THE ALL-NEW 2016 LEXUS NX 200T

One look is all it takes to understand that Lexus NX is a different kind of luxury SUV. From its diamond-shaped exterior to the supple layers of leather that cloak the interior, the 2016 Lexus NX brings seemingly incompatible concepts and elements into a harmonious whole. More than 2000 engineers lent their skill to the development of Lexus NX. The results can be found in the attention to detail and intuitive interaction that mark every aspect of this remarkable vehicle.

2016 LEXUS NX 200T

A SENSE OF PERSONALITY

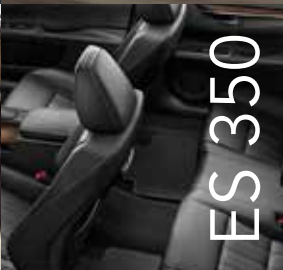

NX's aggressively-styled exterior is distinguished by robustly-carved fenders and sculpture-like outer mirrors. The gem-inspired LED Headlamps make a dramatic first impression on this Lexus SUV, while the seamless LED Tail Lamps speak to exceptional levels of fit-and-finish.

INTUITIVE DESIGN

NX's peaked roofline opens ample headroom for rear seat passengers. The available Moonroof – the largest of its type in the world – increases your sense of freedom. The Keyless Door Handles illuminate upon entry or exit and gradually fade as you drive or walk away.

INCH-TO-INCH INTELLIGENCE

The 2016 Lexus NX brims with intelligent technology like a Wireless Charging Tray and available 6.2" Head Up Display – the largest in the Lexus lineup. Lexus Remote Touch Interface puts command of navigation, climate control and connected devices at your fingertips. While the Power-reclining and Power-Folding 60-40 Rear Seats open up a world of versatility.
