INTRODUCING THE ALL-NEW 2020 ESCAPE

PACKAGING GUIDE

The Flexible, Fun-to-Drive, Sophisticated Utility Vehicle

The All-New 2020 Ford Escape is designed and built to go beyond expectations. With completely new styling and smart technology, Escape will ride confidently and capably into the ultra-competitive Small Utilities segment. Escape promises flexibility, smart driver-assist technology and vibrant design in five distinct trim levels. Additionally, the available Escape hybrid powertrain offers a seamless integration of electric and gas-powered performance. Ultimately, the 2020 Ford Escape enables the customer the freedom of choice.

NEW, NO-COMPROMISE HYBRID MODELS

Escape SE Sport and Titanium models come standard with the Ford-designed, innovative fourth-generation hybrid system. When we say no compromises, that means the electric system blends into the architecture and doesn’t intrude on usable cargo or passenger space.

Hybrid Feature Highlights

• All-new 2.5L iVCT Atkinson-cycle I-4 Hybrid powertrain pairs the gas engine with a battery-driven electric motor
  – Standard on SE Sport and Titanium
  – Ford projected total system 198 horsepower rating
  – Ford projected top speed of 85 mph in electric-only mode
  – Includes 1.1-kWh lithium ion-battery
  – Ford Escape Hybrid with FWD is targeting a best-in-class EPA-estimated range of more than 550 miles\(^1\)
    – The battery-driven electric motor provides added torque delivery
    – New electronically controlled continuously variable transmission (eCVT)
• FWD or available AWD
• Pedestrian Alert Sounder
• Capable of towing up to 1,500 lbs.

\(^1\) Actual range will vary. Final EPA-estimated ratings available later in the 2019 calendar year. Class is Small Utility over 4,480 mm length based on Ford segmentation.

All-new Escape Plug-in Hybrid

Coming Spring 2020!

• Available on SE, SEL and Titanium
• Escape Plug-in Hybrid Electric Vehicle (PHEV), as the name suggests, will have a rechargeable 14.4 kWh lithium-ion battery that powers an electric motor
• Gas-powered 2.5L iVCT Atkinson-cycle I-4 engine
• Escape Plug-in Hybrid is projected to have a best-in-class EPA-estimated range of at least 30 miles in electric-only mode\(^1\)
• The gas engine automatically and seamlessly turns on when the electric charge runs out or when the driver potentially needs more power
• eCVT transmission in this Escape model is engineered specifically for the hybrid system

Plug-in Hybrid Drive Modes

The driver can choose from four drive modes:
• **Auto EV mode** — vehicle decides whether to run on gas or electric power
• **EV Now mode** — drivers can operate on all-electric driving
• **EV Later mode** — drivers can switch to full gas-powered driving to conserve electric miles for later
• **All-new EV Charge mode** — drivers can continue to charge the battery while driving and generate electric-only miles to use later
