

THEFT RECOVERY SYSTEM

RecovR is an optional Theft Recovery System discreetly placed within your vehicle. The wireless, battery-operated device doesn't have to be charged and won't drain your battery. The device is pre-installed by your dealer and is private so only you can access your vehicle's location.

This highly effective tool includes a free mobile application that allows you to:

- Locate your vehicle.
- Get alerts when your vehicle has moved.
- Activate Theft Recovery Mode.
- Share your stolen vehicle location live with law enforcement.

You can also leverage:

- Insurance rate discounts up to 15%².
- 3 years of 24/7 nationwide support
- \$5,000 for unrecovered stolen vehicle.
- Up to \$1,000 towards insurance deductible.

The RecovR system comes with a Certificate of Limited Warranty and is not a product of insurance. It is not cancellable or transferable once active¹. During the term of your Certificate of Limited Warranty, if your vehicle is stolen and RecovR is unable to recover within 30 days, you are entitled to the Limited Warranty amount set forth in your contract.

Ask your salesperson or finance manager for details.

¹See certificate of Limited Warranty for state specific details.

²If offered by your insurer.
