

PORSCHE

Porsche Classic

Product News 05 | 2015

Over 70 percent of all Porsche vehicles ever built are still on the road today. We make sure it stays that way.

Porsche Classic genuine parts.

The aim of Porsche Classic is to maintain and care for historic Porsche vehicles for which standard production was generally discontinued at least 10 years ago. These include legendary sports cars such as the 356, 914, 959 and 911 (including Types 964 and 993), as well as all four and eightcylinder models such as the 924, 928, 944 and 968. New in the Porsche Classic scope of support: the Porsche Boxster, type 986, and the Porsche 911, type 996. The production and supply of Porsche Classic genuine parts makes a vital contribution to retaining their appeal.

We have a selection of genuine parts available at our spare parts warehouse. A further 52,000 parts and components are ready for despatch at the central spare parts warehouse of Porsche AG. Porsche Classic procures its genuine parts from former parts suppliers or tries to find new supply sources. Work is based on original documentation, technical drawings and detailed descriptions, a comprehensive store of samples and the expertise of our staff.

Naturally, we ensure that Porsche standards are met in terms of technology, quality and safety – even with new editions of parts. Porsche Classic is constantly endeavouring to close gaps in the spare parts range by continuously monitoring, updating and expanding the inventory.

On the following pages, we present a selection of Porsche Classic product highlights and new parts editions from the spare parts and accessories range. For some products we reveal to you the exciting history behind the relevant production and test procedures. After all, each genuine part has its own story to tell. With a happy ending, of course.

For answers to your questions about Porsche Classic Genuine Parts & Repair, please contact your Porsche Classic Partner or your Porsche Center.

It's good to know that genuine parts
are available for something so irreplaceable.

The new Porsche Classic Car Care Set.

The new Porsche Classic Car Care Set.

The relationship you have with your Porsche is something very special – and long-term relationships need special care and attention.

The 17-piece Porsche Classic Car Care Set is the best way to do this. It contains a combination of different products for all exterior surfaces and is suitable for all Porsche paint generations.

Developed in-house: all car care products in this set were tested under the toughest conditions and are designed to meet the exact requirements of your vehicle.

Particularly authentic: the high-quality, classic-style storage bag with houndstooth pattern.

One goal: To maintain your passion for back-to-basics driving and the love for classic cars.

So that you and your classic car will continue to look your best on the road long into the future.

The Porsche Classic Car Care Set is available from your
Porsche Classic Partner and in your Porsche Center by requesting.

all¹⁾

except China and Russia

If you run out of any of the products, you can re-order it individually
or in the set so that your Car Care Set is always complete.

¹⁾Information on availability and buildability in the various countries can be obtained from your Porsche Classic Partner and in your Porsche Dealership.

Why is the Porsche Classic Car Care Set unique?

Perfect combination of products: What makes the complete set so impressive is its perfectly matched combination of care products and items. It includes products designed to look after all exterior surfaces and is suitable for all paint generations and Porsche models.

Stylishly and securely packaged: The high-quality, hard-wearing leather bag in classic style with houndstooth pattern is a safe and aesthetic means of storing all the car care products included in the set. Each product has its own secure place thanks to the foam inserts designed specifically for the products.

Tested in Weissach: Each care product was tested for material compatibility when used according to guidelines at the development centre in Weissach - both in the lab and in practical use.

An all-rounder:

Thorough, yet gentle washing protects the paintwork from aggressive dirt and is a basic prerequisite for all other work. The shampoo can also be used on the convertible top.

Car shampoo
PCG90102240
Chamois leather
PCG90102040

Optimal preparation:

The cleaning clay removes both palpable deposits, such as flash rust, and the finest particles of dirt, such as tar or flies. This cleans right into the pores of the paintwork and is the ideal preparatory step before polishing.

Cleaning clay
PCG90101340

Impressive shine:

The paint polish is always of high quality thanks to the consistent structure, shape and strength of the synthetically produced abrasive grains. This prevents micro-scratches and removes deeper scratches immediately. For gentle polishing of the paint surface and an impressive deep shine without haze or streaks.

Microfiber cloth
PCG90101140

Long-life protection:

Long-term preservation and best possible protection – the hard wax provides both for the paintwork of a classic car. It contains over 40% wax from the carnauba plant, the hardest natural wax in the world. Nano-special polymers in this easy-to-use wax provide excellent shine and long-term protection.

Hard wax

Wax pad
PCG90101240

Deep-pore cleaning:

The plastic cleaner is made from a combination of active ingredients containing special care oils and light stabilisers. It penetrates deeply into the plastic or rubber and effectively prevents diffusion of the plasticizers. As a result, rubber and plastic always remain supple and this prevents cracks and ageing.

Plastic cleaner
PCG90103040

Complete cleanliness:

Even hard-to-reach areas in the rims can be reached easily using the brush set. When used together with the acid-free wheel cleaner, even the most stubborn dirt, such as brake abrasion particles, can be removed easily. Material compatibility with peripheral components is always guaranteed.

Wheel cleaner
PCG90102340
Wheel cleaner with brush set
PCG04400086

Optimal protection:

The special components of the tire cleaner penetrate particularly deeply into the rubber and keep the tire permanently clean, thereby preventing fading or brittleness.

Tire cleaner
PCG90103140

Quick cleaning solution:

The window cleaner removes dirt and soiling. It reliably and quickly removes all stubborn blinding and oily films on the windscreen and is extremely economical.
