- Inspect emission hoses and tubes\*2

### EVERY 72,000 KM OR 60 MONTHS

- Includes 24,000 KM inspection, plus:
- Inspect exhaust system and heat shields

### EVERY 120,000 KM

- Includes 40,000 KM inspection, plus:
- Replace spark plugs

### EVERY 192,000 KM OR 10 YEARS

- Replace coolant, after that every 96,000 KM or 5 years\*1

### ADDITIONAL OPERATIONS

- Inspect flat tire repair kit annually replace tire repair fluid bottle with new one before expiration date
- If rear differential has been submerged in water, the oil should be replaced

At each visit, we'll provide you with an exclusive Vehicle Health Check Report, which shows you the overall condition of your Mazda.

**CLICK HERE FOR AN ENLARGED VERSION**

Scheduled services may vary by year of vehicle. Please consult your factory-trained Service expert or Owner's Manual for the specific maintenance intervals pertaining to your vehicle.

Your Mazda Dealer will provide you with a completed service checklist on every maintenance visit. In addition, your Mazda will be road tested after any servicing relating to brakes, steering or driving performance, to help verify safe functioning. Information listed in this document is accurate at time of publication and is subject to change without notice. Ask your Mazda Dealer for more detailed information. This inspection list/schedule is intended as a guide only and should not be relied upon to ensure vehicle safety. See your Mazda dealer for full details, maintenance and inspection.

Inspect is defined as: inspect and clean, repair, adjust, fill up, or replace if necessary.

\*1 Use of FL-22 is recommended when replacing engine coolant. Using engine coolant other than FL-22 may cause serious damage to the engine and cooling system.  
 \*2 According to state/provincial and federal regulations, failure to perform maintenance on these items will not void your emissions warranties. However, Mazda recommends that all maintenance services be performed at the recommended kilometer period to ensure long-term reliability.  
 \*3 The Tire Pressure Monitoring System (TPMS) initialization must be performed so that the system operates normally (if equipped).
