# Why Buy Genuine Land Rover KIT?

**KIT: The Land Rover Retailer-fitted vehicle accessory range engineered specifically for Land Rovers**

Just as all Land Rover vehicles deliver outstanding on- and off-road performance, so does the extensive range of Land Rover engineering-approved accessories. As a complement to the Land Rover owner's lifestyle, these accessories are engineered to ensure seamless integration with Land Rover vehicles.

KIT has no equal — ranking above any aftermarket counterpart — when it comes to proper performance with Land Rovers. Here's why:

## **PREDICTIVE ANALYSIS**

Using the latest predictive stress analysis methods validates the safety and durability of Land Rover KIT.

## **VIRTUAL ENGINEERING**

Computer-Aided Design helps ensure that accessories are conceived to complement the vehicle's lines and stylish looks. This ensures the high quality of fit and finish one expects from Land Rover.

## **ENVIRONMENTAL**

Different climates provide different challenges for these accessories. Land Rover KIT is tested under a range of climate conditions to ensure quality performance.

## **DURABILITY**

All accessories undergo the same test plan as the vehicles themselves — rigorously analyzed far beyond the extremes of normal customer use.

## **RIG TESTING**

Heavily integrated parts, such as roof bars, are developed and tested very early on during vehicle development to ensure seamless compatibility.

## **WARRANTY**

The genuine Land Rover vehicle accessory warranty commences on the date of purchase of the accessory and is covered for 12 months' unlimited mileage or the balance of the new vehicle/emissions warranty, whichever is greater.

# WHEELS

Please note: When choosing vehicles fitted with specific wheel and tire combinations or optional wheels and tires, your intended use of the vehicle should be considered. Wheels with larger diameters and lower profile tires may offer certain styling or driving benefits, but may be more vulnerable to damage. Please discuss your requirements with your Land Rover Retailer for further details.

# INTERIOR

Sporting rich leathers, soft-touch materials and chrome accent pieces, your Evoque's passenger compartment exudes sophistication and attention to detail. To help protect that interior and keep items secure, Land Rover offers a generous inventory of accessories, including loadspace protectors, cargo luggage retention kits and waterproof seat covers.

IN SUPPORT OF

## At Land Rover, we do this by investing in four key areas:

### e\_TERRAIN® TECHNOLOGIES. EFFICIENT POWER SYSTEMS, LIGHTWEIGHT STRUCTURES, REDUCED EMISSIONS

A joint \$1.3 billion investment into new technologies designed to reduce CO<sub>2</sub> emissions and improve fuel consumption. We are targeting a 25 percent reduction in joint fleet average tailpipe CO<sub>2</sub> emissions by 2015 as part of our carbon management plan. The all-new Range Rover Evoque and LR2 vehicles include innovative stop-start technology (on the diesel manual gearbox) and Intelligent Power Systems Management (IPSM) with regenerative braking, just two examples of e\_TERRAIN® TECHNOLOGIES that reduce our vehicles' carbon footprint. What's more, Land Rover's Adaptive Dynamics System constantly monitors vehicle performance, to enhance driving and emissions efficiencies.

#### FACT

We will use lifecycle assessment to understand the environmental impact of our vehicles, including the use of e\_TERRAIN® TECHNOLOGIES, beginning with Range Rover Evoque.

### SUSTAINABLE MANUFACTURING. USING FEWER RESOURCES AND CREATING LESS WASTE

World-class manufacturing facilities, certified to ISO14001 since 1998. As a company, we are targeting a 25 percent reduction in operating CO<sub>2</sub> emissions by 2012, 25 percent in waste-to-landfill and 10 percent in water consumption, based on 2007 levels. Our activities include factory energy efficiencies, cutting transport miles and the carbon offset of all CO<sub>2</sub> emissions from manufacturing assembly. But it doesn't stop there. Every new vehicle is designed to be 85 percent recyclable and reusable as well as 95 percent recoverable and reusable, with 10 percent specifically for energy recovery.

#### FACT

Turning waste food into energy in a trial at Land Rover headquarters has diverted 43 tons of waste from landfills and saved 3.7 tons of CO<sub>2</sub> emissions.

### CO<sub>2</sub> OFFSETTING. INVESTING IN RENEWABLE ENERGY, TECHNOLOGY CHANGE AND ENERGY EFFICIENCY PROJECTS

For every ton of CO<sub>2</sub> emitted during the manufacturing assembly of our vehicles, Land Rover invests in carbon-reduction projects that reduce an equivalent ton of CO<sub>2</sub> elsewhere. In addition, we enable our customers to offset their first 45,000 miles (72,000 km) of driving in their new vehicles. We do this in the UK as well as countries in Europe, the Middle East and Asia. Independently administered by ClimateCare and Forum for the Future, CO<sub>2</sub> offsetting allows us to take action now, to reduce our impact on the environment, as part of our integrated carbon-management plan.

#### FACT

We plan to offset approximately 3,000,000 tons of CO<sub>2</sub> emissions by 2012.

### CONSERVATION AND HUMANITARIAN PARTNERSHIPS. WORKING PARTNERSHIPS FOR CONSERVATION AND SOCIETY'S GAIN

Our vehicles are designed for purpose, so they are used by conservation and humanitarian organizations worldwide. Working with our five Global Conservation partners and the International Federation of Red Cross and Red Crescent Societies (IFRC), Land Rover is proud to support the important work of the Royal Geographical Society (with IBG), The Born Free Foundation, Earthwatch Institute, Biosphere Expeditions and the China Exploration and Research Society.

#### FACT

In 2010, Land Rover launched a new three-year global initiative with the IFRC titled "Reaching Vulnerable People Around the World." Land Rover has supported the IFRC's life-saving work since 2007 and to date has given more than \$6.5 million in vital funding and vehicle support to help vulnerable people around the world.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. Although Land Rover takes the utmost care in ensuring that all details in the publication are correct at the time of going to press, we are constantly striving for improvement and therefore reserve the right to alter specifications and equipment without notice. Details of specifications and equipment are also subject to change to suit local market conditions and requirements, and not all products are available in every market. Some vehicles are shown with accessories or optional equipment fitted. These products vary from market to market. Please consult your Land Rover Retailer, who will be pleased to advise you on current specifications. Distributors and Retailers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation. ## Genuine Land Rover KIT assures confidence

Land Rover would like to remind you that accessories that are non-genuine Land Rover are not warranted by Land Rover North America and may not be serviceable at other Land Rover Retailer Centers. If your Land Rover Center or sales guide offers you non-genuine Land Rover parts or accessories, we recommend finding out whether they have a warranty, where they can be serviced, and what company provides these warranties and service.
