK.
3. The current and recommended tire pressure of all four tires will be displayed in the multifunction display.

Multifunction display

Correct tire pressure

If your vehicle's tires begin losing pressure, you will be alerted by the Tire Pressure Monitoring System. The low pressure light will appear, plus your multifunction display will show you which tires are low.

Refer to the tire pressure sticker on the panel inside the driver's door for the proper pressure. DO NOT inflate to the pressure mounted on the tire's sidewall; since this is the maximum inflation the tire can handle when cold.

Inflate the affected tire(s). The "Low Pressure" light will go off.

Cooler temperatures may cause a warning to appear and then disappear as the tires warm up. This is a good reminder to check and adjust the tires to the proper inflation pressure.

Got questions? We've got answers.

Go to knowingyourvw.com

knowingyourvw.com is a dedicated website that provides "how-to" video tutorials for operating many of the features found on your Volkswagen. Video tutorials are able to be viewed from your desktop or on a mobile device.

Call 1-800-444-8982

Contact the Volkswagen Loyalty Center, and a friendly Volkswagen representative will be happy to assist you.

Owning a VW gets even better.

Call your dealer to make an appointment for your Volkswagen DoubleCheck, also known as your second vehicle delivery, within 30-days of ownership. At the appointment, we'll answer any questions you may have about your new Volkswagen, so you can get more out of your vehicle.

Volkswagen Carefree Maintenance*

As a Volkswagen driver, you can visit any VW dealer and receive routine maintenance like oil changes and vehicle inspections from certified techs that speak fluent Volkswagen.

Volkswagen DoubleCheck Appointment:

Month | Day | Year | Time

**Volkswagen
Carefree Maintenance**

2 Years or 24,000 Miles of No-Charge Scheduled Maintenance.
Whichever occurs first. 2014 models. Some restrictions. See dealer or program for details.

knowingyourvw.com

*The Volkswagen Carefree Maintenance Program covers the vehicle's scheduled maintenance for two years or 24,000 miles, whichever occurs first, only on 2014 models. This program does not apply to 2009-2013 models. Some restrictions apply. See dealer or vehicle maintenance program booklet for details.

**Volkswagen
DoubleCheck**

Important Safety Instructions and Warnings

AUDIO

- Driver distraction can cause accidents and serious personal injury. Operating the radio navigation system while driving can distract the driver from traffic situations.
- Always drive attentively and responsibly.
- Select volume settings so that acoustic signals from the outside are audible (e.g. the sirens of emergency rescue vehicles).
- Setting the volume too high can damage hearing. This can also extend to short exposure of the ears to loud volumes.
- Sudden volume fluctuations may occur when the audio source is changed or connected.
- Lower the volume before changing or connecting to an audio source.
- Connecting cables of external devices may obstruct the driver.
- Route cables so as not to interfere with the driver.
- Unmounted or improperly mounted external devices can be thrown through the passenger compartment in the event of a sudden driving or braking maneuver or an accident, causing injury.
- Never leave external devices in the doors, on the front windshield, on or near the area marked "AIRBAG" on the steering wheel, instrument panel, and seat backs or between these areas and the occupants. External devices can cause serious injury in the event of an accident, especially if the airbags inflate.
- The center armrest can interfere with the driver's elbow movement and thus cause accidents and severe injuries.
- Always keep the armrest closed while driving.
- Invisible laser beams can cause injuries if the housing of the CD player is opened.
- Have the CD player repaired only by a specialist.

BLUETOOTH® TECHNOLOGY

- Accidents and injuries can occur if the driver is distracted. Speaking on or using a phone while driving can distract the driver from traffic.
- Select the volume settings so that the acoustic signals from the outside are still

- When going downhill, the cruise control may not be able to maintain a constant speed. The vehicle will speed up because of its own weight. Down shift and/or use the foot brake to slow the vehicle.
- Failure to heed warning lights and instrument cluster text messages can cause the vehicle to break down in traffic and result in a collision and serious personal injury.
- Never ignore warning lights or text WARNINGS.
- Always stop the vehicle as soon as it is safe to do so.

KEY FOB

- Improper use of vehicle keys can result in serious personal injury.
- Always take the key with you when you leave the vehicle. It can be used to start the engine and operate vehicle systems such as the power windows, leading to serious personal injury. Children or other unauthorized persons could also lock the doors and the luggage compartment.
- Never leave children, disabled persons, or anyone who cannot help themselves in the vehicle. The doors can be locked with the remote control key. This could result in people being trapped in the vehicle in an emergency. For example, depending on the time of year, people trapped in the vehicle can be exposed to very high or very low temperatures.
- Heat build-up in the passenger and luggage compartment of a parked vehicle can result in temperatures in the vehicle that are much higher than outside temperatures, particularly in summer. Temperatures can quickly reach levels that can cause unconsciousness and death, particularly to small children.
- Never remove the key from the ignition switch while the vehicle is moving or rolling to a stop. The steering wheel will lock and you will not be able to steer or control the vehicle.

MEMORY SEATS

- Improper use of seat adjustment controls can cause severe personal injuries.
- Before starting to drive always sit properly at all times before starting to drive and while the vehicle is moving. This also applies to all passengers.
- Adjust the memory seat only when vehicle is not moving and at a safe distance from moving traffic.
- Keep hands, fingers, feet and other body parts away from moving parts and adjustment areas of the seats.

- audible (e.g. the sirens of emergency rescue vehicles). Obey all applicable legal requirements.
- In areas without mobile network coverage or with poor mobile network coverage, as well as in some tunnels, garages and subways, phone conversations may be interrupted, and it may be impossible to make phone calls – even emergency calls!
 - In some countries and/or certain mobile networks, emergency calls may only be supported when the mobile phone is connected to a mobile phone package which has a SIM card which is "blocked" and/or has sufficient calling credit on it, and adequate network coverage.
 - A mobile phone on the seat, instrument panel or in other places can be thrown around the inside of the vehicle during a sudden braking maneuver, crash or other accident, and cause injury to vehicle occupants.
 - Never place or mount a mobile phone on doors, the windshield, on or near the area on the steering wheel marked "AIRBAG", the instrument panel, the seat backrests or the areas between these points and the driver/passengers. Mobile phones can lead to serious injuries in cases of accidents, especially when the airbags are inflated.
 - Always switch off your mobile phone at gas stations or wherever there is a fire or explosion hazard. The electromagnetic radiation can cause sparks that can ignite fuel vapors and cause a fire.
 - The mobile phone will automatically connect to the mobile network when the Bluetooth® connection to the mobile phone package is disconnected.
 - Using a radio device in the vehicle without a connection to an external antenna might exceed electromagnetic radiation thresholds. This also applies if the outside antenna is not installed properly.
 - Always keep the cell phone antenna at least 8 inches (20 cm) away from pacemakers. Heart specialists advise that cell phones can adversely affect the way pacemakers work.
 - Never carry a mobile phone that is switched on in the breast pocket directly over the pacemaker.
 - If you suspect there may be interference with a pacemaker or other medical device, switch the mobile phone off immediately.
 - The center armrest can interfere with the driver's elbow movement and thus cause accidents and severe injuries.
 - Always keep the armrest closed while driving.

NAVIGATION & INFOTAINMENT

- Driving recommendations and traffic signs displayed in the navigation system may differ from the actual traffic situation.
- Traffic signs and regulations take precedence over navigation driving recommendations and displays.
- Always adjust your speed and driving style to road, traffic, weather, and visibility conditions.
- Inserting data media while driving can distract the driver from traffic and lead to accidents.
- Always drive attentively and responsibly.

REAR HATCH

- Accidents and severe personal injuries can result if you unlock, open, or close the rear hatch when someone is in the way.
- Only open or close the rear hatch if no one is in the way.
- After closing the rear hatch, always make sure that it is properly closed and locked so that it cannot open suddenly when the vehicle is moving. The closed rear hatch must be flush with the surrounding auto body parts.
- Always keep the rear hatch closed while driving to help keep poisonous exhaust gas from being drawn into the vehicle.
- Never open the rear hatch when a luggage rack is installed and loaded. For example, if there are bicycles on a carrier on the rear hatch, it is possible that the lid will not be able to open automatically. An open rear hatch may fall on its own because of the additional weight. The open rear hatch must be supported or the weight must be removed from the luggage rack first.
- Close and lock the rear hatch and all doors when the vehicle is not in use. First, make sure that no one is left inside the vehicle.
- Never leave your vehicle unattended or let children play around your vehicle, especially when the rear hatch is open. A child could crawl into the vehicle and pull the rear hatch shut, becoming trapped and unable to get out. A closed vehicle can become very hot or very cold, depending on the season. Particularly in the summer, heat build-up in the passenger and luggage compartment of a parked vehicle can result in temperatures in the vehicle that are much higher than the outside temperatures. Temperatures can quickly reach levels that can cause unconsciousness and death, particularly to small children.

CLIMATRONIC® SYSTEMS

- Poor visibility increases the risk of collisions and other accidents that cause serious personal injuries.
- Always make sure all windows are clear of ice, snow, and condensation for good visibility to the front, sides, and rear.
- Maximum heating output and fast defrosting will only be possible after the engine has reached operating temperature. Wait until you have good visibility before driving off.
- Always make sure you know how to properly use the heating and ventilation systems as well as the rear window defogger that you will need for good visibility.
- Never use air recirculation for long periods of time. When the air conditioner is off and recirculation mode is on, condensation can quickly form on the windows and greatly reduce visibility.
- Always switch off recirculation mode when it is not needed. Stale air causes driver fatigue and reduces driver alertness, which can cause accidents, collisions, and serious personal injury.
- Never switch off the fan for a long period of time and never use air recirculation for a long period of time because no fresh air will come into the passenger compartment.

CRUISE CONTROL

- Using the cruise control when it is not possible to drive safely at a constant speed can be dangerous and can lead to an accident and serious personal injuries.
- Never use cruise control when driving in heavy or varying traffic, or when you cannot keep a safe distance between you and the vehicles ahead of you.
- Never use cruise control on steep, winding, or slippery roads (such gravel roads, wet roads, or snowy or icy roads) or on roads with standing water.
- Never use cruise control when driving off road or on unopened roads.
- Always adjust your speed and the distance you keep between you and the vehicles ahead of you to the road, traffic, weather, and visibility conditions.
- To help prevent unintended operation of cruise control, switch the system off when it is not being used.
- It is dangerous to use the Resume feature when the previously set speed is too high for the existing road, traffic, or weather conditions.

SUNROOF

- Improper use of the power sunroof can result in serious personal injury.
- Always make sure that no one is in the way of the power sunroof when it is closing.
- Always take the key with you when you leave the vehicle.
- Never leave children or disabled persons in the vehicle—particularly if they have access to the vehicle key. Unsupervised use of the remote control vehicle key makes it possible to lock the vehicle, start the engine, turn on the ignition and operate the sunroof.
- You can still open or close the power sunroof for several minutes after you switch off the ignition, as long as the driver or front passenger door has not been opened.

TIRE PRESSURE MONITORING SYSTEM (TPMS)

- When the warning symbol appears in the instrument cluster, stop and inspect the tires. Under inflation can cause increased tire wear and can affect the handling of the vehicle and stopping ability.
- Incorrect tire pressures and/or under inflation can also lead to sudden tire failure, including a blowout and sudden deflation, causing loss of vehicle control.
- The driver is responsible for the correct tire pressures for all tires on the vehicle. The recommended tire pressure values are listed on a sticker inside the driver door.
- The TPMS can only work correctly when all tires on the vehicle are filled to the correct cold tire inflation pressure.
