Ford Motorcraft

Labor may have a limit. See your seller for a copy of the limited warranty.

To some, it's a metal tube.

To us, it's 1 ¾-inch, .090-gauge stainless steel tubing that makes up the roll cage of the Motorcraft® Wood Brothers Racing #21 Fusion. A little tube that's designed to withstand an impact at 225 miles per hour. And it's that kind of thinking that always goes into Motorcraft.® Another big deal.

Motorcraft® Wire Splice/Shrink Tubing Packages

- The new Motorcraft®wire splice/heat shrink packages are to be purchased as replenishment parts for the new ROTUNDA Wire Splice Tool Kit. They contain 5 uninsulated butt splices, 5 pieces of dual wall adhesived-lined heat shrink tubing and the new instruction sheet detailing the approved wire splice procedure as defined by Ford Motor Company.
- The package will construct five complete splice repairs and are available in three wire ranges:

Motorcraft® Part #:	Wire Range
WT-56814	22-18 AWG
WT-56815	16-14 AWG
WT-56816	12-10 AWG

Expanded wire gauge applications for these splices can be found in TSB 03-11-6

- Ford Engineering has determined that the combination of the crimped uninsulated butt splice insulated with a 2" piece of adhesive-lined heat shrink tubing has proven superior in terms of strength, durability, and corrosion resistance. When heated, the tubing shrinks and the adhesive lining melts and flows to form a rugged, environmentally sealed barrier against corrosion, and eliminating the potential deterioration and integrity of the vehicles electrical wiring harness.
- As separate components, these butt connectors and heat shrinkable tubings are known for their superior quality and performance. Combined, you can not achieve better results, and this is precisely why Ford Motor Company has chosen this combination for repairing wiring harnesses.
- Recommended Application Tools:
  164-R5901 Ford Approved Crimp Tool
  164-R5902 Shielded Flameless Heat Gun
