ACCESSORY NAVIGATION SYSTEM

Your Vehicle is Navigation Ready.

01 Accessory Navigation System

The Accessory Navigation System from Mercedes-Benz allows the Standard Audio 20 Radio and 5.8-inch display in the C-Class to be upgraded to an innovative, multifunctional navigation system. In addition to the advantages of 3D GPS map navigation and included lifetime traffic, the Accessory Navigation System offers a variety of many other navigation functions such as recommendations for choosing the optimal lane. Additionally, highway signs and exit ramps are displayed on the navigation screen, as well as actual road signs and lane information. The destination can easily be selected by moving the cursor to a location on the map or simply by using the ZIP code or address entry. All of these functions can be accessed and operated using the vehicle’s conveniently located central controller.
The Mercedes-Benz COMAND Navigation System is a fully integrated system that combines Global Positioning System (GPS) technology with electronic mapping software to help you plan trips, navigate detours and avoid getting lost. GPS satellites continuously track your vehicle’s location and the system relies on mapping information in order to give you the most accurate and efficient routes. Notice however, how quickly the surroundings change: roads are added or diverted, restaurants open and close, hotels and hospitals are built, ATMs move. In fact, as much as 20 percent of the navigation data the system relies on changes every year. That is why Mercedes-Benz offers reliable, and updated navigation data to help get you where you need to go effortlessly.

The Navigation Map Updates are available for purchase from your authorized Mercedes-Benz dealer. The system can route you through more than 6.2 million miles of navigable roads in the United States and Canada. Just enter the address on the intelligent destination input screen, and the system takes over, guiding you audibly and with a clear and detailed 7” LCD map display. Do you need an idea where to go? The Navigation System also offers 2.3 million Points of Interest in 70 categories including ATMs, restaurants, hotels, airports, museums and more.

Navigation system data includes the United States, Canada, Puerto Rico, Hawaii and Virgin Islands. Directional assistance provided only when GPS coverage is available. Maps do not cover all areas nor all routes within an area. While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system’s audio cues while driving and should only consult the map or verbal displays once the vehicle has been stopped in a safe place. See your authorized Mercedes-Benz dealer for availability and details.

Mercedes-Benz vehicles equipped with BabySmart™ have a device that recognizes the presence of BabySmart™-equipped child seat when properly installed in the front passenger seat and deactivates the passenger front air bag (check your vehicle’s Operator’s Manual or labels located on the sides of your dashboard to verify). All current Mercedes-Benz models are equipped with the Occupant Classification System (OCS) (with exception of the G-Class) which is designed to turn off the front passenger’s front airbag when the system senses the weight of a typical child 12 months old or less plus the weight of a standard child restraint. See vehicle’s operators manual for important additional information on this system and further information regarding the transportation of children heavier than a typical 12 month old. All Mercedes-Benz child safety seats meet or exceed U.S. Department of Transportation standards. They are also suitable for use in older vehicles that do not have integrated LATCH (Lower Anchors and Tethers for Children) attachment points. Visit the National Highway Traffic Safety Administration’s website at http://www.NHTSA.gov for additional information about child safety seat laws and proper use.
