You don’t travel with the herd. You find your own road. So you want way more than any conventional multi-purpose vehicle has to offer. You want advanced technology and bold design – on top of such basics as versatility and safety. Where do you find the vehicle that’s made to order for your personality and attitude? Take a close look at the one that’s turning heads in all the right ways – the 2016 Kia Sedona MPV. Don’t just aim for more, get more – way more.

Sedona

WAY BEYOND THE EXPECTED.
Anticipation is everything. Ready to anticipate a truly engaging driving experience? It’s probably not what you expect from a vehicle this capable. But Sedona ups the ante. And while you’re looking ahead to the next stretch of open road, Sedona helps you anticipate any potential hazards that may stand in your way, with available systems like adaptive smart cruise control¹ and blind-spot detection¹ with lane-change assist. There’s lots to look forward to behind the wheel of Sedona.
It’s like fitting a square peg in a round hole. One day, you’re taking the local team across the province – the next you’re moving furniture across town. Does your vehicle roll with the punches? Or does it fight back? Sedona adapts effortlessly. First, it offers available seven and eight-passenger seating. Then it makes the seats highly adaptable. There are available Slide-n-Stow second row seats that slide forward and backward, depending on who or what you’re bringing with you. Yes, you can bring it all with you.

EASY TO LIVE WITH
An available Smart-Power Liftgate opens automatically if you simply stand next to your vehicle for three seconds with the available Smart Key in your possession — which is especially helpful when you have your hands full.

STAIN-RESISTANT CLOTH
Sedona’s cloth seating features repel-and-release YES Essentials® technology for stain resistance, so even messy spills clean up easily. Plus, advanced fibers help eliminate lingering odours that moisture can leave behind.

HEATED AND COOLED SEATS
Available heated front and 2nd row seats help ensure comfortable driving in cold weather. Enjoy optimal comfort in warm weather with available air-cooled front seats that circulate cool air through perforations in the seat leather.

UNIQUE SLIDE-N-STOW SEAT DESIGN
When you need more cargo area, you can take advantage of the available 10 second-row seats’ innovative stand-up design. Simply flip a lever to stand the seats upright, where they stay locked in place. Third-row seats conveniently fold down into the floor, and they also feature a versatile 60:40 split-fold design, giving you the option of carrying a combination of passengers and cargo.

International model shown.
Everyone is a one-of-a-kind. So a one-size-fits-all approach to seating just doesn’t cut it. You need to be able to customize your seating position. That’s why Sedona includes an available twelve-way power-adjustable driver’s seat, including power lumbar support, as well as an eight-way power adjustable front passenger seat. Want to elevate comfort to an even higher level? Choose Sedona SXL with its premium, two-tone Nappa-leather seat trim and reclining second-row, first-class sliding lounge seats. That’s driving – on your own terms.

HEATED STEERING WHEEL
Sedona SX includes a wide variety of luxurious features designed to provide comfortable driving all year long. The available heated steering wheel is especially nice on cold winter mornings.

COOLING GLOVE BOX
An available cooling glove box lets you keep beverages chilled on long drives, while an available second glove box provides additional storage space.

DRIVER’S MEMORY SEAT
Available memory settings for two drivers are located on the driver’s door. They provide the luxury and comfort of personalized ergonomics for the available power-adjustable driver’s seat, including the power sideview mirrors.

NAPPA LEATHER SEATS
With premium full-grain Nappa-leather seating, the Sedona SXL combines an elegant feel and upscale styling for traveling in extraordinary comfort.

DUAL SUNROOF
Front and rear sunroofs on Sedona SXL models let you enjoy a feeling of spaciousness and fill the cabin with fresh air. They also feature dual sliding sunshades that are quick and easy to open and close.
When you shift into reverse, a high-resolution video with active parking guidelines appears on the available rearview camera display. Like an extra set of eyes, it shows you what you might not see in the rearview mirror or by looking over your shoulder.

The available tri-zone air-conditioning system includes a cluster ionizer. It works silently and efficiently within the system, to help purify air in the cabin.

To make everyday driving more convenient, the available Smart Key remote lets you start or stop the engine with the push of a button, even when you have the key fob in your pocket or purse.

The available Smart Welcome system is activated by the available Smart Key remote. When you get close to your Sedona, interior and door-handle lights go on and the power-folding mirror’s unfold.

Feel – it’s what defines that sense of connection behind the wheel. The key is the science of ergonomics. You’ll see plenty of evidence of ergonomics at work inside Sedona. From its steering wheel-mounted controls to the available voice-command navigation system, everything is placed for intuitive operation. Soft-touch material is used throughout the interior, not only adding an upscale look, but also a rich feel to the cabin. It just feels right.

The 2016 Sedona is available with Bluetooth® wireless technology to provide hands-free calling connectivity with Bluetooth®-enabled cell phones.
SAFETY ISN’T ONE THING, IT’S EVERYTHING.

Without a doubt, nothing takes priority over safety. The question is: how is that best achieved? The answer is by incorporating safety into all aspects of design and engineering. In Sedona, that means using a series of advanced safety systems to maintain control, even in harsh road conditions and during a range of emergency situations. Better yet, these safety systems are integrated and designed to function automatically. So you can do your part by concentrating on safe driving.

BRAKE ASSIST SYSTEM
If the Brake Assist System (BAS) detects emergency braking, based on how quickly you step on the brake pedal, it instantly applies full braking force, which helps shorten your overall stopping distance.

HILL ASSIST CONTROL
To help keep you from rolling backward when starting off on a steep hill, Hill Assist Control (HAC) automatically maintains braking pressure for up to two seconds after you take your foot off the brake pedal — enough time for engine power to move you forward.

REINFORCED BODY
The side doors on Sedona are reinforced with steel beams to help absorb impact energy and deflect it away from passengers. The A and B pillars (front and middle support pillars) are also reinforced to help strengthen the body structure.

LATCH SYSTEM
The standardized Lower Anchors and Tethers for Children (LATCH) system makes it easier to securely install a compatible child seat in any of the three rear seating positions.

ELECTRONIC STABILITY CONTROL
Electronic Stability Control (ESC) monitors Sedona’s response to your throttle, brake and steering inputs in tight corners and evasive-maneuver situations. If and when input and response are out of sync, ESC briefly takes over to restore stability through precise brake and engine-control interventions.

HILL ASSIST CONTROL
To help keep you from rolling backward when starting off on a steep hill, Hill Assist Control (HAC) automatically maintains braking pressure for up to two seconds after you take your foot off the brake pedal — enough time for engine power to move you forward.

VEHICLE STABILITY MANAGEMENT SYSTEM
The available Vehicle Stability Management system (VSM) adds steering direction control capability, assisting when appropriate to further stabilize the vehicle. It helps you regain control and return the vehicle to its intended path.

TRACTION CONTROL
Sedona’s Standard Traction Control System (TCS) senses wheel spin during acceleration and uses engine-torque reduction to slow the spinning wheel(s) and transfer torque to the wheels that have the most traction.

CORNERING BRAKE CONTROL
Provides side-to-side brake-pressure proportioning to the electronic brake-force distribution system, resulting in improved vehicle stability when braking into a turn.

Without a doubt, nothing takes priority over safety. The question is: how is that best achieved? The answer is by incorporating safety into all aspects of design and engineering. In Sedona, that means using a series of advanced safety systems to maintain control, even in harsh road conditions and during a range of emergency situations. Better yet, these safety systems are integrated and designed to function automatically. So you can do your part by concentrating on safe driving.
At Kia, we make a promise to everyone who drives our vehicles – a promise to design, engineer and build our vehicles to the most rigorous, world-class standards. This promise guides the development of vehicles that embody Kia’s signature style, precision engineering, outstanding performance, innovative features and advanced safety systems. Our dedication to quality and value has been widely recognized – one reason why Kia has been named a Top 100 brand in Interbrand’s Best Global Brands 2014 report.

In addition, Kia earned two prestigious J.D. Power awards, one for Highest Ranked Large Car in Initial Quality in the U.S. for Cadenza and Highest Ranked Small SUV in Initial Quality in a Tie in the U.S. for Sportage. This honour recognizes our success at producing fuel-efficient and affordable vehicles. While the accolades are always welcome, our mission extends beyond impressing the industry or media. What makes us most proud is exceeding your expectations of a truly exemplary driving and ownership experience.

STUNNING DESIGN
Under the direction of renowned President and Chief Design Officer Peter Schreyer — Kia vehicles have captured worldwide attention for their interior and exterior styling, which represents the collaborative work of designers who have created a look that makes every Kia recognizable at first sight. Today, the lineup consists of vehicles that fill owners as well as Kia’s designers with pride.

EXTENSIVE RESEARCH AND DEVELOPMENT
Kia’s R&D procedures are rigorous and exhaustive. At proving grounds around the world, vehicles undergo unrelenting tests. A world-class wind tunnel provides testing in winds up to 200 km/h. Utilizing heavy-rain-and-snowfall testing chambers and a road simulator, Kia puts its vehicles through punishing tests as part of a commitment to develop exceptionally durable and safe vehicles.

IMPRESSIVE WARRANTY PROGRAM
Kia engineers are passionate about producing vehicles that are exceptionally well-designed and reliable. Their dedication to quality and attention to detail give Kia the confidence to back every model with an outstanding warranty program.

TAKING ON THE COMPETITION
The Kia Racing team is dedicated to competing against world-class competition — and winning. That dedication is part of Kia’s belief that the knowledge gained in competition can be applied to the entire Kia lineup to provide you with vehicles that perform beyond your expectations. The Kia Racing team includes championship-winning drivers with proven track records, and after two podium finishes early in the 2014 season you can look for Kia in the winner’s circle at racetracks across North America in the future.

FIFA WOMEN’S WORLD CUP CANADA 2015
As the FIFA Official co-Automotive Partner, Kia is proud of its initiatives to promote soccer globally. This summer Canada will be hosting the 2015 Women’s World Cup with games played in venues from coast to coast bringing all Canadians together to cheer and show their excitement.

MAJOR LEAGUE SOCCER 2015
Kia is a proud founding partner of all three Canadian MLS teams, sharing a true passion for the game!

YOUTUBE MUSIC AWARDS PRESENTED BY KIA
Kia’s relationship with the YouTube Music Awards builds on the special relationship between music and drivers. It is demonstrated by Kia partnering with numerous music events around the globe. It’s just one more way that Kia stays in tune with the people who drive their vehicles.
Starting with the 2015 model year, Natural Resources Canada in conjunction with the automotive manufacturers, have introduced a new testing procedure that will result in higher fuel consumption and emission values. This change is designed to more representative of everyday driving. Kia Canada is one of the first automotive manufacturers to implement the new testing practice and would like to ensure you fully understand the changes that have been made.
