

# ELEGANCE

The design of the all-new 2017 Lincoln Continental conveys elegance, athleticism and dynamics. Stance and proportion contribute to the car's overall confident presence.

- New Lincoln signature grille and headlamps create a bold statement, and feature the repeating Lincoln star graphic
- Design incorporates aeronautic elements including upswept winglet shape to front signature lighting, mirror pedestals, interior door trim, instrument panel and vents
- Door handles are seamlessly integrated into the beltline for a clean appearance, while new E-latch electronic door handle eliminates any mechanical linkage; and uses a microprocessor to electronically assist in door opening and closing with the simple press of a button
- The design on the Revel speaker grilles goes far beyond look. The pattern has been designed, engineered and tested to produce the best sound possible. Over 200 speaker grille designs were considered to optimize the sound quality

- The Lincoln Embrace detects your approach illuminating front and rear LED signature lighting in a flowing motion, communicating Continental's readiness; Lincoln welcome mat brightens the area around the front doors to assist entry and select interior lighting warmly welcomes you inside

- Available Lincoln Black Label interior themes offer unique woods, leathers and other materials in specific colors and patterns

**CHALET** is inspired by ski vacations, and features high-contrast colors to reflect the bright snow on the slopes countered by dark woods often used in a ski lodge; two-tone steering wheel uses light leather on the inner ring and dark leather on the outer. Silverwood has a dark tone with silver highlights in a pattern inspired by birch trees

**THOROUGHBRED** is inspired by horseracing and it uses rich dark leather resembling that of a saddle on the seats and upper instrument panel. A diamond-quilted pattern that mimics the quilting of a horse blanket is used in select areas of the seats and doors, while Chilean Maplewood is used for trim

**RHAPSODY** is exclusive to Continental. Bright accents including hand-laid aluminum mesh contrast against the blue interior

- Available Perfect Position front seats are inspired by those used in private aircraft; a patented comfort carrier system enhances comfort by conforming to and supporting the body. The seats have available heating or cooling and massaging features and are adjustable up to 30 different ways.
- Instrument panel designed to inform, not overwhelm. It can be customized to display select gauges to show as much or as little information as the driver wants to see
